Program 2 "Future contract on SPDR S&P 500 ETF Trust"

1. The table below shows instruments and their designations for which the Contractors must maintain quotes during the trading sessions on the Moscow Exchange Derivatives Market in accordance with this Program:

Instrument designation	Instrument name
k=1	SPDR S&P 500 ETF Trust Futures

2. Conditions for the Contractors' obligations to be fulfilled.

2.1. The following definitions are used to set the Contractors' obligations parameters:

Bid/ask quote spread	The maximum difference between the best bid and the best ask made by Contractor 1 with respect to the Instrument. The value of the spread is determined according to the formula: Spread _{MM} = a^*SP_i , where: $a - constant$ value specified for the Instrument in clause 2.2.1 of the Program and given in %; SP _i – Settlement Price of the Instrument with the i-th contract month determined at the end of the day clearing session. The
	spread is determined by the value used for determination of the
D (111	Instrument's price as set out in the Specifications.
Best bid	The price of an order to buy entered by Contractor 1 with respect to the Instrument, which volume (considering the volume of all Contractor 1's orders to buy at the same price or higher) is no less than the minimum required order volume.
Best ask	The price of an order to sell entered by Contractor 1 with respect to the Instrument, which volume (considering the volume of all Contractor 1's orders to sell at the same price or lower) is no less than the minimum required order volume.
Quantum	The period of the Trading Session during which the Contractor 1 must enter orders. Quanta are designated as $q=1, 2,$ (where 1, 2, – the Quantum sequence number). The
Nearest contract month for	The contract month of the Instrument that is as close as
the Instrument	possible to the Trading Day on which quotes are maintained
	for such Instrument. Such contract month is designated as i=n
	(where $n=1, 2,$ the sequence number of the expiration
	date of the Instrument).
Next contract month for the Instrument	The contract month determined as $i = n+1$.
Reporting Period	A calendar month.

Terms that are not specified in this Program are used in the values, the land of internal documents of the Public Joint-Stock Company "Moscow Exchange MICEX-RTS" (hereinafter - the Exchange) and the National Settlement Depository, and in the absence of such terms - in accordance with the current legislation of the Russian Federation.

3. Contractors' compensation

3.1. The amount of compensation that the Contractors receive for fulfilling their obligations during the Reporting Period on terms set out in Clauses 1-2 above, is the sum of compensation values determined in accordance with formulas 1-4 below with regard to every group of the clearing
