<sup>1</sup> T+n is the date (n) calendar days after trade date (T).

If the settlement date of a T+0 spot deal falls on a non-settlement day for the relevant currencies, the T+0 instrument does not trade on that day.

If the settlement date of a T+1 or T+2 spot deal comes on a non-settlement day for the relevant currencies, the trade is to be settled on the next settlement day.

<sup>2</sup> Deals with USDRUB\_DIS instrument take place only during the discrete auction with Bank of Russia. In the course of discrete auction trades of USDRUB\_TOM instrument are suspended.

<sup>3</sup> For USD/JPY instruments, the total amount of the deal in the quote currency is rounded to the whole JPY values according to mathematical rules.

<sup>4</sup> Only Negotiated Board and deals constituting parts of swap deals are available.

The average weighted rate for all instruments is calculated to four decimal places. Negotiated Board and deals constituting parts of deals in dual currency basket instruments with RUB settlement are not included in the calculation.

## 2. Fix

No	Fix deal code	Lot currency code	Lot currency name	Quote currency name	Lot	Number of trading days between the trade date and the date on which the fixing rate of the trade is determined <sup>1</sup>
1.	<b>USDRUBFIX0</b>	USD	US dollar	Russian rouble	USD 1,000,000	0
2.	<b>EURRUBFIX0</b>	EUR	Euro	Russian rouble	EUR 1,000,000	0

## 3. Weighted average trade

No	Weighted average trade code	Lot currency code	Lot currency name	Quote currency name	Lot	Price tick	Number of trading days between the trade date and the date on which the fixing rate of the trade is determined <sup>1</sup>
1.	<b>USDRUBWAP0</b>	USD	US dollar	Russian rouble	USD 1,000	-	0
2.	<b>USDRUBWAPV</b>	USD	US dollar	Russian rouble	USD 1,000	RUB 0.0001	0

<sup>1</sup> The settlement date of a fix trade or weighted average trade is the date immediately preceding the date on which the rate of the fixing trade or weighed average trade at 16:30 Moscow time is determined.

If the settlement date of a fix trade or weighted average trade is a non-settlement day for the relevant currencies, the trade is settled on the next settlement day.

#### 4. Swap deals

No	Swap deal code	Lot currency code	Lot currency name	Quote currency name	Lot	Price tick	Base rate accuracy	Final rate accuracy	Settlement date for the first and second parts of the deal (T+n/t+d) <sup>1</sup>

<sup>1</sup> T+n is the date (n) calendar days after trade date (T)

If the settlement date of a T+0 deal falls on a non-settlement day for the relevant currencies, T+0/t+1 swaps do not trade on that day.

If the settlement date of a T+1 deal which is the first part of a swap deal falls on a non-settlement day for pertinent currencies, the deal is settled on the next settlement day.

t+d is the date (d) calendar days after the settlement date of the first part of a swap deal (settlement date of the second part of the deal).

If the settlement date of a T+1 spot deal which is the second part of a swap deal falls on a non-settlement day for the relevant currencies, the deal is to be settled on the next settlement day.

<sup>2</sup> only trading in Auction with the Bank of Russia Mode is available.

<sup>3</sup> For USD/JPY instruments, the total amount of the deal in the quote currency is rounded to the whole JPY values according to mathematical rules.
