ADDRESS FROM MIKHAIL ZADORNOV, PRESIDENT AND CHAIRMAN OF THE MANAGEMENT BOARD

Dear Friends, Dear Clients,

Despite the economic downturn, in 2015, VTB24 has shown positive bottom-line results. The Bank's net income was RUB 0.5 billion, and its assets grew 3%, or by RUB 83 billion after revaluations, to RUB 2.8 trillion.

Our retail loan portfolio has shown lower deceleration rates than the market — it has shrunk by 0.8%, which allowed us to increase our market share from 12.73% to 13.37%.

At the end of 2015, the combined portfolio of retail and small business loans stood at RUB 740 billion. During the fourth quarter of 2015, we saw a renewed interest in loan products, with sales of loans in the last three months of the year reaching RUB 258 billion, up 33% quarter-on-quarter.

Consumers have increased demand across all product segments, with cash loans recording the biggest growth

(+53% quarter-on-quarter), followed by small business loans (+49%), and mortgage loans (+45%).

During 2015, VTB24 also saw an increased demand for deposit products — over the year, our deposit portfolio grew by 25% (+RUB 452 billion after revaluations), as compared to 15% a year before (+RUB 164.5 billion). Retail term deposits rose to RUB 1.72 trillion, with two thirds of the growth coming from affluent clients. In 2015, the portfolio of deposits attracted from VIP clients increased by RUB 319 billion to over RUB 730 billion, with the share of FX deposits growing from 46.3% to 51.8%.

VTB24's retail deposits grew by about 1.5 times faster than the market rate – 33% versus 25.2%. The retail deposit portfolio rose by RUB 499 billion to over RUB 2 trillion as at 1 January 2016, with VTB24's market share growing 0.51 p.p. to 8.66%. At the same time, corporate deposits rose to RUB 303 billion.

2015 saw further consolidation of the Russian banking sector. We were a leading partner of the Deposit Insurance Agency in making insurance payments to former clients of failed banks. During 2015, VTB24 compensated depositors of 12 bankrupt banks. Insurance benefits were paid to about 400 thousand depositors of failed banks, with payouts in 2015 totalling RUB 120 billion, a 2.5-fold increase from 2014. About 40% of payouts were deposited with VTB24.

In 2015, we continued our regional network optimisation efforts. Today, we operate in 72 regions and 354 cities and towns across Russia. Our key regions include the Moscow region (120 offices), Saint Petersburg and the Leningrad Region (63 offices), Novosibirsk (24 offices), Yekaterinburg (20 offices), and Nizhny Novgorod (18 offices). Our Private Banking network added 4 offices in 2015, bringing their total number to 24. In 2016, we plan to open 47 new offices, including a VIP office in Vladivostok.

VTB24 grew the volume of its merchant acquiring business to RUB 629 billion, up 73% from a year before. The Bank has grown into a leader in the Internet acquiring segment, with our market share rising 5 p.p. to 26%.

VTB24 has partnered with major merchants like Magnit, Auchan, Lenta, Metro C&C, and Decathlon. In addition, we implemented a money transfer functionality on the Odnoklassniki social media platform, with about 8 million active cards linked now to OK's accounts.

For 2016, we plan involvement in a number of new initiatives. VTB24 is implementing a tap-to-pay solution for the Moscow Metro using PayPass and PayWave cards. The solution will be rolled out at Tekhnopark, Rumyantsevo, Marksistskaya, Serpukhovskaya, and Salaryevo (soon to be opened) Moscow Metro stations. In May 2016, contactless payments became available on all radial line stations with interchange to the Ring Line, and the three stations within the boundaries of the Moscow City business district (Vystavochnaya, Mezhdunarodnaya, Delovoy Tsentr).

Priorities for 2016 also include the development of mobile acquiring and including the acquiring service into our package offering for small business. These new projects will help the Bank grow its business volume in 2016 to RUB 1 trillion.

Dear Friends, 2015 was a milestone year for VTB24, with the Bank celebrating its ten years of operations. Over this decade, VTB24 has grown into a major player in the Russian banking market. Today we have 16 million individuals and individual entrepreneurs as our clients, and are the main bank for 300 thousand corporates.

VTB24 is an absolutely unique business case. We are a retail bank providing services to small businesses and individuals through a dedicated platform. Over a very short period of time, we have expanded our business throughout Russia, offering a full product range across all key sales channels.

It has been a profitable growth — as early as in the second year of its operation, and throughout the entire subsequent decade, we have grown our shareholder value, multiplying the initial investments of our shareholders, despite all the crises, turbulence, and downturns in the Russian economy.

What are the drivers of this impressive success?

Our first success factor is that we operate in a competitive market, providing consumers with the banking services they need. The second factor is the fully consistent approach shown by our shareholders throughout all these years. And the third success driver is our management — we have successfully built a strong team, both in the regions and in Moscow, with high levels of cooperation and alignment of goals and objectives managers who talk the same language and are committed to the Bank's strategic priorities.

And of course, our people have been the immense contributing factor to our success; today our team is 35 thousand strong, many of whom have been with us for five, and even ten, years. I would like to thank all my colleagues and all those who are no longer working with us but made a significant contribution to our development and growth for all our accomplishments over the past decade.

I would also like to thank our clients for their loyalty to VTB24 brand. We will do our best to justify your trust.

President and Chairman of the Management Board Mikhail Zadornov

SEDNA 10th PLANET OF THE SOLAR SYSTEM

The planet was discovered by the American researchers Brown Trujillo and Rabinowitz.

Spectroscopy has revealed that Sedna's surface composition is similar to that of some other trans-Neptunian objects, being a mixture of water, methane, and nitrogen ices with tholins.

Sedna's perihelion is three times further away from the Sun than Neptune's orbit, and most of its orbit is further still, making it one of the most distant known objects in the Solar System other than long-period comets. Let's go!

2015 Performance Highlights

2015 PERFORMANCE HIGHLIGHTS	In 2015, banking assets rose 6.9% to RUB 82,999.7 billion as of 1 January 2016.	2. Geopolitics	The contin East prolo incomes o
OVERVIEW OF THE RUSSIAN BANKING SYSTEM	Corporate loans kept growing on the back of declining retail loans. In the reporting year, the retail loan portfolio shrank 5.7% to RUB 10,684.3 billion as of 1 January 2016. The non-financial sector loan portfolio grew 12.7% year-on-year to RUB 33,300.9 billion. Net of the FX effect, however, the corporate loan portfolio only grew 2.5%.		Tighter ac policy ha In 2015, 166 billic that in 20 Investmer and indus
	2015 saw banks' profits decline 67.4% to RUB 192 billion, mainly due to larger loan loss provisions made by lending institutions – rising by RUB 1,352 billion or 33.3% year-on-year, as compared to RUB 1,203 billion or 42.2% in 2014.		oil prices industry – 63.3 per barrel mig per USD.
GROWTH CONSTRAINTS FOR THE RUSSIAN BANKING SYSTEM	Customer deposits went up 18.5%, primarily due to retail deposits growing 25.2%, and corporate deposits and cash balances rising 15.6%.	key rate of the bank of russia	In 2015, to 11% in 2015. Sir (as of 18 Board of
1. Commodity prices	Prices for oil, Russia's major export commodity, kept falling. In 2015, the average annual price for the Urals oil came at USD 53 per barrel, representing a 46% drop year-on-year. According to the Russian Ministry of Economic Development, the Russian GDP will grow at 0.7% in 2016 if oil prices stay at USD 50 per barrel. Should average annual oil prices come down to USD 40 per barrel, the GDP may have a 1.2% decrease. As such, these ups and downs in commodity prices seem to drive unstable expectations and constrain investor appetite and consumer demand.	INFLATION	The decli by mover In 2015, Decembe According fall to an barrel it n

CONSUMER DEMAND

VTB24

In 2015, real wages in Russia fell by 8.9%, while real disposable income was down 4%. 2016 is expected to see real wages down 0.2%, and real disposable income down 0.7%; however, with oil at USD 40 per barrel, this decline may reach 2.0% and 2.5%, respectively. Lower incomes will put a drag on retail loans.

In 2015, lower retail turnover fell 10%, while the turnover in fee earning retail services went down 2.1%. 2016 is expected to see retail turnover grow 0.4% with average annual oil prices at USD 50 per barrel, and fall 2.5% with oil at USD 40 per barrel.

continuing conflict in Ukraine and rising tensions in the Middle prolong the economic sanctions against Russia, resulting in lower omes and business confidence.

ter access to international capital markets and a stringent monetary cy have led to higher borrowing costs and a weaker Rouble.

015, capital outflow reduced to USD 66.5 billion against USD billion in 2014. The Ministry of Economic Development estimates in 2016 capital outflow may slow down to USD 50 billion. Astments are expected to fall 1.6% (against a 7% drop in 2015) industry to rise 0.6% (against a 3.3% drop in 2015). However, if prices fall to USD 40 per barrel, investment may decline 5% and astry – 0.4%. The average annual RUB/USD rate would be RUB 3 per USD (RUB 61 per USD in 2015), while oil at USD 40 per rel might drive the average annual RUB/USD rate at RUB 68.2

015, the Bank of Russia consistently reduced its key rate from 18% 1% in five steps. The most recent reduction was made on 3 August 5. Since then, the key rate of the Bank of Russia has remained flat of 18 March 2016, with the next meeting of the Bank of Russia's ird of Directors on the key rate scheduled for 29 April 2016).

decline and subsequent stabilisation of the key rate were reflected novements in bank loan and deposit rates.

015, consumer price inflation stood at 12.9% (December-overcember) against 11.4% in 2014.

ording to the Ministry of Economic Development, inflation should to an average 7.4% in 2016, although with oil at USD 40 per rel it may reach 9.3%. 2015 Performance Highlights

#### VTB24'S POSITION IN THE INDUSTRY

VTB24 is currently Russia's second largest retail bank. As at the end of 2015, the Bank's network expanded to 1,045 offices in 354 cities across 72 regions, covering 79% of Russia's urban population.

The Bank's shareholders include: VTB Bank (PJSC) holding 99.9269% and minority shareholders holding a total of 0.0731% in the Bank's authorised capital. As of 1 January 2016, VTB24 had the authorised capital of RUB 104.0 billion and equity of RUB 267.0 billion.

In the reporting year, VTB24's assets grew 3% to RUB 2,820.1 billion.

In 2015, our net outstanding loans rose 7% to RUB 2,306.4 billion as of 1 January 2016.

Our cash balances on correspondent accounts with other banks declined 33% year-on-year to RUB 12.2 billion.

In 2015, deposits by other banks declined 52% to RUB 132.6 billion.

In the reporting period, customer deposit amounts grew 22% to RUB 2,440.8 billion as of 1 January 2016, including retail deposits up 33% to RUB 2,028.4 billion as of 1 January 2016.

In 2015, the Bank's equity (capital) rose 2% to RUB 267.0 billion, against RUB 261.6 billion in 2014. The Bank's authorised capital grew 14% to RUB 104.0 billion as at the year's end.

In 2015, VTB24's loss after tax was RUB 6.7 billion (in 2014, the Bank's profit after tax was RUB 28.1 billion).

VTB24

#### OUTLOOK

IN APRIL 2013, THE BANK'S SUPERVISORY BOARD APPROVED THE VTB GROUP'S RETAIL DEVELOPMENT STRATEGY IN RUSSIA FOR 2013-2016 **PROVIDING FOR A NUMBER** OF PRIORITY AREAS FOR VTB24, INCLUDING EFFORTS TO:

enhance customer experience; increase loyalty and prevent customer churn; introduce innovative and enhance existing products and services; open new offices to pursue regional expansion; increase the Bank's market share in retail loans and deposits; expand the network of self-service terminals; manage costs; manage risks and bad debt recovery; continue developing management processes for the Retail Global Business Line within VTB Group's management framework.

In the mid-term, retail and small business interest income and expenses, as well as non-interest fee and commission income will remain key drivers of the Bank's financial performance.

#### PLANS FOR 2016

VTB24

In 2016, our mortgage business will focus on offering affordable retail mortgage loans, improving customer service and providing an easy-touse and transparent home loan product.

TO THIS END, WE ARE PLANNING TO:

enhance our relations with partners;

services.

## **VTB24 ISSUED OVER 106** THOUSAND MORTGAGE LOANS

In 2015, VTB24 issued over 106 thousand mortgage loans for a total of RUB 198.4 billion. The Bank's mortgage portfolio rose 10% yearon-year to RUB 780 billion. As at the year's end, VTB24's mortgage portfolio included 554 thousand outstanding mortgage loans. As at the end of 2015, the Bank's share in the home loan market stood at 19.3%.

While the country is still facing macroeconomic challenges, the mortgage market was the only retail lending segment to post annual growth (10%). This growth was facilitated by a government subsidy programme, with VTB24 as a key enabler.

Through partnering with major Russian builders, we have been active in home construction loans so that our customers could buy newly built, modern homes on the best possible terms. In 2015, almost every second mortgage loan issued by the Bank was a loan to buy a newly constructed home.

To keep our mortgage lending as simple as possible we launched VTB24 Bank-Partner service in 2015, and our customers may now apply for a loan at our partners' offices without visiting the Bank's office.

In 2015, VTB24, with a 43% market share, retained its leadership in military loans to participants of the Mortgage Savings System. We issued over RUB 25 billion of mortgage loans under the programme.

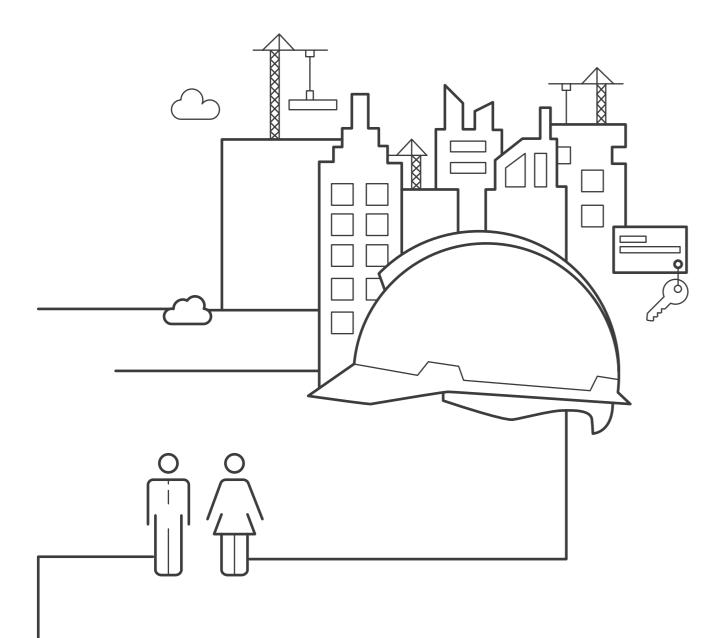

As an important highlight, we successfully secured RUB 13 billion worth of loans from the Bank of Russia against the mortgage loans issued under the Military Mortgage programme.

An ambitious project launched by us and the Agency for Housing Mortgage Lending (AHML) was a landmark event for VTB24 and the wider market. In Q4 2015, we won a public tender floated by AHML to centralise such functions as buyout of mortgage deeds, administration of mortgage loans, debt collection and property management. Over 200 thousand mortgage deeds were handed over by AHML to VTB24 for administration in a deal of unprecedented format and scale for the Russian mortgage market.

To support mortgage borrowers in difficult life situations, including FX borrowers, we offered our customers a comprehensive restructuring programme and joined AHML's programme for government support to mortgage borrowers.

- actively engage in the government programme for support to mortgage lending: the Bank is planning to lend about RUB 135 billion under the programme in 2016; and
- upgrade our CRM technologies to make mortgage lending simpler and easier for the customer, including through enhanced remote

#### **CASH LOANS**

In 2015, VTB24 issued over 500 thousand mortgage loans for a total of RUB 153.8 billion. As at the year's end, the Bank's share in total market loans was 13.45%. In 2015, VTB24 was chosen as a financial partner by every seventh customer taking out a cash loan to make their dreams come true.

In the reporting year, the Bank fully refreshed its line of cash loan products. In designing the new product line, we sought to build a product offer that would highlight key advantages of the product, and to streamline the product range.

After launching the renewed product line, we recorded a 50% rise in customer applications. The banking community also highly appreciated the Bank's new offer. VTB24 won the annual Bank of the Year 2015 award by Banki.ru news agency in the Consumer Loan of the Year category.

#### improved pricing; In the reporting year, we

updated our product offering and took some steps to support our sales and maintain the product margin:

enhanced our sales CRM, while our number of cash loan offers active at any given time exceeded 1.5 million, which is a record high for the Bank;

totally revised the terms of our Refinancing product. Sales of the revised product have recovered in all regions where we operate;

piloted remote cash loans.

VTB24

In 2015, new car sales in Russia sank to a low since 2010, with some car manufacturers withdrawing from Russia. Despite the market downturn, VTB24 retained its leadership in car loans, with its portfolio standing at RUB 93 billion as of 1 January 2016 and its market share at 13.5%.

In 2015, the highest demand for VTB24's car loans was recorded in Moscow, Saint Petersburg, Kazan, Krasnodar, and Tyumen.

Region Moscow Saint Petersburg Kazan Krasnodar Tvumen

took part in a car loan subsidy programme launched by the government: by December 2015, every fifth loan under the programme was issued by VTB24;

Haval;

launched a new product: balloon payment car loans, a popular car purchase format in Europe;

launched a solution to directly subsidise interest rates on car loans via a sales channel of our car manufacturer and dealer partners. The programme offers buyers attractive lending terms, documented in a loan agreement. Loan rates under such direct subsidy programmes ranged between 5.9% and 11.0%;

introduced new aftersale service packages, including banking and roadside assistance options;

streamlined operating processes by putting in place pledge notarisation and balance payouts on days-off.

started partnerships with new car manufacturers: joint projects were launched in the reporting year with Volvo, Cadillac, Honda, Opel, and

#### **PAYMENT CARDS**

At the end of 2015, VTB24's bank card portfolio comprised around 16 million active cards. The portfolio growth was mainly driven by payroll projects and the new line of credit cards and service packages.

In April 2015, VTB24 refreshed its line of retail credit cards by greatly simplifying the products and standardising the rates. As a key component of the new product range, the Bank now focuses on customer lifestyle segments such as travelling, entertainment, cars, and good bargains and pleasant shopping experience. Our credit card holders are now able to maximise the value of their relations with the Bank by aligning their transaction behaviour with their lifestyles. The re-positioned credit card line proved attractive to customers from the mass affluent segment and pushed up the share of premium cards.

In June 2015, we launched a line of retail service packages for daily banking support and personal finance management. With the new service packages, debit card sales went up 3.2 times in 2H 2015.

The new service packages encourage our customers to expand their business relations with the Bank. E.g. active users of banking products are offered interest-free rouble transfers and payments via VTB24-Online. Around 30% of our customers were offered a service package precisely for their active use of the Bank's products.

In 2015, sales of retail service packages were about 253 thousand, while sale rates stabilised at over 20 thousand a week.

In the reporting year, we acquired 768 thousand payroll customers with income levels above RUB 15 thousand, while the number of active payroll cards totalled RUB 4.5 million. We signed 4.9 thousand new payroll project agreements, including with such large nationwide holding companies and organisations as Bashneft, the Ministry of Internal Affairs, EMERCOM of Russia, the Ministry of Healthcare, EvrazHolding Finance, and Russian Railways' entities other than those migrated from ex-Transcreditbank. As at the year's end, around 40 thousand organisations were paying salaries and wages to their staff by loading them onto VTB24's cards.

In 2015, we took the following measures to enhance our payroll offer:

VTB24

put in place Best Terms for Best Customers, a new line of B2B packages for corporate clients. The packages included products for the business, executives and employees. Maximum preferences for products and services were offered to companies with the highest payroll and headcount;

a new payroll card line was introduced within the service package, with brand new service content:

a new automated system was rolled out to handle corporate payroll projects and minimise service time;

a new page, We Specialise in Payroll Projects, was launched on the Bank's website to highlight our payroll offer and make it catchy while targeting a specific customer segment; and

Severstal.

**PAYMENTS AND TRANSFERS** VTB24 continues developing its payment services and money transfers. In 2015, bill payments by the Bank's retail customers grew 29% yearon-year to 50 million transactions. Our commission income grew 83% year-on-year to RUB 858.5 million.

> In the reporting year, the Bank began targeted expansion of the range of utility suppliers whose bills can be paid via VTB24-Online and selfservice terminals without filling out recurrent payment details. These efforts will be continued in 2016.

Card-to-card, or person-to-person (P2P), payments launched in 1H 2014 showed a rapid growth in our remote service channels. 2015 saw three million customer transactions worth RUB 27.5 billion.

#### INDIVIDUAL SAFE **DEPOSIT BOXES**

The Bank offers its customers an opportunity to lease individual safe deposit boxes to keep their valuables in, and to settle their deals, including mortgage transactions involving VTB24.

We offer safe deposit boxes for lease to both retail and corporate customers. A customer may issue a power of attorney to provide access to a safe deposit box to a third party.

deposit boxes of various sizes.

#### **COINS AND** PRECIOUS METALS

VTB24 offers unallocated bullion accounts for four metals: gold, silver, platinum, and palladium. In 2015, the Bank sold over 60 thousand coins in precious metals. VTB24 offers over 400 types of coins made in Russia and in other countries. All types of coins in precious metals enjoy high demand, including investment coins, commemorative coins, and coins of different countries.

The Bank has optimised its product offering. A new line of deposit

products was introduced at VTB24–Online, with legacy products

**PRIVATE BANKING** 

In 2015, our VIP customer base rose 50% to 8,079 clients, with our AuM portfolio growing by RUB 319 billion to RUB 732 billion, while our aggregate PB balances increased 77%. By the year's end, average liabilities per customer reached RUB 90.6 million.

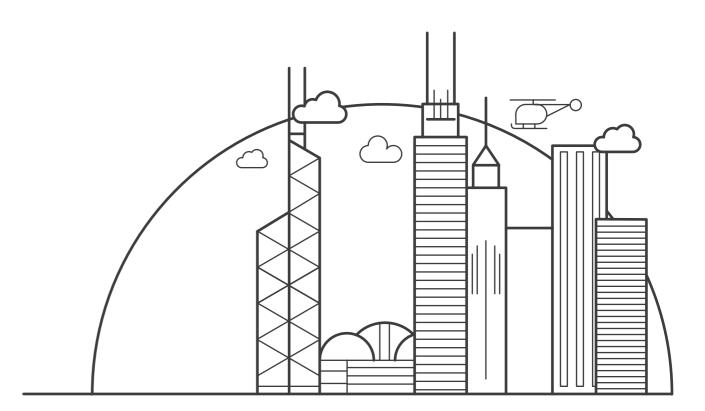

We offered new products and services to our Private Banking clients in the reporting year, boosting active sales of investment products, including investment insurance programmes, and enhancing our investment product mix with such services as Personal Broker and Prime Investment Advisor. Our PB clients are now able to take out mortgage loans from a bank of VTB Group's European sub-holding company operating in France.

#### MASS AFFLUENT BANKING

VTB24 continued actively targeting premium banking customers. We issued more than 200,000 Privilege packages over the year, with 60% clients serviced for free as holding sufficient capital with the Bank.

In late 2015, we launched a special offer for payroll customers: customers who demonstrate a certain level of income may be offered a Black Edition Signature card as a payroll card. With this product, customers get a full Privilege package which includes a dedicated relationship manager, preference terms for services offered by VTB24 and a wide range of options.

**PYTHAGOREAN TETRACTYS** 10 POINTS IN A PYRAMID

Pythagoreans considered 10 (a decade) to be the great number of all things, the archetype of the Universe. The Pythagorean Theorem is a theorem of geometry: the square of the hypotenuse of a right triangle is equal to the sum of the squares of the legs.

The tetractys has a heterogeneous field structure capable of harmonising and aligning frequency characteristics of objects that surround you, and restoring your aura.

#### OFFICES

As the end of 2015, VTB24's network comprised 1,046 offices in 354 cities and towns across 72 Russian regions. During the reporting year, the Bank opened 60 new sales offices.

In 2015, VTB24 focused on developing its mass affluent banking (MAB) infrastructure. 43 out of 60 offices now feature dedicated MAB areas. A total of 70 of such areas were set up under our network optimisation programmes.

As a result, the share of offices with dedicated MAB areas exceeded 50% of the total sales network. As at the end of 2015, the network included 531 offices with MAB areas, including 26 specialised outlets. MAB staff grew 30% from 2.1 thousand to 2.7 thousand employees.

Over the reporting year, four new offices were added to the Private Banking network: in Moscow, Tula, Izhevsk, and Kemerovo. The sales network now includes a total of 24 Private Banking offices.

During the year, the Bank implemented a programme to shut down poorly performing sub-standard offices and closed a total of 80 sales offices.

#### **REMOTE RETAIL BANKING**

The number of active customers of VTB24-Online rose 2.3 times (to 861 thousand), while the total number of subscribers grew by 1.7 million to 3.9 million customers.

The number of transactions via the mobile bank grew 2.8 times to 9.8 million transactions, or 35% more than the total number of transactions made via VTB24-Online. In 2015, the number of mobile bank users grew 2.2 times.

The total number of text alert service users rose 89% to 5.4 million (including 2.7 million payroll customers using the service as part of the Payroll package free of charge). The number of clients using the paid text service packages grew more than twofold to 2.7 million.

In 2015, VTB24 particularly focused on sales and functionality of banking products and services, while enhancing security and improving customer service quality, design and ergonomics.

#### WE HAVE IMPLEMENTED A NUMBER OF PROJECTS IN THE FOLLOWING AREAS:

VTB24

Enhanced functionality and sales of banking products, services and options:

introduced online opening and management option for the new line of deposit products, including deposit accounts offered in the Privilege service package;

o introduced an application form for users of VTB24-Online to apply for credit cards online;

o expanded the range of utility bill payments available in the cities and towns where VTB24 operates through the integration with a payment aggregator, Gorod Federal System;

o introduced online purchases of international travel insurance policies (VTB Insurance) with a 10% discount; and

o launched P2P transfers using the card number and unique customer identifier (as an alternative to account number transfers to VTB24 customers).

#### Enhanced security framework:

o implemented o launched a fr

Enhanced customer service:

Improved design and ergonomics:

o implemented a remote password recovery option that does not require a client to visit the Bank's office.

shut down Telebank 1.0 and Mobile Bank 1.0, migrating from Telebank 2.0 to Telebank 3.0. As a result, Telebank 3.0 is now the only version used;

o took steps to enhance channel stability and accessibility, including optimised user interfaces of the online and mobile banks;

o added a new My Finance widget to the online bank interface, enabling a client to view a summary of their finances.

refined templates for SMS short codes;

o implemented and piloted Software Token, a new technology; and

o launched a fraud prevention system covering all sales channels used by VTB24-Online.

added a new service, Robot P24 virtual assistant serving as an interactive Q&A wizard;

A NUMBER OF MOBILE **BANK DEVELOPMENT** INITIATIVES WERE IMPLEMENTED DURING 2015:

PLANS FOR 2016

MOBILE BANK IMPROVEMENT INITIATIVES PLANNED FOR 2016 INCLUDE:

launched new mobile apps for Windows Phone and Android smartphones, and Android tablets;

added new functionality: launched a card-to-card payment service; introduced QR code payments for Android; added the VTB24 Card Discount service (information about partners which offer discounts to customers paying with a VTB24 card); implemented fingerprint login for iPhones and iPads; and launched a savings account management option. We have also introduced PUSH codes to confirm transactions in VTB24-Online as an alternative to text messages.

For 2016, we plan a number of initiatives to enhance the online bank's stability and performance. VTB24 also intends to add a number of new service options such as savings account opening and automatic payment of mobile bills.

mobile app redesign;

QR money transfers for iOS;

savings account opening;

simplified procedure for mobile app login using short PIN;

review of limits on transfers between accounts; and

fingerprint login for Android mobile apps.

- In 2015, 850 new terminals were added to our self-service network, taking their total number to over 10.9 thousand as at 1 January 2016. The share of terminals with a cash deposit option grew 6 p.p. to 36%.
- Cash withdrawals rose 19% to RUB 2.3 trillion, and cash deposits to card-linked accounts grew 17% to RUB 493 billion.
- Accessibility of self-service terminals (percentage of time when terminals were operationally available) reached 96.4% in 2015
- We have upgraded the external design and interface of our selfservice terminals to make them more attractive.
- In 2016, the Bank is planning to expand its network of self-service terminals by more than 1,650 units, focusing mostly on terminals with cash deposit and withdrawal functionality, two thirds of which are hightech cash recycling systems, and on new specialised cashless payment and transfer terminals offering enhanced user experience.

launched an online office workload monitoring system; and

fully launched a multi-purpose platform for online customer applications on its website. This service has been highly acclaimed by the professional community: Markswebb Rank & Report ranked VTB24 among the TOP-3 banks for ease of submitting online applications for cash loans via the bank's website.

THE BANK'S

**RISKS**:

MANAGEMENT

PRIMARILY FOCUSES ON

THE FOLLOWING KEY

Risk Management

#### credit risk;

market risk (including equity risk, currency risk, and interest rate risk); liquidity risk;

operational risk;

reputational risk;

strategic risk; and

legal risk.

The risk management system in place at VTB24 follows the recommendations of the Basel Committee on Banking Supervision.

When developing our business processes we seek to identify sources of all types of risk and their concentrations, establish acceptable risk levels, and design risk mitigants and controls.

The Bank's key units responsible for credit, financial and operational risk management include the Risk Analysis Department (RAD) and the Credit Risk Underwriting and Control Department (CRUCD), which enables better responses to business strategy challenges and stronger performance in a weaker retail lending market. The RAD's focus is on analytical risk management, while the CRUCD is focused on operational risk management.

#### **CREDIT RISK**

In credit risk management, VTB24 adheres to conservative approaches, and uses methods and procedures that are in line with regulatory requirements.

The Bank employs customised risk assessment methods based on the customer profile, industry, and loan purpose.

This approach enables sound risk management, prompt adjustments of the loan portfolio structures and proactive management decisions to dilute the overall banking risks.

To mitigate potential loss risks VTB24 conducts comprehensive assessments of borrowers and proposed property collateral, including:

VTB24

analysis of a borrower's financial position and credit history (including credit histories with, and obligations to, other banks as per the data obtained from credit bureaus);

checks of all legal documents submitted by the borrower to make sure they comply with applicable regulatory requirements.

To mitigate credit risk we have drafted internal documents setting out the transaction limit structure and transaction limit setting procedure. The RAD employees monitor our counterparty banks on a monthly basis.

The credit limits determining the acceptable risk level for a specific borrower are calculated based on the borrower's financial position and their scoring process results, subject to the borrower's existing obligations. The use of the score-based limit and score-based pricing options in making lending decisions enables us to optimise the risk profile of our loan portfolio and offer bigger loans at lower rates to borrowers with low risks of default.

A well-developed system of limits is another tool we use to enhance our credit risk management process. The limit-setting process restricts the Bank's exposure to specific segments to prevent excessive concentrations of risk. This process includes:

size limits per product and portfolio; maturity limits; interest rate limits; authority limits; concentration limits per specific industry and region; and structural limits (per product, per counterparty/third party).

application and behavioural scoring;

deal structuring and evaluation of loan purpose;

evaluation of the quality of proposed collateral; and

Our credit risk management

monitoring which includes the procedures listed below:

comprises ongoing loan portfolio

Credit risks are also minimised through insurance, use of various collateral and suretyship formats, and through the loan portfolio diversification by product type and industry.

The Bank's units also monitor collateral value, liquidity and integrity, and design requirements to loan collateral.

The multi-tier lending decision-making framework in place at VTB24 is diversified based on risk level and includes a number of competence levels (collective, joint, and individual), which enables better lending decisions.

risk-level monitoring of the Bank's individual projects and entire portfolios to take preventive measures in case any negative trends are identified:

monitoring of country, regional, industry and other concentrations of the Bank's credit exposures and other major credit risks.

VTB24 has implemented revised procedures for monitoring overdue retail loans to promptly identify fraudulent schemes, and overdue mortgage loans to more promptly identify concentrations of potentially non-performing debt by group of mortgage products.

Provisions are another metric used to assess portfolio quality. We use two approaches to risk level assessment and provisioning: portfoliolevel and loan-level.

Loan-level approach: each loan is assessed and provisioned for on a case-by-case basis. The loan-level approach to risk assessment is driven by economic considerations and used for large loans and loans that show individual signs of impairment. The provision percentage for specific risk category is determined by the Bank's internal documents subject to requirements of the Bank of Russia.

Portfolio-level approach: the level of risk is assessed for the overall portfolio based on accumulated statistics and performance of overdue debt, and other risk factors without looking into individual loans. This approach assumes that individual loans in the assessed portfolio are homogeneous and each specific loan does not carry the risk of impairment, but the entire portfolio can be impaired. The provision percentage for each specific risk category is determined by the Bank's internal documents subject to regulatory requirements.

MARKET RISK

VTB24

VTB24 manages market risk by regularly assessing potential losses from adverse changes in the market environment, and setting the relevant price floors and requirements to security deposits and collateral. The Bank's market risk management policy is determined by the Assets and Liabilities Management (ALM) Committee.

Our risk management is focused on limiting and reducing potential losses from open positions that may result from adverse changes in exchange rates or stock performance. The Bank monitors compliance with market risk position limits both in real time and on a regular (daily and weekly) basis.

INTEREST RISK

To assess interest risk we analyse interest rate positions and calculate potential changes in the net present value (NPV) of interest-bearing assets/liabilities and net interest income (NII) in adverse interest rate change scenarios.

Reports on the structure of VTB24's open interest rate positions are prepared on a quarterly basis to analyse potential risks associated with interest rate positions. The reports present data broken down by currency and detail average weighted interest rates on investments and borrowings broken down by financial instrument and maturity as of the reporting date.

date.

date).

time interval.

Our interest rate risk stems from open positions in assets and liabilities with interest rate exposure. Interest rate positions are calculated based on transactions that feature details required to calculate payment flows and indicate the transaction amount and payment

Transactions are included in the report on open interest rate positions subject to relevant interest rate revision dates. Floating rate transactions are included in the report if they feature rate revision parameters (revision frequency; revision index and next revision

Interest rate positions are calculated by currency, basic segment (business segment), interest-bearing instrument, transaction type and Risk Management

Interest rate positions do not include balance sheet items that are not interest-bearing, as well as the following interest bearing instruments: instruments which are at least 50% provisioned for under applicable regulations of the Bank of Russia;

overdue debt;

loan loss provisions; and

other transactions that do not affect the Bank's interest rate risk.

#### CURRENCY RISK

Currency risk is analysed by the Risk Analysis Department. The RAD's reports on the currency risk level are examined by the ALM Committee on a regular basis as part of a wider market risk assessment. These reports drive the ALM Committee's decision-making on currency risk management.

The Bank's open currency position (OCP) is projected and calculated on a daily basis in line with the Bank of Russia's guidelines. The OCP is adjusted via FX transactions on exchanges and in the OTC market. VTB24 has in place an internal system of limits and restrictions on financial market operations, including on FX transactions, to mitigate currency risks.

We regularly match the sizes of the Bank's FX claims and liabilities (FX GAP analysis) across major currencies, broken down by claim and liability maturity subject to planned transactions as reflected in the business plan. LIQUIDITY RISK

VTB24

To manage its liquidity the Bank assesses the current and projected liquidity position on a daily basis, including versus the Bank of Russia's regulatory ratios. We analyse potential liquidity gaps on an ongoing basis by assessing the balance of resources subject to planned transactions in the approved business plan. The balance of resources also includes the currency component to assess currency risk concentrations.

The ALM Committee reviews reports on the current and projected liquidity level and liquidity ratio projections, which inform decisionmaking on medium- and long-term liquidity management.

Under the approved methodology for stress testing of liquidity risk, the Bank's Treasury conducts liquidity risk stress tests on a quarterly basis in a number of test environments (crisis scenarios) / time horizons and submits the results to the ALM Committee for consideration. Stress testing parameters are reviewed at least annually.

The Treasury provides day-to-day liquidity management by managing balances on correspondent accounts of the parent bank and branches, by raising and investing funds in the financial markets, and through trading in the securities market. To cover the gap between current assets and liabilities the Bank forms a pool of the most liquid securities, the treasury portfolio, using the approved treasury portfolio sizing methodology.

Thus, the liquidity management system in place at VTB24 enables proper assessments of incoming and outgoing cash flows, with account for asset and liability duration, and timely decisions to compensate for any shortage of liquid assets as it may arise. By regularly calculating and maintaining a certain percentage of liquid assets we ensure that we are capable of meeting all our obligations to customers and counterparties on time under any scenario.

60

Risk Management

#### **REPUTATIONAL RISK**

VTB24

#### STRATEGIC RISK

When building and approving its strategy under the strategic planning methodologies designed by VTB24, the Bank applies various macroeconomic scenarios and their impacts on financial markets, and prepares scenarios of its response to potential threats. The strategic plan itself is regularly adjusted to keep it up to date with actual data. VTB24 considers the above set of procedures sufficient to bring strategic risk down to acceptable levels.

LEGAL RISK

We use a range of legal risk mitigants to reduce (or prevent) potential losses. Among other things, we standardise our banking operations and other transactions; the Bank's non-standardised transactions are approved by the Legal Department; we also monitor legislative changes and promptly amend our constituent and internal documents accordingly; we monitor compliance of our banking and other transaction documents with Russian laws, and recruit highly skilled personnel.

To mitigate the risk of non-compliance by counterparties with regulations or terms of existing agreements VTB24 uses such tools as counterparty due diligence, mandatory third-party liability insurance and collaterals to secure contractual obligations.

General operational risk mitigants include:

The operational risk management framework in place at the Bank helps to identify potentially risky areas, develop loss assessment and minimisation procedures, design and evaluate controls, and flexibly respond to material business expansion.

dividing and limiting transaction execution and approval authority among the Bank's employees and units;

differentiating access rights and monitoring employees' access to the Bank's corporate information and tangible assets;

enhancing operating processes and developing banking technology automation and information security systems;

maintaining accessibility of the Bank's systems at a level required for full-scale operation of internal processes and customer services; and

ensuring backup and recovery of the Bank's operations in emergency or other potential situations that are difficult to predict and could result in material financial losses or have other consequences preventing the Bank from meeting its obligations, by developing and testing business continuity and recovery plans.

The Bank may additionally decide to mitigate certain risk types through insurance.

Operational risk affects the capital adequacy ratios and as such is calculated in line with the Bank of Russia's Regulation No. 346-P On the Procedure for Calculating the Amount of Operational Risk dated 3 November 2009.

To mitigate our reputational risk we: timely and efficiently discharge our obligations to customers and partners; strictly comply with laws and standards of business ethics; ensure accountability and responsibility of our executives and employees; comply with the decision-making procedure for operations and transactions within approved competence; exercise internal control over our operations and transactions; have in place an information support system that prevents the use of information for private gain; promptly examine and analyse media reports on VTB24 for completeness, reliability and impartiality and promptly respond to them.

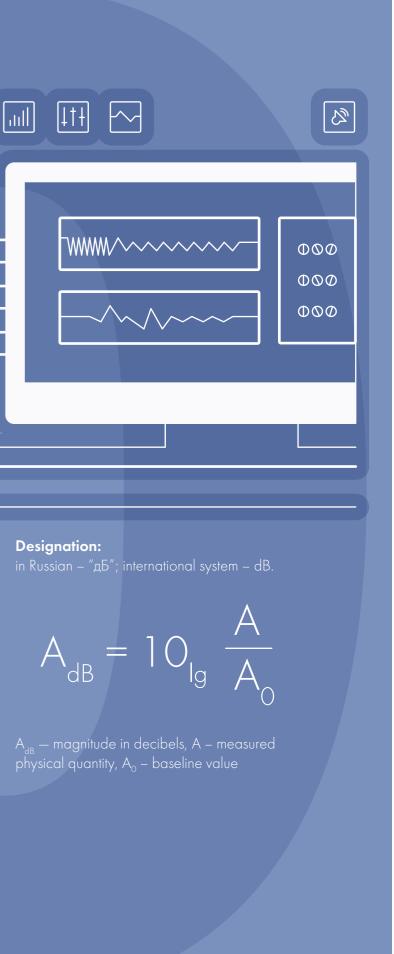

#### 5 REDUCING NON-PERFORMING LOANS

WWW

**DECIBEL** One tenth of one BEI

Decibel is one tenth (deci-) of the bel, a less frequently used unit named in honour of Alexander Graham Bell.

Alexander Graham Bell fundamentally transformed our understanding of sound transmission and perception; so his name was given to a concept, a logarithmic unit used to express the ratio between values of a physical quantity like "energy" (power, energy, power flux density, etc.) or "power" (current, voltage, etc.).

We have in place a strong collections unit and make consistent efforts to enhance its performance. In 2015, we made further progress in this area.

VTB24 has overhauled its employee motivation and compensation system. In particular, we have revised our previously used approach, which is widely spread in the market and places the emphasis on growing non-performing debt collection volumes. Instead, the Bank is now focusing on the amount of provisions that are dissolved as overdue debt is collected.

Importantly, the reform also provides for putting in place a more aggressive motivation system of remote collections: a rating model where all local employees are divided into several groups. Members of the team with the highest score are paid the maximum bonus, while the lowest score team gets no bonuses.

Additionally, in the reporting year, VTB24 set up a new remote collections platform in Cheboksary, where a number of FTEs were relocated, significantly reducing our staff costs.

In 2015, our Mobile Collection project entered the home stretch. The project primarily seeks to enhance employee productivity. Employees of collection units are no longer "attached" to their offices and can get the required information on the debt and customer while in the field. In addition to improved mobility, the initiative also enables better performance quality control.

In the reporting year, VTB24 continued to refining its intelligent decision-making systems dealing with non-performing loans. We put in place and fine-tuned new scoring and behavioural models. They analyse a client's credit history to assess the likelihood of debt repayment by the client under various collection strategy scenarios.

In recent years, the Bank has been consistently enhancing its line of restructuring product offering. We have currently in place programmes that cater for all categories of those customers who see restructuring as a solution to a weaker solvency. E.g. in 2015, we put in place a new programme for prompt payers to prevent their credit default in time.

The Bank places a particular emphasis on alleviating the plight of FX mortgage borrowers. We have designed special solutions to support them, including conversion of their debt into roubles, and transfer of the mortgaged property to the Bank as compensation, with an option of subsequent rent and buyback on preferential terms.

# **BORROWERS**

#### 6 INFORMATION TECHNOLOGY

RUSSIAN LANGUAGE

"I,  $\overline{i}$ ", or dotted i (used later with one dot – i), is a letter in a number of Cyrillic alphabets. It was in use in the Russian language until the Russian orthography reform of 1917–1918 (when it was replaced with "I").

The letter represented number ten both in the Cyrillic numeral system and in the Greek alphabet; therefore, it was commonly referred to as "decimal I" to differentiate it from "octal I", or "I (ižei)", meaning "and"

It was used before vowels and before "й", short I or Yot ("исторія", "pyccкій", "Iepycaлимъ" – history, Russian, Jerusalem); in the word "міръ" for "World", "society" to differentiate it from the word "миръ" meaning "peace"; except at the end of a morpheme in compound words, where "и" was used: "пятиугольникъ", "наиужасный" – "pentagon", "most horrible". At the beginning of words and between vowels, "I" was sometimes pronounced as the consonant "й" – "ioдъ" "маiopъ" – "Iodine", "major". іодъ ("lodine")

In 2015, we fully launched our Oracle Siebel-based VTB24 Front solution, and rolled out the system across the Bank. This Integrated Frontal Solution (IFS) covers the entire retail network of VTB24 and is integrated with the data storage, CRM, MDM and telephony systems of the Call Centre. The architecture of this solution implemented by the Bank provides a unique example for the Russian market in terms of the platforms used and data volumes processed. The system processes thousands of applications and handles tens of thousands of customers on a daily basis, while accounting for 99% of all cash loans issued by the Bank.

With the introduction of this enterprise integration platform bringing together over forty IT systems, the Bank's infrastructure has moved to a fundamentally new level of connectivity. As a result, over 13,000 employees of VTB24 working in IFS are now able to deliver a game-changing customer relationship experience, with all customer data collected and unified in a centralised MDM system.

In the reporting year, we launched a new 1.6 MW data centre, measuring 480 sq m overall and designed to accommodate over 90 high-load racks of various sizes. The data centre meets such international standards as TIA-942 and TIER III, while its fault tolerance is 99.982%.

We have built integrated LAN and SAN infrastructure covering all our data centres and also designed and put in place a detailed migration plan providing for uninterrupted operation of our data centres. The core of our Structured Cabling System (SCS) is based on the high-density Central Cross-Connect solution using Huber&Suhner hardware. As a result, the switch cabinets require six times less place than before.

We have also designed and put in place a framework of engineering subsystems to support data centre operations, while all data centre equipment has been connected to a dispatch control system to analyse equipment status readings via an integrated graphic interface and promptly redistribute the load.

Additionally, we have launched a new terminal network control system to streamline our document flow and reduce the lead times to finalise installation sites, register and organise communications channels, and make comprehensive ATM maintenance arrangements. With this solution, we have migrated data from more than 11,000 ATMs to the new system and drastically improved their lifecycle support. The SAP ERP-based budgeting solution rolled out in VTB24 is seamlessly integrated into the overall management system of the Bank, which is also SAP-based. As part of the solution development project, we have automated our planning of opex, G&A and staff costs, and drafting of consolidated cost estimates, IFRS cost estimates, and cost estimates in the parent bank's formats.

We have also put in place a DocVision-based electronic financial document management solution to manage approval of business contracts, contract applications, invoices, and adjustments to budget items.

# 7 HR POLICY

- 7.1 УПРАВЛЕНИЕ ПЕРСОНАЛОМ
- 7.2 КОРПОРАТИВНЫЕ КОММУНИ КАЦИИ

**TECHNE** 10<sup>TH</sup> MUSE – THE MUSE OF CINEMA

There were nine muses in Greek mythology. The 10th muse, Techne, is the muse of cinema.

The ancient Greek poet Hesiod in his poem The Theogony gave the first surviving account of their names: Calliope (epic poetry), Clio (history), Melpomene (tragedy), Thalia (comedy), Polyhymnia (sacred hymns), Terpsichore (dance), Euterpe (lyric poetry), Erato (love and wedding poetry), Urania (astronomy).

People use the phrase the "Tenth Muse" to describe an area of art which is mostly recent and not covered by the canonical list of muses – in the 18th century it was literary criticism, in the mid-19th century in Germany, it was variety theatre; and nowadays, it can mean cinema, radio, TV, etc.

## HR MANAGEMENT

In the reporting year, we put

consistent effort into fostering our talent pool for the retail network and reducing employee churn:

In 2015, we reviewed the progress on the implementation of our HR strategy for 2013–2016 to assess its interim results. We are happy with the performance across the planned initiatives and against the key targets. The Bank was recognised as the best Russian employer in the ranking compiled jointly by HeadHunter web-portal and the Kommersant Publishing House, and as the top entry level employer in the financial services sector by Future Today. We also won, as part of VTB Group, the Randstad Award as the most attractive employer in the Russian financial services sector

strengthened the team of managers at regional operating offices and directors of Moscow network offices;

launched an assessment centre to improve recruitment of frontline personnel;

updated our basic training programs for frontline personnel to improve training and onboarding processes; and

launched the Career Paths programme for our network staff.

These efforts reduced our overall network employee churn rate down to 20.8% in 2015, with a substantially lower employee churn rate across the Moscow network (down to 17.6%).

In the reporting year, VTB24 ran a scheduled rightsizing initiative as part of our efforts to complete the transformation of ex-Transcredibank's offices, enhance the operational efficiency across our sales network, and adjust to the market environment.

As of 31 December 2015, our headcount was 39.919 employees, or about 5% down year-on-year.

We officially launched our customer service centre in Cheboksary on 28 May 2015. The centre accommodates units of the Customer Service Department, NPL Department, Due Diligence Service, and Operations Department. Over the year, its headcount grew more than fivefold from 159 to 866 employees. All employees went through assessment centres and were trained under the Bank's standards.

### PERSONNEL DEVELOPMENT

VTB24

During the reporting year, we kept implementing large-scale training and development programmes for our personnel: completed all training modules under the Corporate MBA programme for the Bank's talent pool, while the programme participants prepared and defended their graduation projects;

trained top managers under the Motivational Leadership programme, with one of the programme modules dedicated to leadership in a challenging economic environment;

ran a series of master classes by Management Board members for managers of the Head Office and a master class for regional managers hosted by the President and Chairman of VTB24's Management Board;

and

ran integrated training programs for new employees and managers, and Olympic Sales and Efficient Communications or Getting Along with Your Customer programmes for our frontline staff.

Throughout 2015, we designed or updated 179 training programmes, including online courses. The total training time for all staff of the Bank exceeded two million training hours.

# COOPERATION WITH UNIVERSITIES AND **STUDENTS**

Our Generation 24 programme saw its first graduates in 2015. The programme is aimed at picking the best graduates of economics universities for internships at VTB24's units.

Our Regional Operating Office Rostovsky hosted Your Great Advantage, a contest of student papers on retail banking business.

added a Call Centre section and product modules to Career Paths;

We also signed cooperation agreements with the International College of Economics and Finance of the Higher School of Economics and the Russian State Social University.

VTB24

#### **REMUNERATION AND** SOCIAL PROGRAMMES

In 2015, the Bank benchmarked its bonus system against Russian and international best practices. For this exercise, we engaged PricewaterhouseCoopers as independent experts. The benchmarking exercise showed that the bonus system used in VTB24 is in line with best practices.

During the reporting year, we continued our efforts to improve our motivation and compensation system in the context of changes in the Bank's business priorities. The Bank has updated the list of its key performance indicators to which staff bonuses are linked.

Our customer service centres in Barnaul and Cheboksary opened first-aid stations.

# CORPORATE COMMUNICATIONS

In 2015, VTB24 marked its tenth anniversary and held several corporate events to celebrate it.

Employees with a ten-year service record with the Bank were given various awards. A number of presents were given to 1,840 employees across Russia: a letter of gratitude signed by Mikhail Zadornov; a commemorative medal; a book entitled We Are Ten. Let's Grow Together! on the history of the Bank, its employees, customers, Russia and the world over the last ten years; and a CD with songs about VTB24 performed by winners of the corporate contest Songs about the Bank.

The Bank's anniversary was celebrated in all regional operating offices. VTB24's anniversary celebrations in Kuskovo Estate gave start to a series of events held across 69 units of the Bank in all federal districts of Russia. Regional branches picked up the concept of celebratory events held in Moscow (themed "VTB24 City") and took it further: e.g. Yekaterinburg became the "City of Sports", while a theme chosen for Krasnodar by the local office was the "City of Creativity".

In 2015, VTB24 ran a third My Bank survey. The first two surveys took place in 2011 and 2013.

The survey primarily seeks to assess the current state of corporate culture and internal banking processes; relations between business units of VTB24; and its training, development, motivation and remuneration systems.

The survey results are thoroughly analysed by the Bank's top managers and personally by the President and Chairman of the Management Board. The results are used as an input for a change plan to improve communications and working conditions, and expand career growth opportunities both at the level of VTB24 on the whole, and at the level of each individual unit.

# 8 BANK AND SOCIETY

8.1 TRANSPARENCY 8.2 SPONSORSHIP AND CHARITY

TOP 10 10 BEST RATED

TOP in English means "the highest rank, the best". A list of best-rated objects or things is commonly called "Top N" or "TOP N", where N is the number of objects in the list, typically divisible by 10. VTB Bank is ranked second in Russia's top 10 most trusted banks. It is also ranked second by assets. The state owns 60% of the Bank's shares, which is a guarantee of its reliability. The Bank's assets total RUB 13 trillion.

The Bank has over 20 subsidiary credit institutions. It is focused on corporate banking. The Bank's regional network comprises 23 branches and 108 units. The Bank is committed to supporting charitable causes and is active in sponsorship.

쇼

6

TRANSPARENCY

In the reporting year, the survey covered 22,587 employees (with the response rate across the Bank at 68.5%). Employee motivation has risen since the first survey: the share of highly loyal staff has grown to 26% (from 22% in 2013).

VTB24's press service is responsible for cooperation with the mass media in 72 Russian regions, promptly providing information to federal and regional media.

In 2015, our press service arranged over 170 events for regional and federal media, drafted over 850 press releases, conducted more than 200 interviews and participated in over 400 TV reports.

The Bank's press service initiated over 5,000 communications, while VTB24's experts and executives gave almost 3,000 comments to media.

In the reporting year, VTB24 was referenced in the media 13% more than a year before. The media index grew 17%, with the Bank ranking seventh in the media rating of Russian banks compiled by Medialogia. Mikhail Zadornov, President and Chairman of the Management Board, came third in the banker media rating for the year.

VTB24 has long become an example of transparency for the Russian market. The Bank's speakers are rightly considered among the most competent experts highly available to the media.

Andrey Bocharov, the Bank's Press Secretary for the Ural Federal District received an award from BankInformServis for strong involvement of VTB24 in the media landscape.

A five-time winner of the Best Bank PR Officers of Saint Petersburg contest, Ivan Makarov, VTB's Press Secretary for the Northwestern Federal District, was awarded the title of a Bank PR Master and became the chairman of the expert panel for the annual bank PR officer rating (based on an expert poll of journalists by TT Finance Publishing House). He was also elected Chairman of the Committee for Media Relations of the Association of Northwestern Banks.

#### SPONSORSHIP AND CHARITY

VTB24

Over many years, VTB24 has been contributing to social support and development by running charitable and sponsorship programmes and projects in culture, arts, healthcare, education and social security. These efforts are an integral part of the Bank`s business activities, as they ultimately contribute to sustainable economic development, higher quality of life and social support to local communities.

In 2015, VTB24 stayed true to its approach to charitable and sponsorship activities, which is driven by the principles of consistency, continuity, openness and transparency. We give priority to longstanding partners and beneficiaries who have been strongly contributing for many years to social development.

# SUPPORTING AND **PROMOTING CULTURE** AND ARTS

Our charitable activities include partnerships with multiple cultural institutions at federal and regional levels.

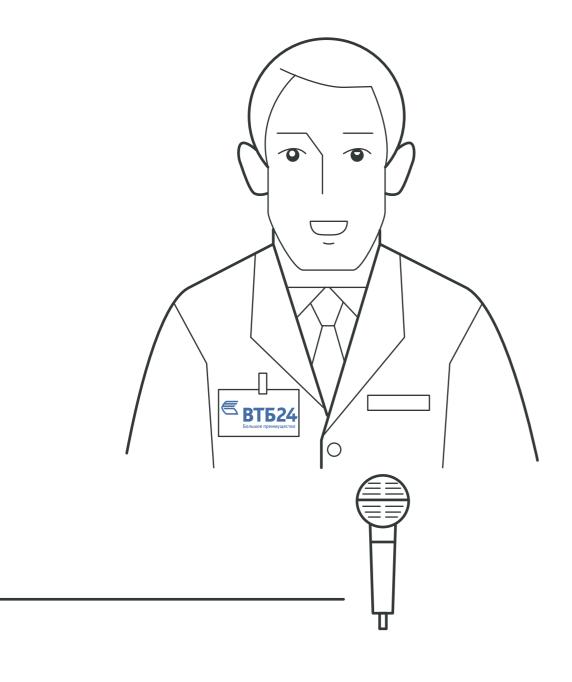

Since 2008, the Bank has supported Oleg Tabakov Theatre in Moscow, and since 2011, the Vakhtangov Theatre, including its regional tours.

of Literature.

In addition, since 2014 we have been supporting the International Usadba Jazz Festival and became an official partner of its regional programme in Voronezh, Yekaterinburg and Saint Petersburg.

In 2015, VTB24 acted as the general sponsor of Yuri Lyubimov Award, with the award ceremony taking place on 30 September, the birthday of the legendary theatre director, in the Vakhtangov Theatre. The Award was launched by the Lyubimov Charitable Foundation for Theatre Development not-for-profit organisation to mark the 100th birthday of the director which will be celebrated in 2017. The organisers are planning to make the Award an annual event.

In 2014, VTB24 acted as a partner in the guest house renovation project in the village of Mikhailovskoye for the State Museum-Reserve of A. S. Pushkin Mikhailovskoye. Due to the Bank's support, the Museum-Reserve was able to welcome guests and fans of the great Russian poet and author within its walls as early as in 2015, the Year

## SUPPORTING AND **PROMOTING EDUCATION**

Since 2008, VTB24 has maintained close relations with the National Research University Higher School of Economics (HSE). With the Bank's support as general sponsor, HSE has been holding the annual April International Academic Conference and running a scholarship programme within the Master Programme of HSE's International College of Economics and Finance and the London School of Economics and Political Science. The Bank helps 18 best students of the Programme to graduate every year from both Schools by financing their training costs.

In 2015, VTB24 continued its partnership relations with the International Laboratory of Quantitative Finance of HSE (currently closed). The Bank also supported the Centre for Labour Market Studies and the Laboratory for Studies in Economic Sociology of HSE. The cooperation between these units of the Higher School of Economics and VTB24 is focused on supporting fundamental research and contributing to validation and application of theoretical findings.

Since 2015, VTB24 has been supporting Gaidar Institute for Economic Policy. The Institute mainly focuses on economic research.

### VOIUNTEERING

We have been long supporting the volunteer movement, with the number of volunteers in the Bank growing with every passing year. Since 2013, we have been running a monthly volunteer project contest. According to the contest's rules, the winning projects are to be co-financed by the Bank and the volunteers.

In 2015, our employees took part in our long-standing corporate volunteering programme, the only such programme run in VTB Group on an ongoing basis. For many years, we have been implementing projects to support war veterans, disabled persons, and parentless children and holding useful master classes, arts contests, financial literacy trainings, volunteer clean-ups and other events. All these events are quite popular among our staff: in 2015, our employees collected over RUB 1 million, while the Bank provided over RUB 3 million for volunteer projects.

The Bank's employees participated in sports events organized by major charitable foundations. For example, the Bank continued its partnership with Downside Up foundation which supports families, government agencies and not-for-profit organisations in training, upbringing, and providing community inclusion for children with Down's syndrome. Our employees also took part in a charity bike ride and futsal tournament.

In late 2015, we held our second New Year charity fair, Good Deeds, where our employees could buy hand-made craftwork and New Year presents made by Downside Up's children and the foundation's staff, and the Bank's employees from across Russia. The money raised was also handed over to the foundation.

## SUPPORTING CHARITABLE **PROGRAMMES AND** PRODUCTS

VTB24 offers its customers to take part in charitable programmes. For instance, the Bank backs fund raising campaigns to support survivors and families of victims of disasters and emergencies by launching charge-free collection of donations via VTB24-Online, as well as our ATMs and offices. Information on our campaigns is available in the Bank's offices and on our website, and is sent out to our customers in information letters.

Additionally, users of VTB24-Online can access our special Charity section for information on charitable activities supported by the Bank or approach our partner foundations, and make an online donation. The same options are available via ATMs.

Under our Collection bonus programme, the Bank's customers can not only exchange their accumulated bonuses for presents, but also donate them to a charitable foundation they like in a relevant menu section.

#### Аудиторское заключение независимого аудитора

Наблюдательному совету и Акционерам Банка ВТБ 24 (публичное акционерное общество)

#### Заключение о годовой бухгалтерской (финансовой) отчетности

Мы провели аудит прилагаемой годовой бухгалтерской (финансовой) отчетности Банка ВТБ 24 (публичное акционерное общество) (далее - «Банк»), которая состоит из бухгалтерского баланса (публикуемая форма) по состоянию на 1 января 2016 г., отчета о финансовых результатах (публикуемая форма) за 2015 год и приложений к бухгалтерскому балансу и отчету о финансовых результатах в составе отчета об уровне достаточности капитала для покрытия рисков, величине резервов на возможные потери по ссудам и иным активам (публикуемая форма) по состоянию на 1 января 2016 г., сведений об обязательных нормативах и о показателе финансового рычага (публикуемая форма) по состоянию на 1 января 2016 г., отчета о движении денежных средств (публикуемая форма) по состоянию на 1 января 2016 г., а также пояснительной информации (пункты 2, 3, 4, 7, 8, 9, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35).

#### Ответственность аудируемого лица за годовую бухгалтерскую (финансовую) отчетность

Руководство Банка несет ответственность за составление и достоверность указанной годовой бухгалтерской (финансовой) отчетности в соответствии с установленными в Российской Федерации правилами составления годовой бухгалтерской (финансовой) отчетности и за систему внутреннего контроля, необходимую для составления годовой бухгалтерской (финансовой) отчетности, не содержащей существенных искажений вследствие недобросовестных действий или ошибок.

#### Ответственность аудитора

Наша ответственность заключается в выражении мнения о достоверности данной годовой бухгалтерской (финансовой) отчетности на основе проведенного нами аудита.

Мы провели аудит в соответствии с федеральными стандартами аудиторской деятельности, действующими в Российской Федерации, и международными стандартами аудита. Данные стандарты требуют соблюдения применимых этических норм, а также планирования и проведения аудита таким образом, чтобы получить достаточную уверенность в том, что годовая бухгалтерская (финансовая) отчетность не содержит существенных искажений.

Аудит включает в себя проведение аудиторских процедур, направленных на получение аудиторских доказательств, подтверждающих числовые показатели в годовой бухгалтерской (финансовой) отчетности и раскрытие в ней информации. Выбор аудиторских процедур является предметом суждения аудитора, которое основывается на оценке риска существенных искажений годовой бухгалтерской (финансовой) отчетности, допущенных вследствие недобросовестных действий или ошибок. В процессе оценки данного риска аудитор рассматривает систему внутреннего контроля, обеспечивающую составление и достоверность годовой бухгалтерской (финансовой) отчетности, с целью выбора соответствующих аудиторских процедур, но не с целью выражения мнения об эффективности системы внутреннего контроля. Аудит также включает в себя оценку надлежащего характера применяемой учетной политики и обоснованности оценочных показателей, полученных руководством, а также оценку представления годовой бухгалтерской (финансовой) отчетности в целом.

Мы полагаем, что полученные нами аудиторские доказательства представляют достаточные и надлежащие основания для выражения нашего мнения.

#### Мнение

По нашему мнению, годовая бухгалтерская (финансовая) отчетность отражает достоверно во всех существенных отношениях финансовое положение Банка ВТБ 24 (публичное акционерное общество) по состоянию на 1 января 2016 г., результаты его финансовохозяйственной деятельности и движение денежных средств за 2015 год в соответствии с установленными в Российской Федерации правилами составления бухгалтерской (финансовой) отчетности.

#### Прочие сведения

Прилагаемая годовая бухгалтерская (финансовая) отчетность не имеет своей целью представление финансового положения и результатов деятельности в соответствии с принципами или методами бухгалтерского учета, общепринятыми в странах и иных административно-территориальных образованиях, помимо Российской Федерации. Соответственно, прилагаемая годовая бухгалтерская (финансовая) отчетность не предназначена для лиц, не знакомых с принципами, процедурами и методами бухгалтерского учета, принятыми в Российской Федерации.

#### Отчет о результатах проверки в соответствии с требованиями статьи 42 Федерального закона от 2 декабря 1990 г. № 395-1 «О банках и банковской деятельности»

Руководство Банка несет ответственность за выполнение Банком обязательных нормативов, установленных Центральным Банком Российской Федерации (далее «Банком России»), а также за соответствие внутреннего контроля и организации систем управления рисками Банка требованиям, предъявляемым Банком России к таким системам.

В соответствии с требованиями статьи 42 Федерального закона от 2 декабря 1990 г. № 395-1 «О банках и банковской деятельности» (далее - Федеральный закон) в ходе аудита годовой бухгалтерской (финансовой) отчетности Банка за 2015 год мы провели проверку:

- 1) выполнения Банком по состоянию на 1 января 2016 г. обязательных нормативов, установленных Банком России;
- соответствия внутреннего контроля и организации систем управления рисками Банка 2) требованиям, предъявляемым Банком России к таким системам в части:
  - подчиненности подразделений управления рисками;
  - наличия у Банка утвержденных уполномоченными органами Банка методик . выявления значимых для Банка рисков, управления значимыми для Банка рисками, осуществления стресс-тестирования, наличия системы отчетности по значимым для Банка рискам и капиталу;
  - последовательности применения в Банке методик управления значимыми для . Банка рисками и оценки их эффективности;
  - осуществления Наблюдательным советом и исполнительными органами . управления Банка контроля соблюдения установленных внутренними документами Банка предельных значений рисков и достаточности собственных средств (капитала), эффективности применяемых в Банке процедур управления рисками и последовательности их применения.

Указанная проверка включала в себя такие выбранные на основе нашего суждения процедуры как запросы, анализ, изучение документов, сравнение утвержденных Банком требований, порядка и методик с требованиями, предъявляемыми Банком России, а также пересчет, сравнение и сверка числовых значений и иной информации.

Результаты проведенной нами проверки изложены ниже.

#### Выполнение Банком обязательных нормативов, установленных Банком России

Мы установили, что значения обязательных нормативов Банка по состоянию на 1 января 2016 г. находились в пределах лимитов, установленных Банком России.

Мы не проводили каких-либо процедур в отношении данных бухгалтерского учета Банка кроме процедур, которые мы сочли необходимыми для целей выражения мнения о достоверности годовой бухгалтерской (финансовой) отчетности Банка.

VTB24

#### Соответствие внутреннего контроля и организации систем управления рисками Банка требованиям, предъявляемым Банком России к таким системам

- России по состоянию на 31 декабря 2015 г. служба внутреннего аудита Банка подчинена и подотчетна Наблюдательному совету, а подразделения управления рисками Банка не были подчинены и не были подотчетны подразделениям, принимающим соответствующие риски.
- Мы установили, что внутренние документы Банка, действующие на 31 декабря 2015 г. и устанавливающие методики выявления значимых для Банка кредитных, рисками и осуществления стресс-тестирования утверждены уполномоченными Банка России. Мы также установили наличие в Банке по состоянию на 31 декабря 2015 г. системы отчетности по значимым для Банка кредитным, рыночным, операционным рискам и рискам потери ликвидности и собственным средствам (капиталу) Банка.
- Мы установили, что периодичность и последовательность отчетов, подготовленных течение 2015 года, в отношении вопросов управления кредитными, рыночными, операционными рисками и риском потери ликвидности Банка соответствовали рисками.
- Мы установили, что по состоянию на 31 декабря 2015 г. к полномочиям Наблюдательного совета и исполнительных органов управления Банка относился контроль за соблюдением Банком установленных внутренними документами Банка совет и исполнительные органы управления Банка на периодической основе службой внутреннего аудита.

Мы установили, что в соответствии с нормативными актами и рекомендациями Банка

рыночных, операционных рисков и рисков потери ликвидности, управления такими органами управления Банка в соответствии с нормативными актами и рекомендациями

подразделениями управления рисками Банка и службой внутреннего аудита Банка в внутренним документам Банка, и что указанные отчеты включали в себя наблюдения. сделанные подразделениями управления рисками и службой внутреннего аудита Банка, в отношении оценки эффективности соответствующих методик Банка по управлению

предельных значений рисков и достаточности собственных средств (капитала). С целью осуществления контроля эффективности применяемых в Банке процедур управления рисками и последовательности их применения в течение 2015 года Наблюдательный рассматривали отчеты, подготовленные подразделениями управления рисками Банка и
