Independent auditor's report

To the Shareholders and Supervisory Board of
Public Joint-Stock Company "Moscow Exchange MICEX-RTS"

Opinion

We have audited the consolidated financial statements of Public Joint-Stock Company "Moscow Exchange MICEX-RTS" and its subsidiaries (the Group), which comprise the consolidated statement of financial position as at 31 December 2016, and the consolidated income statement, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as at 31 December 2016 and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRSs).

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Group in accordance with the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code) together with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Russian Federation, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Revenue recognition

Revenue recognition was a key audit matter, since the amount of revenue is material to the consolidated financial statements. Information on revenue is disclosed in notes 5 and 6 to the consolidated financial statements. This process is closely related to the proper functioning of the Group's IT systems, as the most significant portion of revenue is recognized on the basis of automated data processing, and these systems may experience failures or errors.

We tested general controls in the systems involved in revenue recognition, IT application and manual controls. We performed analytical procedures based on comparison of financial and non-financial data, and used automated tools to analyze relationships among various accounts in the consolidated financial statements.

Valuation of goodwill and other intangible assets

The valuation of goodwill and other intangible assets was a key audit matter, since the book value of goodwill and other intangible assets is material for the consolidated financial statements. Information on goodwill is disclosed in note 18 to the consolidated financial statements, and information on other intangible assets is disclosed in note 17. The valuation of goodwill and other intangible assets is a complex process, requiring management judgment to identify indicators of impairment.

We analyzed management judgment used in goodwill impairment testing as regards the allocation of goodwill to cash-generating units. We tested the calculation of the Group's market capitalization used to determine the Group's recoverable amount. We recalculated the amortization of other intangible assets and analyzed management judgment that there were no indicators of impairment of other intangible assets. We analyzed the disclosure of information about intangible assets in the consolidated financial statements.

Other information included in the Group's 2016 Annual report

Other information consists of the information included in the Annual report of the Public Joint-Stock Company "Moscow Exchange MICEX-RTS" other than the consolidated financial statements and our auditor's report thereon. Management is responsible for the other information. The Annual report is expected to be made available to us after the date of this auditor's report.

Our opinion on the consolidated financial statements does not cover the other information and we will not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information identified above when it becomes available and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Responsibilities of management and the Audit Commission of the Supervisory Board for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRSs, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative but to do so.

The Audit Commission of the Supervisory Board are responsible for overseeing the Group's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- ▶ Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- ▶ Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of Group's internal control.
- ▶ Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- ▶ Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- ▶ Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- ▶ Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Commission of the Supervisory Board regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Commission of the Supervisory Board with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the Audit Commission of the Supervisory Board, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The partner in charge of the audit resulting in this independent auditor's report is E.V. Zaichikova.

NSD is the central securities depository of the Russian Federation. NSD is the Russian national numbering agency and the substitute numbering agency for the Commonwealth of Independent States (CIS), authorized to assign the international ISIN, CFI and pre-LEI codes. NSD holds licenses for depository, clearing and settlement operations issued by the Central Bank of Russia (CBR). As of December 28, 2016 NSD Repository received the license for repository operations issued by the CBR.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

1. Organization (continued)

NCC performs functions of a clearing organization and central counterparty on the financial market. NCC has a license for clearing activities.

PFTS SE is a stock exchange, which had a stock exchange license in Ukraine and facilitates spot trading. In February 2016 the Group sold its stake in PFTS SE

MICEX Finance and MICEX Cyprus are established for facilitating financial activities of the Group.

LLC ME Technology provides technical support of exchange activities and IT services to Moscow Exchange clients.

MICEX SE provides services for Securities Market Sections of the Group. In December 2016 MICEX SE and LLC ME Technology merged with the parent company of the Group. The purpose is to optimize corporate structure, simplify customers' interactions with the Group and reduce costs.

ETS is a commodity exchange, which has a license for organisation of trading in commodities in Kazakhstan.

NAMEX is a commodity exchange operating in Russia.

Moscow Exchange and all subsidiaries are located in Russia, except for ETS and MICEX Cyprus. ETS is located in Kazakhstan and MICEX Cyprus is registered in Cyprus.

The Group has 1 635 employees as at December 31, 2016 (December 31, 2015: 1 599 employees).

2. Basis of Presentation

Statement of compliance

These Consolidated Financial Statements of the Group have been prepared in accordance with the International Financial Reporting Standards ("IFRS").

Basis of presentation

These Consolidated Financial Statements are presented in millions of Russian rubles, unless otherwise indicated. These Consolidated Financial Statements have been prepared on the historical cost basis except for certain financial assets and liabilities that are measured at fair value.

Moscow Exchange and its subsidiaries registered in the Russian Federation maintain their accounting records in accordance with Russian Accounting Standards ("RAS"). Foreign subsidiaries of the Group maintain their accounting records in accordance with the accounting standards of the countries in which they operate. These Consolidated Financial Statements have been prepared on basis of the statutory accounting records and have been adjusted to conform to IFRS.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

2. Basis of Presentation (continued)

Inflation accounting

The Russian economy was considered hyperinflationary until December 31, 2002. As such, the Group applied IAS 29 *Financial Reporting in Hyperinflationary Economies*. The effect of applying IAS 29 is that non-monetary items, including components of equity, were restated to the measuring units current at December 31, 2002 by applying the relevant inflation indices to the historical cost, and that these restated values were used as a basis for accounting in subsequent periods.

3. Significant Accounting Policies

Basis for consolidation

Subsidiaries are investees controlled by the Group. The Group controls an investee when it is exposed to, or has rights to, variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. In particular, the Group consolidates investees that it controls on the basis of de facto circumstances. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases. All intra-group transactions, balances and unrealised gains on transactions between group companies are eliminated in full; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Where necessary, accounting policies for subsidiaries have been changed to ensure consistency with the policies adopted by the Group.

A change in the ownership interest of a subsidiary, without a change of control, is accounted for as an equity transaction. Losses are attributed to the non-controlling interests even if that results in a deficit balance.

If the Group loses control over a subsidiary, it derecognises the assets (including goodwill) and liabilities of the subsidiary, the carrying amount of any non-controlling interests, the cumulative translation differences, recorded in equity; recognises the fair value of the consideration received, the fair value of any investment retained and any surplus or deficit in profit or loss and reclassifies the parent's share of components previously recognised in other comprehensive income to profit or loss.

Business combinations

Business combinations are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and the liabilities assumed. If, after reassessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interest in the acquiree and the fair value of the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

When a business combination is achieved in stages, the Group's previously held equity interest in the acquiree is remeasured to fair value at the acquisition date (i.e. the date when the Group obtains control) and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss where such treatment would be appropriate if that interest were disposed of.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Goodwill

Goodwill arising on an acquisition of a business is carried at cost as established at the date of acquisition of the business (see above) less accumulated impairment losses, if any.

For the purposes of impairment testing, goodwill is allocated to each of the Group's cash-generating units (or groups of cash-generating units) that is expected to benefit from the synergies of the combination.

A cash-generating unit to which goodwill has been allocated is tested for impairment at least annually, or more frequently when there is indication that the unit may be impaired. If the recoverable amount of the cash-generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised directly in profit or loss in the Consolidated Statement of Profit or Loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

On disposal of the relevant cash-generating unit, the attributable amount of goodwill is included in the determination of the profit or loss on disposal.

The Group's policy for goodwill arising on the acquisition of an associate is described below.

Investments in associates

Associates are entities in which the Group generally has between 20% and 50% of the voting rights, or is otherwise able to exercise significant influence, but which it does not control or jointly control. Investments in associates are accounted for under the equity method and are initially recognised at cost, including goodwill. Subsequent changes in the carrying value reflect the post-acquisition changes in the Group's share of net assets of the associate. The Group's share of its associates' profits or losses is recognised in profit or loss, and its share of movements in reserves is recognised in other comprehensive income. However, when the Group's share of losses in an associate equals or exceeds its interest in the associate, the Group does not recognise further losses, unless the Group is obliged to make further payments to, or on behalf of, the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates; unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

Recognition of revenue

Fee and Commission income

Fees and Commissions are recognized when services are provided.

Revenue for services provided over a period is recognized pro rata over the contractual term and consists of commission income on operations with long-term exchange instruments, listing fees, depositary fees, and other.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Recognition of interest income

Interest income is recognized on an accrual basis using the effective interest method. The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating the interest income over the relevant period.

The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the debt instrument, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Once a financial asset has been written down as a result of impairment, interest income is thereafter recognized using the rate of interest used to discount future cash flows for the purpose of measuring the impairment loss.

Interest earned on central counterparty financial assets is presented net of interest expense incurred in respect of the offsetting financial liabilities within gains or losses on financial assets carried at fair value.

Cash and cash equivalents

Cash and cash equivalents in the Consolidated Statement of Financial Position include cash on hand, unrestricted balances on correspondent and deposit accounts with banks with maturity up to one business day. Accrued interest on the above balances that is receivable in more than one business day is excluded from cash and cash equivalents the purpose of consolidated statement of cash flows. Amounts that are subject to restrictions on their availability, including minimum reserve deposits with the CBR, are not included in cash and cash equivalents.

Financial assets

The Group recognizes financial assets and liabilities in its Consolidated Statement of Financial Position when it becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets and liabilities are recognized using settlement date accounting.

Financial assets and financial liabilities are initially measured at fair value. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities (other than financial assets and financial liabilities at fair value through profit or loss) are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognized immediately in profit or loss.

Financial assets are classified into the following specified categories: financial assets "at fair value through profit or loss" (FVTPL), "held-to-maturity" investments (HTM), "available-for-sale" (AFS) financial assets and "loans and receivables". The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

Financial assets at fair value through profit or loss

Financial assets are classified as at FVTPL when the financial asset is held for trading.

A financial asset is classified as held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial assets that the Group manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not a designated and effective hedging instrument.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Financial assets (continued)

Financial assets at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognised in profit or loss. The net gain or loss recognised in profit or loss incorporates any dividend earned on the financial asset. Fair value is determined in the manner described in Note 27.

Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity. HTM investments are measured at amortised cost using the effective interest method less any impairment.

Loans and receivables

Loans and receivables that have fixed or determinable payments that are not quoted in an active market are classified as "loans and receivables". Loans and receivables are measured at amortised cost using the effective interest method, less any impairment. Interest income is recognised by applying the effective interest rate, except for short-term receivables when the recognition of interest would be immaterial.

Available-for-sale financial assets

Available-for-sale financial assets are those non-derivative financial assets that are designated as available-for-sale or are not classified in any of the three preceding categories. After initial recognition available-for-sale financial assets are measured at fair value with gains or losses being recognised in other comprehensive income until the investment is derecognised or until the investment is determined to be impaired at which time the cumulative gain or loss previously reported in other comprehensive income is reclassified to the Consolidated Statement of Profit or Loss. However, interest calculated using the effective interest method is recognised in profit or loss.

Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been negatively affected.

For financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as default or delinquency in interest or principal payments; or
- probability that the debtor will enter bankruptcy or financial reorganisation; or
- disappearance of an active market for that financial asset as a result of financial difficulties.

For financial assets carried at amortised cost, the amount of impairment loss recognised is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of loans, receivables and investments held-to-maturity, where the carrying amount is reduced through the use of an allowance account. When a loan or a receivable is considered uncollectible, it is written off against the allowance account.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Financial assets (continued)

Derecognition of financial assets

A financial asset (or, where applicable a part of the financial asset or part of a group of similar financial assets) is derecognized where:

- rights to receive cash flows from the asset have expired;
- the Group has transferred its rights to receive cash flows from the asset or retained the right to receive cash flows from the asset, but has assumed an obligation to pay them in full without material delay to a third party under a "pass-through" arrangement;
- the Group either (a) has transferred substantially all the risks and rewards of the asset, or (b) has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

After a transfer, the Group reassesses the extent to which it has retained the risks and rewards of ownership of the transferred asset.

If substantially all the risks and rewards have been neither retained nor transferred, the Group assesses whether or not it has retained control of the asset. If it has not retained control, the asset is derecognized. Where the Group retained control of the asset, it continues to recognise the asset to the extent of its continuing involvement.

Offsetting of financial assets

Financial assets and financial liabilities are offset and the net amount is reported in the Consolidated Statement of Financial Position only when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liability simultaneously. The right of set-off must not be contingent on a future event and must be legally enforceable in all of the following circumstances:

- the normal course of business;
- the event of default; and
- the event of insolvency or bankruptcy of the entity and all of the counterparties.

Central counterparty financial assets and liabilities

NCC acts as a central counterparty (CCP) and guarantees settlements of certain exchange transactions. Receivables and payables on such deals that may be offset against a clearing member are reported net in accordance with IAS 32 and are recognized in the Consolidated Statement of Financial Position at the net fair value based on daily settlement prices.

Sales and purchases of securities and currency via the CCP are recognised and simultaneously derecognised at the settlement date.

For the products that are marked to market the Group recognises gains and losses on open positions of clearing members on each exchange day. The variation margin is used to settle gains and losses on open positions resulting from market price fluctuations on a daily basis. The variation margin does not comprise collateral as it is a daily offsetting of gains and losses in cash. Products that are marked to market are therefore not reported in the Consolidated Statement of Financial Position.

Receivables under repurchase transactions (repo) are classified as loans and receivables and carried at amortised cost. Payables under repo are carried at amortised cost.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Collateral of central counterparty

As the Group guarantees the settlement of certain traded contracts, it has established a multi-level collateral system. The central pillar of the collateral system is the daily determination of the overall risk per clearing member (margin) to be covered by cash and securities collateral.

Securities collateral is not derecognised by the clearing member providing the collateral. As the transfer of securities does not meet the conditions for derecognition, the securities are not recognised as assets.

In addition to these daily collateral payments, market participants must make contributions to the risk-covering fund which is described in Note 20.

Financial liabilities and equity instruments issued

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the Group are recognised at the proceeds received, net of direct issue costs.

Repurchase of the Group's own equity instruments is recognized directly in equity. No gain or loss is recognized in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

Financial liabilities

Financial liabilities are classified as either financial liabilities "at FVTPL" or "other financial liabilities".

Financial liabilities at fair value through profit or loss

Financial liabilities classified as "at FVTPL" include CCP financial liabilities under currency transactions and certain derivatives.

Other financial liabilities

Other financial liabilities, including banks deposits and balances of market participants, loans payable, distributions payable to holders of securities and other liabilities, are initially measured at fair value, net of transaction costs, and are subsequently measured at amortised cost using the effective interest method, with interest expense recognised on an effective yield basis.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

Distributions payable to holders of securities comprise dividends and coupon amounts received by the Group from the issuers of securities on behalf of customers of the Group, for which the Group also provides depository services. The normal settlement period for distribution of dividends and coupon amounts to its customers is three days. Amounts of dividends and coupons payable to clients are stated at their contractual values.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Financial liabilities and equity instruments issued (continued)

Derecognition of financial liabilities

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of the financial liability derecognized and the consideration paid and payable is recognized in profit and loss.

Precious metals

Precious metals are represented by physical precious metals and accounts in precious metals. Precious metals are recorded on the reporting date at CBR prices, which approximate fair values. Corresponding accounts in precious metals are recorded within Due from financial institutions and physical precious metals are recorded within Other assets. Clients' accounts in precious metals are recorded within Balances of market participants. Precious metals are not financial instruments and therefore excluded from financial risk management disclosures in accordance with IFRS 7.

Property and equipment

Property and equipment is carried at historical cost less accumulated depreciation and any impairment losses.

Depreciation is recognised so as to write off the cost of assets (other than freehold land and properties under construction) less their residual values over their useful lives, using the straight-line method:

Buildings and other real estate	2%
Furniture and equipment	20-33%

Freehold land is not depreciated.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives at the annual rates of 10% - 25%. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Intangible assets acquired in a business combination

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately. Amortisation is recognised on a straight-line basis at the annual rate of 4%. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Internally developed intangible assets

Development costs that are directly associated with the production of identifiable and unique software products controlled by the Group are capitalised and an internally generated intangible asset is recognised only if it is probable that it will generate economic benefits exceeding costs beyond one year and the development costs can be measured reliably. An internally generated intangible asset is recognised only if the Group has the technical feasibility, resources and intention to complete the development and to use the product. Direct costs include software development employee costs and an appropriate portion of relevant overheads. Expenditure on research activities is recognised as an expense in the period in which it is incurred.

Subsequent expenditure on intangible assets is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates.

Derecognition of intangible assets

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Intangible assets (continued)

Impairment of tangible and intangible assets

At the end of each reporting period, the Group reviews the carrying amounts of its tangible and intangible assets to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss (if any). Where it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. Where a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating units, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment at least annually, and whenever there is an indication that the asset may be impaired.

Recoverable amount is the higher of fair value less costs to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. An impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the impairment loss is treated as a revaluation decrease.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or a cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or a cash-generating unit) in prior years. A reversal of an impairment loss is recognised immediately in profit or loss, unless the relevant asset is carried at a revalued amount, in which case the reversal of the impairment loss is treated as a revaluation increase.

Assets classified as held for sale

The Group classifies a non-current asset (or a disposal group) as held for sale if its carrying amount will be recovered principally through a sale transaction rather than through continuing use. For this to be the case, the non-current asset (or disposal group) must be available for immediate sale in its present condition subject only to terms that are usual and customary for sales of such assets (or disposal groups) and its sale must be highly probable.

The sale qualifies as highly probable if the Group's management is committed to a plan to sell the non-current asset (or disposal group) and an active program to locate a buyer and complete the plan must have been initiated. Further, the non-current asset (or disposal group) must have been actively marketed for a sale at price that is reasonable in relation to its current fair value and in addition the sale should be expected to qualify for recognition as a completed sale within one year from the date of classification of the non-current asset (or disposal group) as held for sale.

The Group measures an asset (or disposal group) classified as held for sale at the lower of its carrying amount and fair value less costs to sell. The Group recognises an impairment loss for any initial or subsequent write-down of the asset (or disposal group) to fair value less costs to sell if events or changes in circumstance indicate that their carrying amount may be impaired.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Taxation

Current income tax

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date in the countries where the Group operates and generates taxable income.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred tax

Deferred tax is provided using the liability method on temporary differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes at the reporting date.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- When the deferred tax liability arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss;
- In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Operating taxes

Countries where the Group operates also have various other taxes, which are assessed on the Group's activities. These taxes are included as a component of operating expenses in the Consolidated Statement of Profit or Loss.

Share-based payments

The Group grants the right to some employees to purchase equity instruments on the terms set in individual contracts.

The cost of equity-settled transactions is recognised, together with a corresponding increase in equity within Share-based payments reserve, over the period in which the performance and/or service conditions are fulfilled.

The cumulative expense recognised for equity-settled transactions at each reporting date until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The income statement expense or credit for a period represents the movement in cumulative expense recognised as at the beginning and end of that period (Note 10).

Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events, and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the amount of obligation can be made.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Contingencies

Contingent liabilities are not recognized in the Consolidated Statement of Financial Position but are disclosed unless the possibility of any outflow in settlement is remote. A contingent asset is not recognized in the Consolidated Statement of Financial Position but disclosed when an inflow of economic benefits is probable.

Fiduciary activities

The Group provides custodial services to its customers which include transactions with securities on their custody accounts. Assets accepted and liabilities incurred under the fiduciary activities are not included in the Group's Consolidated Financial Statements. The Group accepts the operational risk on these activities, but the Group's customers bear the credit and market risks associated with such operations. Revenue for provision of fiduciary services is recognized as services are provided.

Foreign currencies

In preparing the financial statements of each individual Group entity, transactions in currencies other than the entity's functional currency (foreign currencies) are recognised at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

For the purposes of presenting Consolidated Financial Statements, the assets and liabilities of the Group's foreign operations are translated into RUB using exchange rates prevailing at the end of each reporting period. Income and expense items are translated at the average exchange rates for the period, unless exchange rates fluctuate significantly during that period, in which case the exchange rates at the dates of the transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity (attributed to non-controlling interest as appropriate).

Goodwill and fair value adjustments on identifiable assets and liabilities acquired arising on the acquisition of a foreign operation are treated as assets and liabilities of the foreign operation and translated at the rate of exchange prevailing at the end of each reporting period. Exchange differences arising are recognised in other comprehensive income.

Earnings per share

The Group presents basic and diluted earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Group by the weighted average number of ordinary shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to ordinary shareholders and the weighted average number of ordinary shares outstanding for the effects of all dilutive potential ordinary shares.

Segment reporting

An operating segment is a component of a Group that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same Group); whose operating and financial results are regularly reviewed by the chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance, and for which discrete financial information is available. As at December 31, 2016 and December 31, 2015, the Group comprised a single operating segment.

3. Significant Accounting Policies (continued)

Adoption of new and revised standards

In the current period, the Group has adopted all of the new and revised Standards and Interpretations issued by the IASB and IFRIC of the IASB that are relevant to its operations and effective for reporting periods ending on December 31, 2016.

The adoption of these new and revised Standards and Interpretations has not resulted in significant changes to the Group's accounting policies that have affected the amounts reported for the current or prior years.

Amendments resulting from Improvements to IFRSs to the following standards did not have any impact on the accounting policies, financial position or performance of the Group:

Amendments to IAS 1 Disclosure Initiative

The amendments to IAS 1 clarify, rather than significantly change, existing IAS 1 requirements. The amendments clarify:

- The materiality requirements in IAS 1
- That specific line items in the statement(s) of profit or loss and OCI and the statement of financial position may be disaggregated
- That entities have flexibility as to the order in which they present the notes to financial statements
- That the share of OCI of associates and joint ventures accounted for using the equity method must be presented in aggregate as a single line item, and classified between those items that will or will not be subsequently reclassified to profit or loss

Furthermore, the amendments clarify the requirements that apply when additional subtotals are presented in the statement of financial position and the statement(s) of profit or loss and OCI. These amendments are effective for annual periods beginning on or after 1 January 2016. These amendments do not have any impact on the Group.

Amendments to IFRS 10, IFRS 12 and IAS 28 Investment Entities: Applying the Consolidation Exception

The amendments address issues that have arisen in applying the investment entities exception under IFRS 10 Consolidated Financial Statements. The amendments to IFRS 10 clarify that the exemption from presenting consolidated financial statements applies to a parent entity that is a subsidiary of an investment entity, when the investment entity measures all of its subsidiaries at fair value.

Furthermore, the amendments to IFRS 10 clarify that only a subsidiary of an investment entity that is not an investment entity itself and that provides support services to the investment entity is consolidated. All other subsidiaries of an investment entity are measured at fair value. The amendments to IAS 28 Investments in Associates and Joint Ventures allow the investor, when applying the equity method, to retain the fair value measurement applied by the investment entity associate or joint venture to its interests in subsidiaries.

These amendments must be applied retrospectively and are effective for annual periods beginning on or after 1 January 2016. These amendments do not have any impact on the Group as the Group does not apply the consolidation exception.

Annual improvements 2012-2014 Cycle

These improvements are effective for annual periods beginning on or after 1 January 2016. They include, in particular:

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

Adoption of new and revised standards (continued)

IFRS 5 Non-current Assets Held for Sale and Discontinued Operations

Assets (or disposal groups) are generally disposed of either through sale or distribution to owners. The amendment clarifies that changing from one of these disposal methods to the other would not be considered a new plan of disposal, rather it is a continuation of the original plan. There is, therefore, no interruption of the application of the requirements in IFRS 5. This amendment must be applied prospectively.

IFRS 7 Financial Instruments: Disclosures

The amendment clarifies that a servicing contract that includes a fee can constitute continuing involvement in a financial asset. An entity must assess the nature of the fee and the arrangement against the guidance for continuing involvement in IFRS 7 in order to assess whether the disclosures are required. The assessment of which servicing contracts constitute continuing involvement must be done retrospectively. However, the required disclosures would not need to be provided for any period beginning before the annual period in which the entity first applies the amendments.

New and revised IFRSs in issue but not yet effective

Standards issued but not yet effective up to the date of issuance of the Group's financial statements are listed below. This listing of standards and interpretations issued are those that the Group reasonably expects to have an impact on disclosures, financial position or performance when applied at a future date. The Group intends to adopt these standards when they become effective.

IFRS 9 Financial Instruments

In July 2014, the IASB issued the final version of IFRS 9 Financial Instruments which reflects all phases of the financial instruments project and replaces IAS 39 Financial Instruments: Recognition and Measurement and all previous versions of IFRS 9. The standard introduces new requirements for classification and measurement, impairment, and hedge accounting.

From a classification and measurement perspective, the new standard will require all financial assets, except equity instruments and derivatives, to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The IAS 39 measurement categories will be replaced by: fair value through profit or loss (FVPL), fair value through other comprehensive income (FVOCI), and amortised cost categories. IFRS 9 will also allow entities to continue to irrevocably designate instruments that qualify for amortised cost or FVOCI instruments as FVPL, if doing so eliminates or significantly reduces a measurement or recognition inconsistency. Equity instruments that are not held for trading may be irrevocably designated as FVOCI, with no subsequent reclassification of gains or losses to the income statement. The accounting for financial liabilities will largely be the same as the requirements of IAS 39.

IFRS 9 will also fundamentally change the approach to loan impairment. The standard will replace IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. The Group will be required to record an allowance for expected losses for all financial assets not carried at FVPL. The allowance is based on the expected credit losses associated with the probability of default in the next twelve months unless there has been a significant increase in credit risk since origination, in which case the allowance would be based on the probability of default over the life of the asset.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

New and revised IFRSs in issue but not yet effective (continued)

IFRS 9 is effective for annual periods beginning on or after 1 January 2018, with early application permitted. Retrospective application is required, but restatement of comparative information is not required; the effect on the transition date – 1 January 2018 – would be recorded in retained earnings. The adoption of IFRS 9 will have an effect on the classification and measurement of the Group's financial assets, but will potentially have no impact on classification and measurements of financial liabilities. The Group does not expect significant effect on its equity due to adoption of IFRS 9 impairment requirements, but it will need to perform a more detailed analysis which considers all reasonable and supportable information, including forward-looking elements to determine the extent of the impact.

IFRS 16 Leases

The IASB issued the new standard for accounting for leases - IFRS 16 Leases in January 2016. The new standard does not significantly change the accounting for leases for lessors. However, it does require lessees to recognise most leases on their balance sheets as lease liabilities, with the corresponding right of-use assets. Lessees must apply a single model for all recognised leases, but will have the option not to recognise 'short-term' leases and leases of 'low-value' assets. Generally, the profit or loss recognition pattern for recognised leases will be similar to today's finance lease accounting, with interest and depreciation expense recognised separately in the statement of profit or loss.

IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted provided the new revenue standard, IFRS 15, is applied on the same date.

The Group does not anticipate early adopting IFRS 16 and is currently evaluating its impact.

IFRS 15 Revenue from Contracts with Customers

In May 2014, the IASB issued IFRS 15 Revenue from Contracts with Customers, effective for periods beginning on 1 January 2018 with early adoption permitted. IFRS 15 defines principles for recognising revenue and will be applicable to all contracts with customers. However, interest and fee income integral to financial instruments and leases will continue to fall outside the scope of IFRS 15 and will be regulated by the other applicable standards (e.g., IFRS 9, and IFRS 16 Leases).

Revenue under IFRS 15 will need to be recognised as goods and services are transferred, to the extent that the transferor anticipates entitlement to goods and services. The standard will also specify a comprehensive set of disclosure requirements regarding the nature, extent and timing as well as any uncertainty of revenue and corresponding cash flows with customers.

The Group does not anticipate early adopting IFRS 15 and is currently evaluating its impact.

Amendments to IAS 12 Income Taxes

In January 2016, through issuing amendments to IAS 12, the IASB clarified the accounting treatment of deferred tax assets of debt instruments measured at fair value for accounting, but measured at cost for tax purposes. The Group does not anticipate that adopting the amendments would have a material impact on its financial statements.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

3. Significant Accounting Policies (continued)

New and revised IFRSs in issue but not yet effective (continued)

Amendments to IAS 7 Statement of Cash Flows

In January 2016, the IASB issued amendments to IAS 7 Statement of Cash Flows with the intention to improve disclosures of financing activities and help users to better understand the reporting entities' liquidity positions. Under the new requirements, entities will need to disclose changes in their financial liabilities as a result of financing activities such as changes from cash flows and non-cash items (e.g., gains and losses due to foreign currency movements). The amendment is effective from 1 January 2017. The Group is currently evaluating the impact.

Amendments to IFRS 2

The IASB issued amendments to IFRS 2 Share-based Payment in relation to the classification and measurement of share-based payment transactions. The amendments are intended to eliminate diversity in practice, but are narrow in scope and address specific areas of classification and measurement. The amendments address three main areas:

- The effects of vesting conditions on the measurement of a cash-settled share-based payment transaction.
- The classification of a share-based payment transaction with net settlement features for withholding tax obligations.
- The accounting where a modification to the terms and conditions of a share-based payment transaction changes its classification from cash-settled to equity-settled.

The amendment is effective for annual periods beginning on or after 1 January 2018. On adoption, entities are required to apply the amendments without restating prior periods, but retrospective application is permitted if elected for all three amendments and other criteria are met. Early application is permitted. The amendments are not expected to have any impact on the Group.

Applying IFRS 9 Financial Instruments with IFRS 4 Insurance Contracts - Amendments to IFRS 4

The amendments address concerns arising from implementing the new financial instruments Standard, IFRS 9, before implementing the new insurance contracts standard that the Board is developing to replace IFRS 4. The amendments introduce two options for entities issuing insurance contracts: a temporary exemption from applying IFRS 9 and an overlay approach. The optional temporary exemption from IFRS 9 is available to entities whose activities are predominantly connected with insurance. The temporary exemption permits such entities to continue to apply IAS 39 Financial Instruments: Recognition and Measurement while they defer the application of IFRS 9 until 1 January 2021 at the latest. The overlay approach requires an entity to remove from profit or loss additional volatility that may arise if IFRS 9 is applied with IFRS 4.

The temporary exemption is first applied for reporting periods beginning on or after 1 January 2018. An entity may elect the overlay approach when it first applies IFRS 9 and apply that approach retrospectively to financial assets designated on transition to IFRS 9. The amendments are not expected to have any impact on the Group.

(in millions of Russian rubles, unless otherwise indicated)

4. Critical Accounting Judgements and Key Sources of Estimation Uncertainty

In the application of the Group's accounting policies the Management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Key sources of estimation uncertainty

Impairment of receivables

The Group regularly reviews its receivables to assess for impairment. The Group's receivables impairment provisions are established to recognize incurred impairment losses in its portfolio of receivables.

The Group uses Management's judgment to estimate the amount of any impairment loss in cases where the debtor has financial difficulties and there are few available sources of historical data relating to similar debtors. Similarly, the Group estimates changes in future cash flows based on past performance, past counterparty behavior, observable data indicating an adverse change in the payment status, and national or local economic conditions that correlate with defaults on assets in the group.

As at December 31, 2016, the gross receivables totalled RUB 861,3 million (December 31, 2015: RUB 556,6 million) and allowance for impairment losses amounted to RUB 41,7 million (December 31, 2015: RUB 46,6 million) recognised within other assets in the statement of financial position.

Valuation of financial instruments

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include:

- Using recent arm's length market transactions;
- Reference to the current fair value of another instrument that is substantially the same;
- A discounted cash flow analysis or other valuation models.

An analysis of fair values of financial instruments and further details as to how they are measured are provided in Note 27.

Share-based payments

Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share option and volatility and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 10.

(in millions of Russian rubles, unless otherwise indicated)

6. Interest and Other Finance Income

	Year ended December 31, 2016	Year ended December 31, 2015
Income on securities at fair value through profit or loss		
Interest income	0,9	539,1
Net (loss) / profit on securities at fair value through profit or loss	(4,5)	70,4
Total (loss) / income on securities at fair value through profit or loss	(3,6)	609,5
Interest income on financial assets other than at fair value through profit or loss		
Interest income on investments available-for-sale	15 512,4	11 930,1
Interest on cash and cash equivalents and due from financial institutions	7 221,8	14 510,4
Total interest income on financial assets other than at fair value through profit or loss	22 734,2	26 440,5
Total interest and other finance income	22 730,6	27 050,0

7. Net Gain / (Loss) on Financial Assets Available-for-Sale

In the year ended December 31, 2016 the Group recognized a net gain on financial assets available-for-sale of RUB 1 425,3 million (year ended December 31, 2015: loss of RUB 280,7 million). In 2015 interest income received on these bonds exceeded the losses realised on the sale of such securities.

8. Foreign Exchange Gains Less Losses

	Year ended December 31, 2016	Year ended December 31, 2015
Foreign exchange swaps	(170,5)	1 336,1
Net other foreign exchange losses	(171,9)	102,4
Total foreign exchange gains less losses	(342,4)	1 438,5

The Group enters into foreign exchange swaps for the purposes of short-term investments and liquidity management.

9. Administrative and Other Operating Expenses

	Year ended December 31, 2016	Year ended December 31, 2015
Amortisation of intangible assets (Note 17)	1 262,1	1 207,2
Depreciation of property and equipment (Note 16)	1 032,2	592,5
Equipment and intangible assets maintenance	966,0	683,3
Rent and office maintenance	479,8	490,4
Market makers fees	477,1	352,4
Taxes, other than income tax	476,1	450,8
Advertising and marketing costs	407,4	322,9
Professional services	317,5	357,8
Registrar and foreign depository services	273,6	238,9
Information services	207,2	134,1
Communication services	132,8	128,6
Business trip expenses	81,8	83,6
Loss on disposal of assets held for sale	52,4	-
Security expenses	30,6	32,3
Charity	28,3	30,0
Transport expenses	20,5	20,1
Loss on disposal of property, equipment and intangible assets	9,5	26,1
Impairment of other assets (Note 19)	2,8	19,3
Payments for onerous contracts	-	114,9
Impairment related to assets held for sale	-	106,0
Other	54,6	97,5
Total administrative and other operating expenses	6 312,3	5 488,7

During the year ended December 31, 2016 the Group recognised a loss of RUB 52,4 million on sale of the disposal group held for sale under IFRS 5 "Non-current assets held for sale and discontinued operations". It consists of the loss on sale of the investment in associate UEX in the amount of RUB 13,0 million and subsidiary PFTS in the amount of RUB 39,4 million.

At the date of disposal PFTS' assets amounted RUB 83,8 mln and liabilities were RUB 3,4 mln. The total consideration from sale was RUB 49,0 mln paid in cash. Cash disposed with the subsidiary amounted RUB 2,5 mln. Net cash inflow on disposal of the subsidiary was RUB 46,5 mln.

During the year ended December 31, 2015 the Group recognised impairment related to assets held for sale in the amount of RUB 106,0 million. It consisted of the impairment of due from financial institutions of PFTS in the amount of RUB 103,9 million and an impairment loss of RUB 2,1 million of the investment in UEX measured at fair value less cost to sell.

Professional services comprise consulting, audit, insurance, legal services and other.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

10. Personnel Expenses

	Year ended December 31, 2016	Year ended December 31, 2015
Employees benefits except for share-based payments	4 794,4	4 708,3
Payroll related taxes	897,4	785,0
Share-based payment expense	255,3	289,9
Total personnel expenses	5 947,1	5 783,2

Rights to purchase equity instruments granted to some employees give to holders a choice either to only purchase the full number of shares at exercise price or also to sell back shares at the market price for the same ruble value. A majority of the rights vest when the employee continues to be employed by the Group at the vesting date. The maximum contractual term of the contracts is four years. The fair value of the rights is measured at the grant date using a binomial model taking into account the terms and conditions upon which the instruments were granted.

The following table illustrates the number and weighted average exercise prices (WAEP), and movements in rights to purchase equity instruments:

	Number	WAEP
Outstanding at 1 January 2015	32 857 357	47,50
Granted	28 450 000	71,07
Exercised	(6 791 042)	47,01
Forfeited	(233 333)	46,90
Expired	(5 883 953)	47,01
Outstanding at December 31, 2015	48 399 029	61,49
Granted	3 000 000	119,75
Exercised	(13 582 037)	50,01
Forfeited	(250 001)	46,90
Expired	(6 433 649)	50,01
Outstanding at December 31, 2016	31 133 342	74,60

WAEP for exercised rights in the table above is calculated based on the contractual exercise price.

The number of rights exercisable as at December 31, 2016 is 9 000 000 with WAEP of RUB 67,25 (December 31, 2015: 15 165 683 with WAEP of RUB 47,53).

The weighted average fair value of rights granted during the year ended December 31, 2016 was RUB 29,09 (December 31, 2015: RUB 19,65).

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

10. Personnel Expenses (continued)

The range of exercise prices and weighted average remaining contractual life of rights are as follows:

Exercise price	December 31, 2016		December 31, 2015	
	Number outstanding	Weighted average remaining contractual life	Number outstanding	Weighted average remaining contractual life
46,9 - 62,0	2 416 673	0,07	19 949 029	0,17
62,0 - 77,0	20 466 669	0,60	23 200 000	1,30
77,0 - 92,0	5 250 000	0,96	5 250 000	1,95
119,75	3 000 000	2,26	-	-
	31 133 342	0,78	48 399 029	0,90

The following table lists the inputs to the models used:

Assumption	Year ended December 31, 2016	Year ended December 31, 2015
Expected volatility	25,8%	29,7%
Risk-free interest rate	8,3%	10,7%
Weighted average share price, RUB	123,58	76,69
Dividend yield	4,4%	6,7%

The volatility assumption is based on implied volatilities of quoted shares of similar stock exchanges.

11. Income Tax

The Group provides for taxes based on the tax accounts maintained and prepared in accordance with the tax regulations of countries where the Group and its subsidiaries operate and which may differ from IFRS.

Deferred taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. Temporary differences relate mostly to different methods of income and expense recognition, as well as to recorded values of certain assets.

The tax rate used for the reconciliations between tax expense and accounting profit is the corporate tax rate of 20% payable by corporate entities in the Russian Federation on taxable profits under the tax law in that jurisdiction.

Cash and cash equivalents for the purpose of Consolidated Statement of Cash Flows	380 516,6	991 797,1

As at December 31, 2016, the Group has balances with six counterparties each of which is greater than 10% of equity (December 31, 2015: fourteen counterparties). The total aggregate amount of these balances is 330 779,3 RUB million or 87% of total cash and cash equivalents as at December 31, 2016 (December 31, 2015: RUB 954 498,7 million or 96% of total cash and cash equivalents).

Guarantee and risk-covering funds (Note 20) are placed on current accounts with large OECD banks, the CBR and large Russian banks (Fitch credit rating not less than BBB).

As at December 31, 2015 for the purpose of Consolidated Statement of Cash Flows cash and cash equivalents included cash and cash equivalents attributable to Assets of disposal group held for sale in the amount of RUB 2,5 million.

13. Due from Financial Institutions and Margin Account under Reverse Repo

Due from financial institutions are presented as follows:

	December 31, 2016	December 31, 2015
Reverse repo receivables from financial institutions	47 887,7	21 279,1
Term deposits with the CBR	5 004,1	-
Interbank loans and term deposits	4 633,8	18 428,6
Correspondent accounts and deposits in precious metals	3 076,3	2 903,9
Mandatory cash balances with the CBR (restricted)	3 240,8	1 792,2
Total due from financial institutions	63 842,7	44 403,8

Margin account under reverse repo represents cash collateral received by the Group under reverse repo operations. There were no such balances as at December 31, 2016. (December 31, 2015: RUB 417,7 million).

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

13. Due from Financial Institutions and Margin Account under Reverse Repo (continued)

As at December 31, 2016, the fair value of bonds pledged under reverse repo was RUB 62 517,1 million (December 31, 2015: RUB 23 651,7 million).

14. Central Counterparty Financial Assets and Liabilities

	December 31, 2016	December 31, 2015
Repo transactions	1 730 377,0	512 737,4
Currency transactions	2 886,8	5 771,9
Total central counterparty financial assets and liabilities	1 733 263,8	518 509,3

CCP financial assets are receivables under currency and repo transactions and CCP financial liabilities are payables under offsetting transactions, which the Group entered with market participants as a CCP.

The fair value of securities purchased and sold by the Group under repo transactions is RUB 1 924 488,1 million (December 31, 2015: RUB 573 201,4 million).

As at December 31, 2016 and 2015, none of these assets were past due.

CCP financial assets and liabilities under currency transactions represent fair values of overnight currency deals. Gross claims and liabilities with individual counterparties are offset in accordance with IAS 32. Information about financial assets offset against financial liabilities in the statement of financial position is disclosed in Note 30.

15. Investments Available-for-Sale

	December 31, 2016	December 31, 2015
Bonds issued by Russian Federation	135 133,6	105 016,0
Bonds issued by foreign companies	39 809,3	15 060,3
Bonds issued by Russian companies	21 977,3	21 599,1
Bonds issued by Russian banks	21 438,0	23 840,2
Shares issued by Russian companies	119,4	119,4
Shares issued by foreign companies	18,6	26,2
Bonds issued by foreign banks	-	1 811,1
Total investments available-for-sale	218 496,2	167 472,3

(in millions of Russian rubles, unless otherwise indicated)

18. Goodwill

As at December 31, 2016 and 2015 the Group's goodwill amounted RUB 15 971,4 million.

Impairment Tests for Goodwill

For the purposes of impairment testing, goodwill is allocated to the whole Moscow Exchange Group, which represents the lowest level at which the goodwill is monitored for internal management purposes.

As at December 31, 2016 the recoverable amount for the Group has been determined based on calculations of fair value less cost of disposal. Fair value is determined based on market capitalisation of the Group using quoted price on shares of the Group.

The resulted fair value less cost of disposal of the Group in amount of RUB 271 210,5 million exceeds the net carrying amount of its assets and liabilities.

19. Other Assets

	December 31, 2016	December 31, 2015
Other financial assets:		
Receivables on services rendered and other operations	861,3	556,6
Less allowance for impairment	(41,7)	(46,6)
Total other financial assets	819,6	510,0
Other non-financial assets:		
Precious metals	561,1	880,0
Prepaid expenses	469,1	272,8
Taxes receivable other than income tax	53,7	60,1
Non-current assets prepaid	25,6	47,6
Other	25,0	11,0
Total other assets	1 954,1	1 781,5

The movements in allowance for impairment of receivables on services rendered and other operations were as follows:

	Year ended December 31, 2016	Year ended December 31, 2015
Beginning of the period	46,6	37,8
Net charge for the period (Note 9)	2,8	19,3
Reclassification to assets held for sale	-	(1,2)
Write-offs	(7,7)	(9,3)
End of the period	41,7	46,6

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

20. Balances of Market Participants

	December 31, 2016	December 31, 2015
Accounts of clearing participants	516 339,6	1 047 510,2
Other current and settlement accounts	50 639,8	62 993,2
Risk-covering funds	3 973,4	4 810,2
Accounts in precious metals	3 637,3	3 783,9
Total balances of market participants	574 590,1	1 119 097,5

Accounts of clearing participants include margins deposited by clearing participants. The purpose of margins is to support clearing settlements on the market and to cover risks arising from open positions of market participants, including operations of market participants, where the Group acts as a central counterparty. If an initial margin requirement exceeds the collateral posted by a market participant in the guarantee fund, the participant is required to cover the deficit by posting additional margin for the unsettled trades or to reduce the open position to an appropriate level. The margins is payable to a market participant when it closes its positions. The Group places guarantee fund amounts on current accounts and deposits with reputable banks or repo receivables (Notes 12, 13).

Market participants also pledge traded securities to the guarantee fund as collateral for their obligations. These securities are blocked at the participants' custody accounts in NSD. These securities are not assets of the Group and are not recognised in the Consolidated Statement of the Financial Position.

The risk-covering funds comprise contributions deposited by market participants. The purpose of these funds is to provide additional insurance to the market participants in respect of the ability of the Group to guarantee proper settlements of open positions in case of a market participant default. The minimum contribution amount per one participant is determined by the NCC Supervisory Board and it is approved by the Derivatives Market Committee, the Currency Market Committee, the Securities Market Committee and the Securities Lending & REPO Committee. Risk-covering funds amounts are only used to cover the deficit if a margin posted by a trading participant is not sufficient to cover its losses. The Group places cash received from the market participants in the risk-covering funds with top-rated banks (Notes 12, 13).

21. Other Liabilities

	December 31, 2016	December 31, 2015
Other financial liabilities		
Payables to employees	2 073,7	1 921,6
Trade and other payables	592,7	439,5
Dividends payable	162,3	-
Total other financial liabilities	2 828,7	2 361,1
Other non-financial liabilities		
Deferred commission income	383,3	395,8
Advances received	254,0	241,7
Taxes payable, other than income tax	120,2	115,2
Other	5,8	28,2
Total other liabilities	3 592,0	3 142,0

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

22. Share Capital and Share Premium

The share capital of Moscow exchange comprises ordinary shares with a par value of RUB 1 each:

	Authorized shares (number of shares)	Ordinary shares issued and fully paid (number of shares)	Treasury shares (number of shares)
December 31, 2014	2 578 200 000	2 278 636 493	(51 563 004)
Exercised options (Note 10)	-	-	6 791 042
December 31, 2015	2 578 200 000	2 278 636 493	(44 771 962)
Purchase of treasury shares	-	-	(2 235 035)
Exercised options (Note 10)	-	-	13 582 037
December 31, 2016	2 578 200 000	2 278 636 493	(33 424 960)

Share premium represents an excess of contributions received over the nominal value of shares issued.

In 2016 the Group distributed to employees 13 582 037 treasury shares under exercised share options (2015: 6 791 042 treasury shares) (Note 10).

23. Retained Earnings

During the year ended December 31, 2016, the Group declared and paid dividends for the year ended December 31, 2015, to the owners of the parent of RUB 15 994,7 million (December 31, 2015: RUB 8 653,4 million for the year 2014). The amount of dividends per share for the year ended December 31, 2016, is RUB 7,11 per ordinary share (December 31, 2015: 3,87 per ordinary share).

The Group's distributable reserves are limited to the amount of reserves reported in the statutory financial statements of the Group members. Non-distributable reserves comprise a reserve fund, which is created according to the statutory regulations, to cover risks, including future losses and other unforeseen risks and contingencies, as well as funds of NCC required to comply with regulations of CBR relating to CCP activities.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

24. Earnings per Share

The calculation of earnings per share is based on the profit for the year attributable to shareholders of the Group and the weighted average number of ordinary outstanding during the year, calculated as shown below.

	Year ended December 31, 2016	Year ended December 31, 2015
Net profit attributable to ordinary equity holders of the parent	25 178,1	27 908,8
Weighted average number of shares	2 243 085 123	2 230 088 919
Effect of dilutive share options	13 356 966	14 201 445
Weighted average number of shares adjusted for the effect of dilution	2 256 442 089	2 244 290 364
Basic earnings per share, RUB	11,22	12,51
Diluted earnings per share, RUB	11,16	12,44

25. Commitments and Contingencies

Operating lease commitments – Where the Group is the lessee, the future minimum lease payments under non-cancellable operating leases of premises, parking slots and cars are as follows:

	December 31, 2016	December 31, 2015
Less than 1 year	164,6	169,9
More than 1 year and no more than 5 years	349,8	493,4
Total operating lease commitments	514,4	663,3

Legal proceedings – From time to time and in the normal course of business, claims against the Group may be received from customers and counterparties. The Management believes that such claims may not have a material impact on its financial and operational activities and that no material losses will be incurred, and accordingly no provision has been made in these Consolidated Financial Statements.

Operating environment – Russia continues economic reforms and development of its legal, tax and regulatory frameworks as required by a market economy. The future stability of the Russian economy is largely dependent upon these reforms and developments and the effectiveness of economic, financial and monetary measures undertaken by the government.

The Russian economy has been negatively impacted by a decline in oil prices and sanctions imposed on Russia by a number of countries. The Rouble interest rates remained high. The combination of the above resulted in reduced access to capital, a higher cost of capital and uncertainty regarding economic growth, which could negatively affect the Group's future financial position, results of operations and business prospects. Management believes it is taking appropriate measures to support the sustainability of the Group's business in the current circumstances.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

25. Commitments and Contingencies (continued)

Taxation – Major part of the Group’s business activity is carried out in the Russian Federation. Russian tax, currency and customs legislation as currently in effect is vaguely drafted and is subject to varying interpretations, selective and inconsistent application and changes, which can occur frequently, at short notice and may apply retrospectively. Management’s interpretation of such legislation as applied to the transactions and activity of the Group may be challenged by the relevant regional and federal authorities. Recent events within the Russian Federation suggest that the tax authorities may be taking a more assertive position in their interpretation and application of this legislation and assessments. It is therefore possible that transactions and activities of the Group that have not been challenged in the past may be challenged at any time in the future. As a result, significant additional taxes, penalties and interest may be assessed by the relevant authorities. Fiscal periods remain open and subject to review by the tax authorities for a period of three calendar years immediately preceding the year in which the decision to conduct a tax review is taken. Under certain circumstances tax reviews may cover longer periods.

As at 31 December 2016 management believes that its interpretation of the relevant legislation is appropriate and that the Group’s tax, currency and customs positions will be sustained.

26. Transactions with Related Parties

Intragroup transactions have been eliminated on consolidation and are not disclosed in this note. Details of transactions between the Group and other related parties are disclosed below.

(a) Transactions with key management

Key management personnel comprises members of the Executive Board and the Supervisory Board. The total remuneration paid to key management personnel includes short-term benefits (salary, bonuses, payroll related taxes, insurance, health care, etc.), long-term benefits and share-based payment expense.

Included in the Consolidated Statement of Financial Position are the following amounts that arose on transactions with key management personnel:

	December 31, 2016	December 31, 2015
Other liabilities	476,8	274,0
Share-based payments	255,0	344,5

Included in the Consolidated Statement of Profit or Loss are the following amounts that arose due to transactions with key management personnel:

	Year ended December 31, 2016	Year ended December 31, 2015
Short-term employee benefits	446,4	430,4
Share-based payment expense	137,8	177,8
Long-term employee benefits	99,9	81,4
Total remuneration of key management personnel	684,1	689,6

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

26. Transactions with Related Parties (continued)

(b) Transactions with government-related entities

As at December 31, 2016 the Russian Federation exercises significant influence over Moscow Exchange.

The Group considers government-related entities as related parties if Russian Federation has control, joint control or significant influence over the entity. In the ordinary course of business the Group provides stock exchange, clearing and depository services to government-related entities, places funds with government-related banks and bonds issued by the Russian Federation and government-related entities.

(c) Transactions with associates

Included in the Consolidated Statement of Financial Position were the following amounts that arose on transactions with associates:

	December 31, 2016	December 31, 2015
Assets held for sale	-	37,7
Other assets	-	1,2
Other liabilities	-	0,3

As at December 31, 2015 the Group presented the investment in UEX as disposal group held for sale under IFRS 5 "Non-current assets held for sale and discontinued operations". In February and March 2016 the Group sold its stake in UEX (Note 9).

Included in the Consolidated Statement of Profit or Loss are the following amounts that arose due to transactions with associates:

	Year ended December 31, 2016	Year ended December 31, 2015
Administrative and other operating expenses	(13,7)	(5,8)
Share of profits of associates	-	1,2
Fee and commission income and other operating income	-	2,8

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

27. Fair Value Measurements

The Group performs a fair value assessment of its financial assets and liabilities, as required by IFRS 13 Fair Value Measurement. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability.

The Group measures fair values for financial assets recorded on the statement of financial position at fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market prices in an active market (that are unadjusted) for identical assets or liabilities.
- Level 2: Valuation techniques (for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable).
- Level 3: Valuation techniques (for which the lowest level input that is significant to the fair value measurement is unobservable).

The foreign currency forward contracts are measured based on observable spot exchange rates and the yield curves of the respective currencies.

The fair value of the unquoted debt securities has been determined using a discounted cash flow model, by reference to quoted market prices for similar instruments.

The fair value of unquoted equity instruments has been determined based on market approach using price/net assets ratio for similar companies.

The table below analyses financial assets and liabilities measured at fair value at December 31, 2016, by the level in the fair value hierarchy into which the fair value measurement is categorised:

	December 31, 2016			Total
	Level 1	Level 2	Level 3	
Financial assets at fair value through profit or loss	0,4	-	-	0,4
Central counterparty financial assets and liabilities (currency transactions)	2 886,8	-	-	2 886,8
Investments available-for-sale	205 222,4	13 135,8	138,0	218 496,2

Financial assets and liabilities measured at fair value at December 31, 2015, by the level in the fair value hierarchy into which the fair value measurement is categorised:

	December 31, 2015			Total
	Level 1	Level 2	Level 3	
Financial assets at fair value through profit or loss	0,4	-	-	0,4
Central counterparty financial assets and liabilities (currency transactions)	5 771,9	-	-	5 771,9
Investments available-for-sale	158 513,2	8 813,5	145,6	167 472,3

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

27. Fair Value Measurements (continued)

The following table shows a reconciliation for year ended December 31, 2016 and December 31, 2015, for fair value measurements in Level 3 of the fair value hierarchy:

	FVTPL	AFS
Balance at December 31, 2014	58,3	34,3
Loss recognised in net loss on financial assets at fair value through profit or loss	(58,3)	-
Level 3 securities purchased	-	114,2
Foreign exchange loss	-	(2,9)
Balance at December 31, 2015	-	145,6
Loss recognised in net loss on financial assets available-for-sale	-	(6,9)
Foreign exchange loss	-	(0,7)
Balance at December 31, 2016	-	138,0

Management of the Group considers that the fair value of financial assets and liabilities not carried at fair value in Consolidated Statement of Financial Position approximates their carrying value.

Transfers between level 1 and 2

For assets and liabilities that are recognised at fair value on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

The following table shows total amount of transfers of financial assets between level 1 and level 2. Transfers from level 2 to level 1 (from level 1 to level 2) occurred due to fact that markets for certain financial assets became (ceased to be) active during the period.

	Transfers between Level 1 and Level 2	
	Year ended December 31, 2016	Year ended December 31, 2015
<i>From Level 1 to Level 2</i>		
Investments available-for-sale	6 894,7	4 545,1
<i>From Level 2 to Level 1</i>		
Investments available-for-sale	114,9	1 090,0

28. Capital Management

The Group's policy is to maintain a strong capital base so as to maintain investor, creditor and market confidence and to sustain future development of the business. The Supervisory Board monitors the return on capital, which the Group defines as net profit divided by total equity, excluding non-controlling interests. The Supervisory Board also monitors the level of dividends to ordinary shareholders.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016 (Continued)

(in millions of Russian rubles, unless otherwise indicated)

28. Capital Management (continued)

The capital structure of the Group consists of the shareholder's equity, which includes capital issued, reserves and retained earnings. The allocation of capital between specific operations and activities is, to a large extent, driven by optimization of the return achieved on the capital allocated. Although maximization of return on risk-adjusted capital is the principal basis used in determining how capital is allocated within the Group to particular operations or activities, it is not the sole basis used for decision making. Account is also taken of synergies with other operations and activities, the availability of management and other resources and the fit of the activity with the longer term strategic objectives. The policies in respect of capital management and allocation are regularly reviewed by the Supervisory Board through approval and review within annual budgets.

The Group entities are subject to capital requirements established by the CBR in respect of the minimum amount of own funds for each entity depending on the nature of their activities. NSD and NCC as credit institutions have to maintain a ratio of capital to risk weighted assets (statutory capital ratio N1) above the prescribed minimum level, which is 8% for banks (NCC) and 12% for non-banking credit institutions (NSD).

Regulatory capital ratios for the major Group companies were as follows:

	Own funds		Own funds requirements		Capital adequacy ratio	
	December 31, 2016	December 31, 2015	December 31, 2016	December 31, 2015	December 31, 2016	December 31, 2015
Moscow Exchange	52 586,9	61 760,1	100,0	100,0	-	-
NCC	46 214,2	54 310,1	300,0	300,0	19,42	13,48
NSD	8 805,2	11 274,6	4 000,0	4 000,0	22,78	25,16
NAMEX	211,6	192,0	100,0	100,0	-	-
MICEX SE	n/a	1 789,3	n/a	100,0	-	-

The Group companies had complied in full with all its externally imposed capital requirements at all times.

29. Risk Management Policies

Risk management is an integral part of the Group's activities. Moscow Exchange Group distinguishes the following significant risks: liquidity, market, credit, operational. Risk management core objectives include identification of sources of risks, measurement of risk levels, development of risk management policies and implementation of risk controls, including setting limits and further compliance with them.

A description of the Group's risk management policies in relation to each significant risk is as follows.

Liquidity risk

Liquidity risk is the risk of facing the situation where available funds are insufficient to meet current financial liabilities. The main purpose of liquidity management is to ensure Group's ability to perform its obligations not only under normal market conditions but also in cases of unforeseen emergencies without suffering unacceptable losses or risk of damaging its business reputation.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(Continued)

(in millions of Russian rubles, unless otherwise indicated)

29. Risk Management Policies (continued)

Liquidity risk (continued)

Group's liquidity management procedures cover various forms of liquidity risk:

- operating liquidity risk arising from the inability to timely meet its current obligations due to the existing structure of current cash credits and debits (operating analysis and control of liquidity);
- risk of mismatch between the amounts and dates of repayment of claims and obligations – analysis and assessment of prospective liquidity (GAP analysis);
- risk of unforeseen claims on liquidity, i.e. the consequences of the risk that unforeseen future events may claim more resources than allocated for this purpose (stress testing).

Liquidity risk management plays an important role in the whole risk management system and includes such procedures as: forecasting/monitoring payment flow and liquidity ratios, planning measures to recover the required liquidity level considering unfavourable and crisis situations, ensuring an optimal structure of assets in accordance with the resource base, taking into account the maturities of fund sources and their volumes when allocating assets to financial instruments.

The maturities of assets and liabilities and the ability to replace, at an acceptable cost, interest-bearing liabilities as they mature, are important factors in assessing the liquidity of the Group and its exposure to changes in interest and exchange rates.

Management expects that the cash flows from certain financial assets will be different from their contractual terms either because the Group has the discretionary ability to manage the cash flows or because past experience indicates that cash flows will differ from contractual terms. In the tables below the financial assets and liabilities are presented on a discounted basis and are based on their expected cash flows.

The presentation below is based upon the information provided internally to key management personnel of the Group.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(continued)

(in millions of Russian rubles, unless otherwise indicated)

29. Risk Management Policies (continued)

Liquidity risk (continued)

Undiscounted cash flows on financial liabilities are approximately equal to cash flows presented in the analysis of liquidity risk above.

The Group presents available-for-sale securities included in CBR Lombard list as matured in one month.

Market risk

Market risk is the risk of losses due to changes in market variables such as interest rates, foreign exchange rates, and prices of financial instruments, as well as due to the low liquidity of the market for the purpose of the liquidation / restructuring of the market position of the defaulted clearing participant. The key components of market risk are interest and currency risks.

Interest rate risk

Interest rate risk is the risk of changes in interest income or the financial instruments price due to the interest rate changes.

The Group's result is exposed to the effects of fluctuations in the prevailing levels of market interest rates on its financial positions and cash flows. Interest margin may increase, decrease or lead to losses as a result of unexpected movements.

Management of the relevant Group entities is responsible for asset-liability management regarding relevant individual Group entities.

Designated functional units within individual Group entities and at the Group level are responsible for interest rate risk management.

In order to measure the impact of interest rate risk on the fair value of financial instruments the Group conducts periodic assessments of potential losses, which may be triggered by negative changes in market environment. The Risk Management Department conducts periodic monitoring of the current financial results of the Group and its entities, assesses the sensitivity of the impact of interest rate risk on portfolio fair value and income.

The majority of the Group's transactions is represented by fixed income instruments, and hence the contractual maturity dates are also the dates of changes in interest rates.

The impact of changes in fair value of financial assets on the income, losses and equity is conducted based on the interest rates existing as at December 31, 2016 and December 31, 2015, and a reasonably possible changes of 150 bp. Corresponding negative and positive results shown on the yield curve are as follows:

	Year ended December 31, 2016		Year ended December 31, 2015	
	Net profit	Equity	Net profit	Equity
150 bp parallel rise	-	(4 081,4)	-	(2 941,6)
150 bp parallel fall	-	3 459,7	-	3 036,0

(in millions of Russian rubles, unless otherwise indicated)

29. Risk Management Policies (continued)

Currency risk

Currency risk is the risk of changes in financial instruments value due to the exchange rates fluctuations. The financial state and cash flows of the Group are subject to the influence of such fluctuations. The main source of currency risk are open foreign currency positions.

NCC Bank being part of the Group is a CCP on the of FX market. The Bank limits currency risk on FX market through the application of the following instruments: mechanism of currency rates restrictions within trading session, trading limits system, margining system, mechanism of open currency positions assurance, DVP principle, special Bank of Russia swap facilities.

The Bank defines currency risk in the course of clearing arising from currency pairs volatility. In this regard for market risk management the Bank monitors the conditions of internal and external FX markets and sets limits on intraday rate fluctuations within trading sessions in accordance with current market environment.

The Group's exposure to foreign currency exchange rate risk is presented in the tables below:

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(continued)

(in millions of Russian rubles, unless otherwise indicated)

29. Risk Management Policies (continued)

Currency risk (continued)

An analysis of sensitivity of profit or loss and equity to changes in the foreign currency exchange rates based on positions existing as at December 31, 2016 and December 31, 2015, and a reasonably possible changes of Russian Ruble to USD and Euro exchange rates is as follows:

	December 31, 2016		December 31, 2015	
	USD	EUR	USD	EUR
23% ruble appreciation (December 31, 2015: 26%)	(74,0)	(48,7)	(259,5)	(66,1)
23% ruble depreciation (December 31, 2015: 26%)	74,0	48,7	259,5	66,1

Credit risk

The Group uses credit risk management approaches under requirements of the Russian regulators, based on the best international practices and standards. The Group's assets are exposed to credit risk, which is defined as the risk of losses resulting from a default or improper performance of their obligations to the Group by its counterparties.

The goal of credit risk management is to timely define and efficiently evaluate the level of risk necessary to ensure sustainable growth determined by the Group's development strategy.

The objectives of the Group in credit risk management:

- implement a systemic and enhanced approach to optimize the structure of the assets in order to limit credit risk level;
- enhance the competitive advantages of the Group through implementation of more precise risk measures;
- maintain stability during the introduction of new complex products and services.

The Group controls credit risk by setting limits on a counterparty and groups of related counterparties. Credit risk limits are set on the basis of a comprehensive and in-depth evaluation of the counterparties financial conditions, analysis of the macroeconomic environment of counterparties' activities, the level of information transparency, business reputation and other financial and non-financial factors. The Group has developed and constantly improves an internal ratings system, providing a prudent assessment of its counterparties and the level of accepted credit risk.

Credit risk limits are approved by authorized bodies. Credit risk limits are monitored and reviewed on a regular basis. Also the Group constantly monitors the concentration of credit risk in compliance with applicable prudential requirements.

To reduce credit risk the Group applies specific requirements to the financial conditions of its counterparties and to the types and quality of collateral accepted by the Group. Accepted collateral includes liquid securities and cash contributions in Rubles and foreign currencies. Eligible types of collateral depend on the market and the type of exposure. To mitigate credit risk from its CCP activities the Group has introduced a multi-level default waterfall structure in compliance with the highest international standards and consisting of various lines of defence applicable in case of a clearing participant default.

29. Risk Management Policies (continued)

Credit risk (continued)

Maximum credit risk exposure

The Group's maximum exposure to credit risk equals to the carrying value of assets that bear credit risk.

As at December 31, 2016 included into other assets are overdue receivables of RUB 41,7 million (December 31, 2015: RUB 46,6 million).

Financial assets are classified according to the current credit ratings issued by international rating agencies (Fitch Ratings, Standard & Poor's and Moody's Investor Service). The highest possible rating is AAA. Investment grade financial assets have ratings from AAA to BBB-. Financial assets which have ratings lower than BBB- are classed as speculative grade.

As at December 31, 2016 and 2015, balances with the CBR are classified at the sovereign credit rating level of the Russian Federation.

Tables below do not include equity instruments.

The following table details the credit ratings of the financial assets held by the Group as at December 31, 2016 :

	AA	A	BBB	less BBB-	Not rated	December 31, 2016 Total

(continued)

(in millions of Russian rubles, unless otherwise indicated)

29. Risk Management Policies (continued)

Geographical concentration

All assets of the Group consist of balances on operations in the Russian Federation, except for:

- Correspondent accounts and deposits with top OECD banks, which are reported in cash and cash equivalents (Note 12);
- Other deposits with top OECD banks, which are reported in balances due from financial institutions of as at December 31, 2016: RUB 4 560,7 million (December 31, 2015: RUB 2 359,2 million) (Note 13);
- Balances placed by PJSC PFTS Stock Exchange with one of the top Ukrainian banks that were reported in assets held for sale as at December 31, 2015 of RUB 2,5 million (were previously presented as cash and cash equivalents) and RUB 78,3 million as at December 31, 2015 (were previously presented as due from financial institutions);
- Balances placed by ETS with one of the top Kazakh banks that are reported in cash and cash equivalents of RUB 7,5 million as at December 31, 2016 (December 31, 2015: RUB 9,7 million) and in due from financial institutions of RUB 14,4 million as at December 31, 2016 (December 31, 2015: RUB 15,1 million).

Operational risk

Operational risk is the risk of direct or indirect losses arising from a wide variety of risk events associated with the internal processes, personnel, technology and infrastructure, and from external factors (other than credit, market and liquidity risks) such as those arising from legal and regulatory requirements and generally accepted standards of corporate behaviour or IT failure.

The Supervisory Board has overall responsibility for the oversight of operational risk management, reviewing risk management policies and procedures. The risk assessment, reporting and control procedures vary by exposure type, but share a common methodology developed and updated periodically by the risk management personnel.

Both external and internal risk factors are identified and managed throughout the business units within their functional duties. The primary responsibility for the implementation of controls to address operational risk is assigned to management within each business unit.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(continued)

(in millions of Russian rubles, unless otherwise indicated)

29. Risk Management Policies (continued)

Operational risk (continued)

Operational risk management includes reputational, compliance and legal risks governance as well. Moreover, strategic risk (risk of non-achievement of strategic goals within certain deadline or resources) is also monitored and managed under the operational risk management framework.

Legal risk

Legal risk is associated with losses due to breaches of contractual obligations, trial, criminal and administrative liability of the group entities and/or their management in the performance of their official duties. Losses attributed to legal risk are recorded in risk events database along with operational risk losses.

Legal risk management procedures include:

- monitoring of legislation and internal procedures for compliance with the up-to-date requirements on a regular basis;
- setting quantitative and volume limits for legal claims and control over limits set;
- analysis of legal basis for all new products and services;
- update of internal regulations in order to prevent fines.

Compliance risk

Compliance risk is the risk of losses resulting from Group activities being inconsistent with the law, the Charter and internal regulations. Compliance risk is solely managed by Internal Control department that takes the following actions in order to prevent losses due to compliance risk realization:

- legislation monitoring;
- interaction with the regulatory authorities regarding the specifics of upcoming regulation;
- compliance risk identification in existing and planned internal procedures;
- best-practice analysis of internal control measures.

Reputational risk

Reputational risk is the risk of losses due to the negative public view on the operational (technical) stability of the Group, its service quality and business in general. In order to avoid such losses the Group constantly monitor its appearance in media along with internal processes using the methodology of assessment the impact of each event. The major source of reputational risk is realization of operational risk, specifically when it becomes public. Thus, all actions taken to prevent the Group from operational risk at the same time help to decrease the level of reputational risk.

MOSCOW EXCHANGE GROUP

Notes to the Consolidated Financial Statements for the Year Ended December 31, 2016

(continued)

(in millions of Russian rubles, unless otherwise indicated)

30. Offsetting of financial instruments

Gross claims and liabilities with individual counterparties under CCP currency transactions are offset in accordance with IAS 32.

Direct and reverse repo transactions of CCP with individual counterparties are subject to clearing rules that create a contingent right of set-off that does not qualify for offsetting. Clearing participants are required to deposit collateral in the form of cash or securities for current deals and make contribution to a risk-covering fund, as described in Note 29. Clearing rules give the Group right to use these amounts under certain conditions (e.g. in case of default). However, offsetting criteria is not met as there is no intention either to settle on a net basis, or to realise the asset and settle the liability simultaneously.

Reverse repo transactions with financial institutions are subject to master agreement that gives the Group right to settle amounts relating to these transactions on a net basis under certain conditions (e.g. in case of default), but offsetting criteria is not met as there is no enforceable right to set off in the normal course of business.

The table below shows financial assets and liabilities offset in the statement of financial position, as well as the effect of clearing agreements that do not result in an offset in the statement of financial position:

	December 31, 2016			Related amounts not set off in the statement of the financial position		
	Gross claims	Gross liabilities	Net amount presented in financial statements	Financial instruments	Cash collateral received	Net amount
Due from financial institutions (Reverse repo receivables from financial institutions)	47 887,7	-	47 887,7	(47 887,7)	-	-
Central counterparty financial assets (repo transactions)	1 730 377,0	-	1 730 377,0	(1 730 377,0)	-	-
