If the settlement date of a T+0 spot deal falls on a non-settlement day for the relevant currencies, the T+0 instrument does not trade on that day.

If the settlement date of a T+1 or T+2 spot deal comes on a non-settlement day for the relevant currencies, the trade is to be settled on the next settlement day.

² Deals with USDRUB_DIS instrument take place only during the discrete auction with Bank of Russia. In the course of discrete auction trades of USDRUB_TOM instrument are suspended.

³ For USD/JPY instruments, the total amount of the deal in the quote currency is rounded to the whole JPY values according to mathematical rules.

⁴ Only Negotiated Board and deals constituting parts of swap deals are available.

The average weighted rate for all instruments is calculated to four decimal places. Negotiated Board and deals constituting parts of deals in dual currency basket instruments with RUB settlement are not included in the calculation.
