The total trading volume in index futures and options on Moscow Exchange's Derivatives Market in the week to 8 November was RUB 381.45 bln, or 4.02 mln contracts.

Last week's trading volume in RTS Index futures, which is the most liquid contract on FORTS, was RUB 308.28 bln, or 3.25 mln contracts.

The RTS Index futures contract traded in backwardation last week. The RTS Index lost 2.72% WoW, while the December and March futures were down a respective 2.80% and 2.94%.

Open interest in RTS Index futures decreased 4.14%.

Turnover in MICEX Index futures was RUB 1.91 bln, or 12,645 contracts. Open interest in MICEX Index futures increased 3.41%.

The trading volume in options on RTS Index futures totalled RUB 71.24 bln, or 750,377 contracts. Open interest was RUB 206.19 bln, or 2.24 mln contracts. Puts made up 66.49% of the total open interest. The 155,000 strike calls and 135,000 strike puts had the highest open interest.

The open interest in options on RTS index futures rose 9.67%.

(5 - 8 November 2013)

Moscow Exchange's indices are key indicators of the Russian organized securities and derivatives market. The indices are capitalization-weighted. The calculation formula is based on the ratio of the total market cap of stocks included in the index to the same indicator as of the index inception date.

The MICEX and RTS Indices are Russian stock market composite indices that include the 50 most liquid stocks of the largest and most dynamically developing Russian issuers. The MICEX Index is calculated based on the stock prices denominated in RUB. The RTS Index is calculated based on the stock prices denominated in USD.

Sectoral indices reflect the movements of prices in a given sector of the economy represented on the Russian stock market. They usually include 10-20 liquid stocks of the most highly capitalized Russian issuers belonging to the sector.

- MICEX O&G (RTSog) comprises stocks of oil & gas companies.
- MICEX PWR (RTSeu) comprises stocks of utilities companies.
- MICEX TLC (RTStl) comprises stocks of telecoms companies.
- MICEX M&M (RTSmm) comprises stocks of metals & mining companies.
- MICEX MNF (RTSin) comprises stocks of manufacturing companies.
- MICEX FNL (RTSfn) comprises stocks of banks and financial companies.
- MICEX CGS (RTScr) comprises stocks of consumer & retail companies.
- MICEX CHM (RTSch) comprises stocks of chemicals companies.

Values of the sectoral indices are presented in RUB and USD. MICEX sectoral indices' historical values provide historical values for rouble denominated indices, while the RTS indices' historical values provide them for dollar-denominated indices.

The Blue Chip Index is an indicator that tracks blue chips' performances. It is calculated from rouble denominated prices and bids for the 15 most liquid Russian stocks.

The MICEX10 is an unweighted price index calculated as the average of price fluctuations of 10 most liquid stocks admitted to trading on the exchange. The index tracks the increase in the value of a portfolio comprising 10 stocks with the same initial weights.

The Second-Tier Index is an indicator that tracks the performance of stocks issued by small and mid cap companies. The index includes 50 securities with free floats ranked by market cap behind the stocks in the MICEX Index and RTS Index's unified constituent list. The Index is calculated based on USD and RUB denominated stock prices.

The Broad Market Index includes the top 100 shares by liquidity, market cap, and the proportion of shares in free float. The Index's list of securities is used as the basis for the constituent list of other Moscow Exchange indices. The top 50 stocks in the Broad Market Index list are used to calculate the MICEX Index and RTS Index, and the bottom 50 to calculate the Second Tier Index. Sectoral indices baskets comprise relevant names in the Broad Market Index.

The MICEX Innovation Index is a capitalization weighted price index comprising Russian stocks traded on the Innovations and Investments Market.

Regional Indices are equity indices designed to include stocks admitted to trading on Moscow Exchange, selected based on liquidity and capitalization, with issuers operating primarily in a specific region of Russia. Information on the RTS Siberia Index, comprising stocks of companies from the Siberian federal district, is currently available.

The Russian Volatility Index is an aggregated indicator which reflects the average value of implied volatility of options on RTS Index futures. The Black Scholes model is used to calculate the index's values,.

The Bond Indices are the family of MICEX Bond Indices, consisting of the Russian Government Bond Index (RGBI), MICEX Corporate Bond Index (MICEX CBI), and MICEX Municipal Bond Index (MICEX MBI). The Indices were designed to measure the performance of the various segments of the Russian bond market. The Bond Indices are calculated by three methods concurrently: these are total return, clean price, and gross price. In addition, duration and YTM are calculated based on the index constituent lists.

The repo rate indicators are calculated to evaluate Russian organized repo market conditions. They are calculated separately for the stock and bond repo markets. Trades in shares in the MICEX Index and in bonds included on the CBR's Lombard list are used to calculate the indicators. There are overnight, one-week, and two-week repo rate indicators.

RUSSIAN EQUITY AND BOND INDICES

(5 - 8 November 2013)

The report has been prepared and issued by Moscow Exchange. This report has been prepared and issued by MOSCOW EXCHANGE (the "Company"). Unless otherwise stated, the Company is the source for all data contained in this document. Such data is provided as at the date of this document and is subject to change without notice.

This document does not constitute or form part of, and should not be construed as, an offer or invitation for the sale or subscription of, or a solicitation of any offer to buy or subscribe for, any securities, nor shall it or any part of it or the fact of its distribution form the basis of, or be relied on in connection with, any offer, contract, commitment or investment decision relating thereto, nor does it constitute a recommendation regarding the securities of the Company.

The information in this document has not been independently verified. No rereport or warranty, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy or completeness of the information or opinions contained herein. None of the Company, or any of its subsidiaries or affiliates or any of such person's directors, officers or employees, advisers or other representatives, accepts any liability whatsoever (whether in negligence or otherwise) arising, directly or indirectly, from the use of this document or otherwise arising in connection therewith.

This report includes forward-looking statements. All statements other than statements of historical fact included in this report, including, without limitation, those regarding our financial position, business strategy, management plans and objectives for future operations are forward-looking statements. These forward-looking statements involve known and unknown risks, uncertainties and other factors, which may cause our actual results, performance, achievements or industry results to be materially different from those expressed or implied by these forward-looking statements. These forward-looking statements are based on numerous assumptions regarding our present and future business strategies and the environment in which we expect to operate in the future. Important factors that could cause our actual results, performance, achievements or industry results to differ materially from those in the forward-looking statements include, among other factors:

- Perception of market services offered by the Company and its subsidiaries
- Volatility (a) of the Russian economy and the securities market and (b) sectors with a high level of competition that the Company and its subsidiaries operate
- Changes in (a) domestic and international legislation and tax regulation and (b) state policies related to financial markets and securities markets
- Competition increase from new players on the Russian market
- The ability to keep pace with rapid changes in science and technology environment, including the ability to use advanced features that are popular with the Company's and its subsidiaries' customers
- The ability to maintain continuity of the process of introduction of new competitive products and services, while keeping the competitiveness
- The ability to attract new customers on the domestic market and in foreign jurisdictions
- The ability to increase the offer of products in foreign jurisdictions

Forward-looking statements speak only as of the date of this report and we expressly disclaim any obligation or undertaking to release any update of, or revisions to, any forward-looking statements in this report as a result of any change in our expectations or any change in events, conditions or circumstances on which these forward-looking statements are based.
