29.08

30.08

Weekly impact on indices	Up	Down	Total influence. %
MICEX Index	+0.35%	-2.40%	-2.05%
RTS Index	+0.24%	-3.25%	-3.01%

Over the week of August 26 - 30, 2013 the Moscow Exchange Indices reflected the negative trend on the Russian stock market. The MICEX Index was down 2.05% to 1,364.65 (1,393.21 as of August 23, 2013) and the dollar-denominated RTS Index fell by 3.01% to 1,290.96 (1,330.99 as of August 23, 2013).

At the end of the week the MICEX Index was 1.63% lower than a month ago (1,387.31 as of July 30, 2013) and 4.56% lower than a year ago (1,429.82 as of August 30, 2012). The RTS Index was 2.67% lower than a month ago (1,326.41 as of July 30, 2013) and 6.74% lower than a year ago (1,384.26 as of August 30, 2012).

Last week's decrease of the RTS Index was accompanied by the increase of volatility levels, when the Russian Volatility Index RTSVX was up 9.29%.

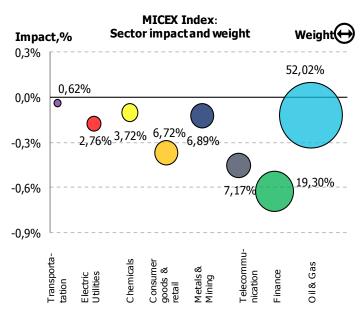

The most negative impact on the MICEX Index was mainly due to the falling prices for ordinary shares of Sberbank (-0.50%), OJSC «Magnit» (-0.35%) and OJSC «Rostelecom» (-0.29%).

Trading volume of securities included into the Moscow Exchange Indices' list of constituents amounted to RUB 102.94 billion, and the market capitalization of the Indices' constituents amounted to RUB 19,001.59 billion.

At the end of the week, 41 constituents of the MICEX Index list were pushing the Index down (-2.40%), while 9 securities behaved positively (+0.35%).

On the sector level, the major negative impact was made by the financials (-0.63%) and the telecommunication (-0.45%).

The oil & gas sector accounted for 52.02% of the MICEX Index total capitalization. The other large-weight sectors were the finance (19.30%) and the telecommunication (7.17%).

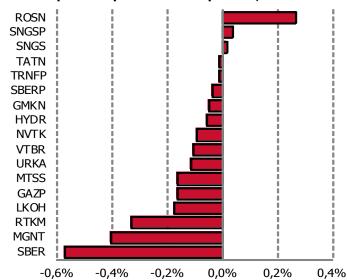

(August 26 - 30, 2013)

Blue Chip Index

total return) was down 0.13% to 133.00 last week (133.17 points as of August 23, 2013). The yield to maturity of the securities being the part of the calculation formula was up 2 basis points to 7.35%.

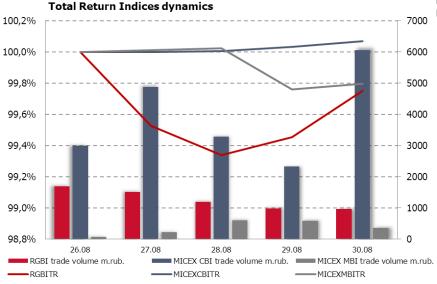

The Russian Government Bond Index (RGBI,

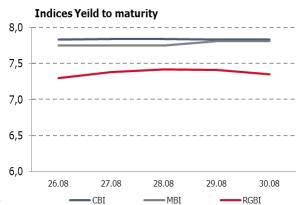

The Municipal Bond Index (MICEX MBI TR, total return) showed the negative trend and reached 175.15 points reducing by 0.14 basis points (175.40 as of August 23, 2013).

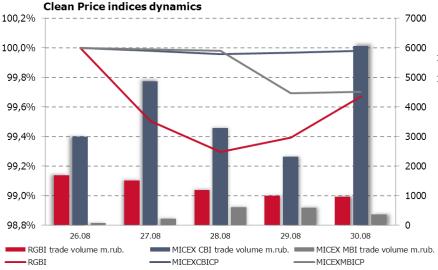

The total return value of the MICEX Corporate Bond Index (MICEX CBI TR) was up 0.15% to 237.67 points.

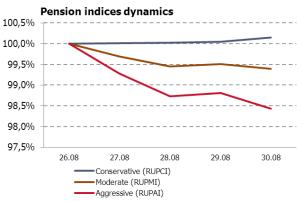

The conservative investment strategy tracking the last week's pension index could have resulted in a gain of 0.20% per week. The aggressive investment strategy based on the pension index could have brought a loss of 1.68% per week.

The bond overnight repo rate was up 7 basis points (from 6.04% to 6.11%). The equity overnight repo rate was equaled 6.19%.

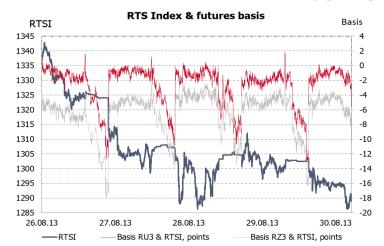

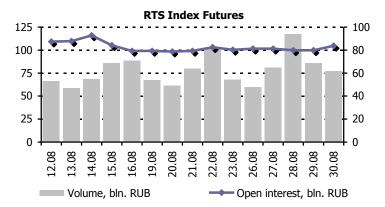

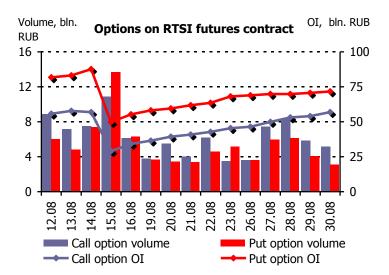

(August 26 - 30, 2013)

Index Derivatives

#### 

For the week of August 26 - 30, 2013 the total trading volume in index futures and options on the Moscow Exchange Derivatives Market equaled RUB 478.84 billion or 5.51 million contracts.

Last week's trading volume for the most liquid contract on FORTS, futures contract on the RTS Index, amounted to RUB 420.58 billion or 4.86 million contracts.

The RTS Index futures contract traded in backwardation last week. By the end of the week the RTS Index lost 3.01%, while the September and the December futures contracts down 3.32% and 3.38% respectively.

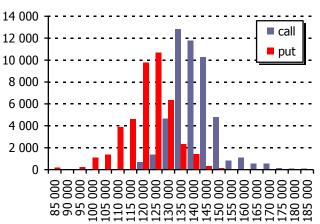

The total investor's open interest measured in RTS Index futures increased by 6.94%.

During the week the trading volume in futures contract on the MICEX Index was RUB 4.87 billion or 35.37 thousand contracts. Open interest in the MICEX Index futures decreased by 5.04%.

Trading volume in options on RTS Index futures totaled RUB 53.27 billion or 613.50 thousand contracts last week. Open interest of RUB 128.55 billion or 1.48 billion contracts was fixed. Put options made up 55.77% of the total open interest for these contracts. The 135.000 strike calls and 125.000 strike puts had the highest open interest.

The total investors' open interest measured in options on the RTS index futures increased by 12.13%.

(August 26 - 30, 2013)

**The Moscow Exchange Indices** are key indicators of the Russian organized market of securities and derivatives. The Indices refer to the type of the capitalization-weighted equity indices. The Indices calculation formula is based on the ratio of the total market capitalization of stocks included into the Index to the same indicator as of the Index inception date.

**The MICEX and the RTS Indices** are Russian stock market composite indices that include 50 most liquid stocks of the largest and most dynamically performing Russian issuers. The MICEX Index is calculated based on the stock prices denominated in RUB. The RTS Index is calculated based on the stock prices denominated in USD.

**Sectoral Indices** reflect the movements of prices in a given sector of the economy represented in the Russian stock market. They usually include 10 to 20 liquid shares of the most highly capitalized Russian issuers belonging to this sector.

MICEX O&G (RTSog) comprises stocks of oil & gas companies.

MICEX PWR (RTSeu) comprises stocks of utilities companies.

MICEX TLC (RTStl) comprises stocks of telecommunication companies.

MICEX M&M (RTSmm) comprises stocks of companies of metals and mining industry.

MICEX MNF (RTSin) comprises stocks of companies of manufacturing industry.

MICEX FNL (RTSfn) comprises stocks of banks and financial companies.

MICEX CGS (RTScr) comprises stocks of companies of consumer & retail sector.

MICEX CHM (RTSch) comprises stocks of companies of chemical industry.

Values of the sectoral indices are presented in rubles and in US dollars. Historical values of the MICEX sectoral indices are served as a history for ruble-denominated indices, whereas historical values of the RTS indices are used as a history for dollar-denominated indices.

**The Blue Chip Index** is an indicator that tracks performance of the blue chips. It is calculated from ruble-denominated prices and bids for 15 top liquid stocks of the Russian equity market.

**The MICEX10** is a price equal-weighted index calculated as the average of price fluctuations of 10 most liquid stocks admitted to trading on the Exchange. The Index tracks the increase in the value of portfolio comprising 10 stocks with the same initial weights.

**The Second-Tier Index** is an indicator that tracks the performance of stocks issued by small cap and mid cap companies. The Index constituent list includes 50 securities ranked below the stocks with the largest capitalization (taking into account free-float) included into the MICEX Index and the RTS Index unified list of constituents. The Index is calculated based on the dollar-denominated and ruble-denominated stock prices.

**The Broad Market Index** includes the top 100 shares selected by the criteria of liquidity, capitalization and shares that are in free-float. The Index's list of securities is used as the basis for the constituent list of other indices of the Moscow Stock Exchange, e.g. where TOP-50 stock of the Broad Market Index list is an underlying for MICEX Index as well as for RTS Index and BOTTOM-50 of the Broad Market Index list is an underlying for the Second-Tier Index. Whole sectoral indices baskets compose the list of the Broad Market Index.

**The MICEX Innovation Index** is a capitalization-weighted price index comprised stocks of Russian companies traded on the Innovations and Investments Market.

**Regional Indices** are equity indices designed to include stocks admitted to trading in Moscow Exchange, selected on the basis of liquidity and capitalization with issuers operating primarily in the specific federal district of the Russian Federation. At the moment, the information on the RTS Siberia Index, with constituent stocks of companies from the Siberian Federal district, is available.

**The Russian Volatility Index** is an aggregated indicator which reflects the average value of implied volatility of the options on RTS Index futures contract. To calculate values of the Index the Black-Scholes option pricing formula is applied.

**The Bond Indices** are the family of MICEX Bond Indices consists of the Russian Government Bond Index (RGBI), MICEX Corporate Bond Index (MICEX CBI) and MICEX Municipal Bond Index (MICEX MBI). The Indices were designed to measure the performance of the various segments of the Russian bond market. The Bond Indices are calculated by three methods concurrently: "total return", "clean price" and "gross price" method. In addition, duration and yield to maturity are calculated based on the Indices constituent lists.

**The repo rate indicators** are calculated to evaluate Russian organized repo market condition. The Indicators are computed separately for the stock repo market and bond repo market. Trades in shares included in the MICEX Index constituent list and trades in bonds included in the Bank of Russia's Lombard list are used to calculate the Indicators. There are overnight, one-week and two-week repo rate indicators that are determined based on settlement periods of relevant repo transactions.
