

MOSCOW EXCHANGE

April 2021

Investor presentation

History of MOEX: the path of ongoing progress

Investment and corporate highlights

Financial Resilience

- Counter-cyclical business model coupled with robust cost control
- Secular growth of fees and commissions (F&C) across 7 complimentary F&C business lines
- Business-driven margin and collateral requirements generate sustainable net interest income (NII)
- Operating income F&C/NII split of 2/1 evolving towards F&C
- One of the highest EBITDA margins among global peers
- Attractive dividend policy: min. payout of 60%; target payout of 100% FCFE; track record of distributing 55-89% of 2014-2019 profits

Strategic Stance

- Low penetration of financial services indicates secular growth potential
- The world's most diversified exchange with trading in 5 asset classes vs ~3 offered by "traditional" exchanges
- **Complete vertical integration** of a trading engine with a clearing house and a central securities depository makes up **a unique platform**
- **Cornerstone** of the Russian financial system: MOEX brings together the tiers of the banking system by managing ~3/4 of its total liquidity flow
- The world's **only exchange** focused on Russian financial assets in the market is open for competition (ex. the CSD). OTC is the main competitor
- B2B business model: investors trade via locally licensed brokers and banks. Foreign investors have SMA and ICM services at their disposal

Corporate Governance

- A 29-year history of successful and continuous implementation of infrastructural and regulatory reforms
- No single controlling shareholder: free float of 63% with substantial international participation; the largest shareholder owns <12%
- Most Supervisory Board members are independent directors (8 out of 12)
- Established track record for **efficient capital allocation**

Operational Excellence

- All-electronic since 1997
- Vast in-house IT expertise: ~1/3 of staff are IT developers, supporting a CAPEX-light business model
- Single-tier clearing system requires all participants to provide eligible collateral in cash or securities to trade any asset class
- **Pre-trade risk checks** forestall any "fat fingers"/"flash crash" problems
- Low-cost product scalability: a new order book launch requires the equivalent of circa USD 10 thousand

...and one of the highest free-floats in Russia²

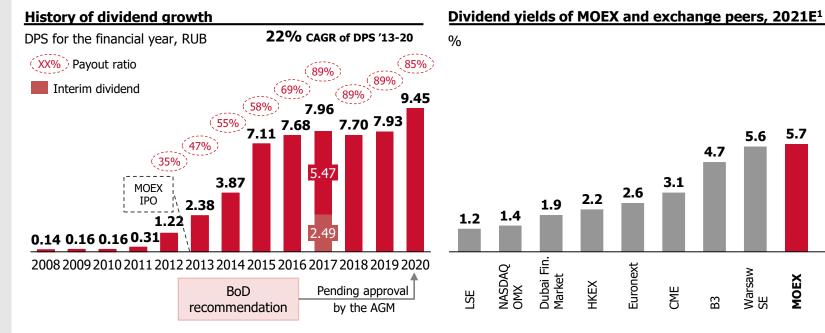

Transparency and international recognition

- International index providers MSCI and MVIS include MOEX shares in their indices
- **Voluntary disclosures** and regular updates of investor materials, including monthly trading results
- Annual MOEX Forums in Moscow, New York, London and Shanghai have become well-known venues to maintain dialogue with international market participants

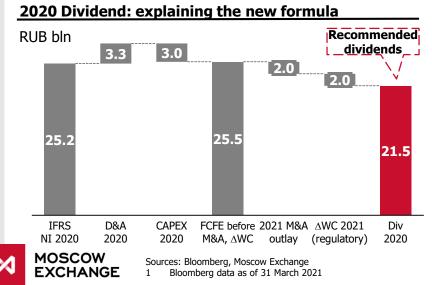

Robust investor relations program:

- ✓ ~300 investor meetings per annum in 2016-2020
- ✓ IR activities in Russia, the UK, Europe, Asia and the US to maintain dialogue with overseas investors
- ✓ IR awards in Russia in 2014-2017

- 1 100% owned subsidiary of the Moscow Exchange

- 4 Calculated as annual trading volume divided by average market capitalization of the free-float
- 5 The ranking includes ordinary and preferred shares

The established dividend story continues

Comments

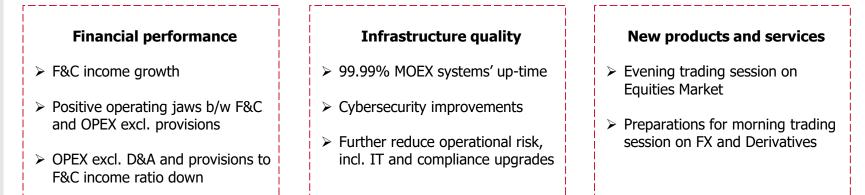

- MOEX has been paying substantial dividends since the onset of its public history
- Dividend policy approved in October 2019 sets 60% of net profit as the minimum payout and the target payout of 100% FCFE
- In 2019 MOEX paid a DPS of RUB 7.70 for 2018, which amounts to 89% of the consolidated IFRS net profit for the year
- In 2020 a DPS of RUB 7.93 for 2019, which amounts to 89% of the consolidated IFRS net profit for the year, was paid out

ЫS

Overview of KPIs and incentives

Highlights of delivery across 2020 KPI areas

New Long Term Incentive Program (LTIP) launched in mid-2020

Naturally aligns long-term interests of shareholders and the management team

Based on existing shares, not options => predictable for both beneficiaries and investors, has no embedded leverage

The value of incentive is determined by: (1) financial performance, (2) share price performance, (3) accrued dividends

The program term is 5 years, in line with the strategy; vesting in years 3, 4, 5 in three equal tranches

Every tranche is dependent on achieving KPIs, which are linked to F&C income growth and relevant regulation

70 key employees might earn up to 18 mln shares, which make up 0.8% of MOEX's Market Cap

MICEX-Finance holds 22 mln treasury shares => no new issuance, no dilution required

Effect on

### **NTPro acquisition profile**

#### What is the structure of the deal?

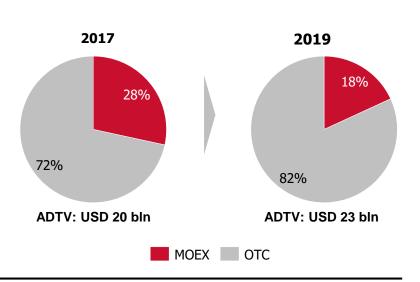

- Phased acquisition of up to 100% of BierbaumPro AG, a parent company owning 100% of NTProgress;
- NTProgress is BierbaumPro's main asset;
- NTProgress runs and develops the proprietary OTC FX trading platform called NTPro;
- MOEX acquired a 25% stake. Further consolidation depends on NTPro's performance;
- The entire deal might take up to 3 years. The final price is also conditional.

#### **Deal rationale**

MOSCOW

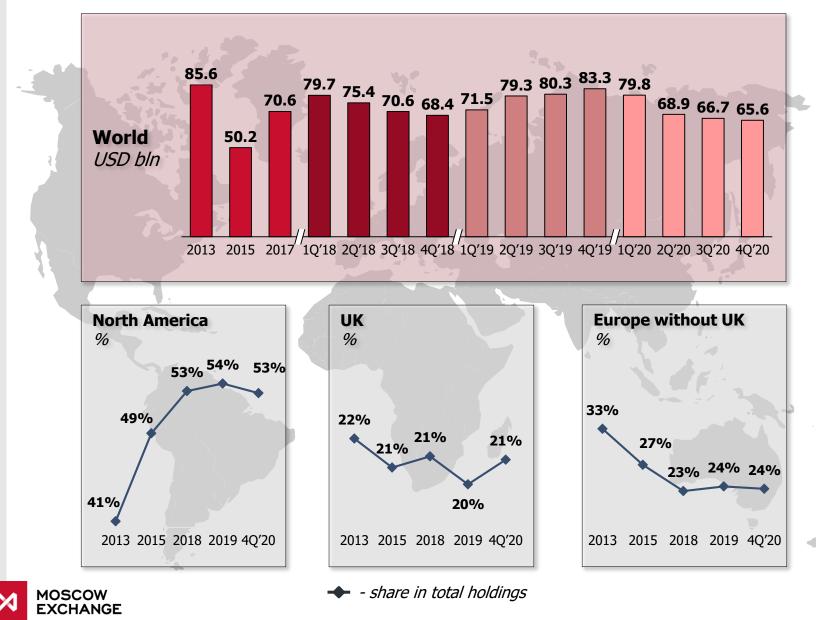

EXCHANGE

- Since its launch in 2016, NTProgress has become one of the leading platforms on the Russian electronic OTC FX market
- NTProgress has a client base of more than 30 banks, presence in Moscow & London, capability to service global clients
- The platform offers solutions for liquidity aggregation, matching and algo execution across multiple FX instruments
- NTPro's SPOT-only ADTV in 2019 reached USD 4.5bln, exceeding MOEX's USD 4.1bln
- The deal fits MOEX Group Strategy 2024, addresses new trends and challenges on global and Russian FX market
- Global exchange peers such as Deutsche Boerse, BATS, Euronext, etc made similar acquisitions
- NTPro has potential synergies with MOEX in post-trade and risk management

### Local institutional investors: the potential of **pension funds**

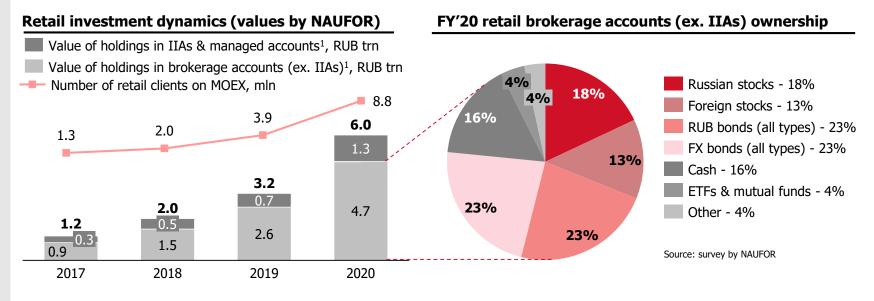

#### Key highlights of the pension reform

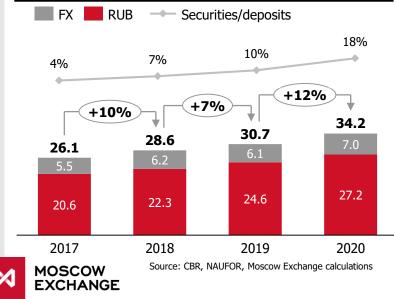

- Bank of Russia became a regulator of the pension system in 2013
- Adopted changes in non-state pension fund regulation:
  - "One year non-loss" rule was abolished
  - Investment horizon of NPFs was extended to 5 years
  - Customers are now incentivized to stay with the fund for not less than 5 years
  - $\geq$  Guarantee fund mechanism (similar to the Deposit Insurance Agency in the banking system)
  - New allocations to NPFs remained under moratorium until 2019, which reduced growth potential and left room for organic growth only

### Local retail investors: ongoing growth

#### Bank deposits of retail investors

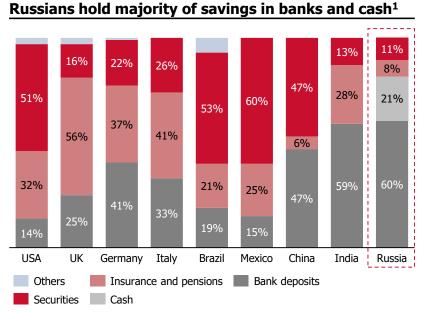

#### **Comments**

- Self-managed retail holdings in Russian stocks are RUB 0.94 trn as per NAUFOR data, or 1.8%² of the Russian equity MCap at FY'20.
- Estimated² net inflow of self-managed retail investors' funds in Russian stocks in 2020 was RUB 207.5 bln or USD 2.8 bln ( $\Delta$ value of holdings adjusted for cap. gains and dividends).
- The value of retail investors' holdings constitutes 18% of retail banking deposits as of end-2020.
- Top-3 asset classes held by retail brokerage accounts are: 46% bonds (all types), 32% stocks (local+foreign), 16% cash.
- Banking deposits added 12% YoY in 2020 despite accelerated growth of investments in securities, indicating further potential for conversion. 24

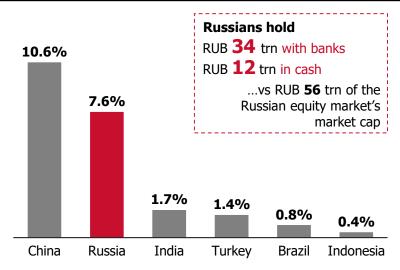

Including: (1) brokerage IIAs, (2) AM IIAs, (3) AM managed accounts and (4) brokerage accounts 1

#### Unique retail clients as % of population²

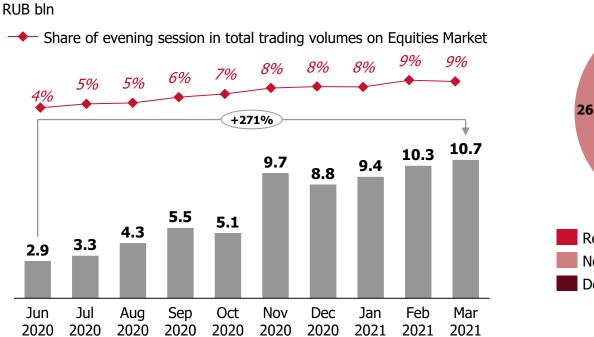

#### Number of unique retail clients

#### New retail clients (net)

### The start of evening trading session on the Equities Market

Breakdown by client type (1Q'21)

- On 22 June 2020, the 25 most liquid stocks from the MOEX Russia Index were admitted to after-hours trading
- On 3 August 2020, all stocks from MOEX Russia Index were admitted to after-hours equity trading
- On 24 August 2020, foreign shares were added to after-hours

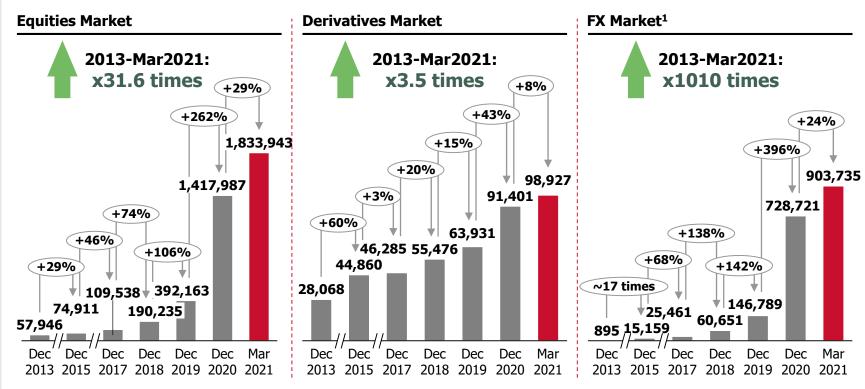

Average Daily Trading Volume (ADTV)¹

- On 21 September 2020, MAIL, QIWI, POGR and RSTI were admitted to evening trading session
- On 9 November 2020, all ETFs and 3 Russian-law ETFs were admitted to evening trading session. On 3 March 2021, 1 more Russian-law ETF was admitted.
- Record high share of retail investors has traded during the after-hours session, in line with the Exchange's expectations

### Retail clients: a growing segment of the Russian financial market

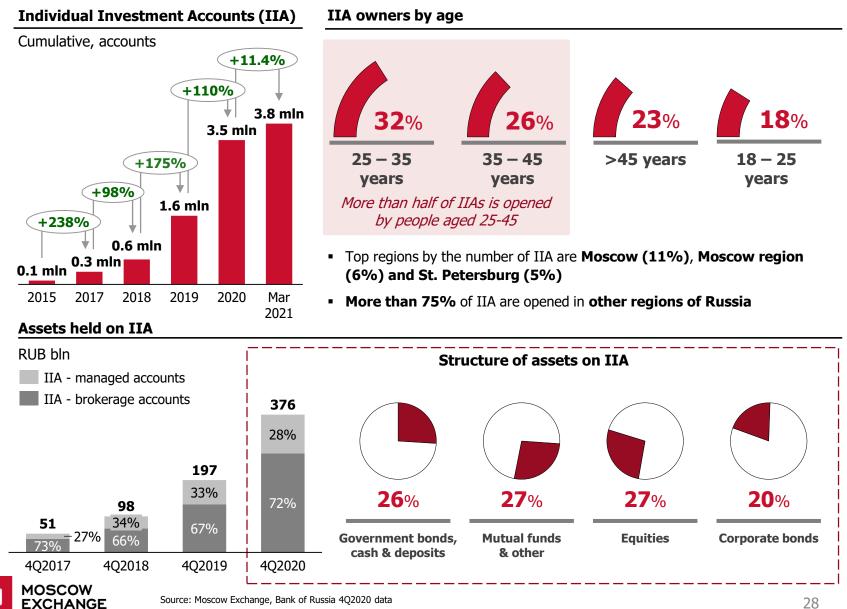

#### Number of active retail client accounts

#### Regulatory changes stimulating retail participation in financial market:

- Introduction of tax-advantaged individual investment accounts (IIAs) for private investors since 2015
- IIAs turned even more relevant in 2021, when bond coupons and interest on deposit (principal > RUB 1mln) became taxable
- Tax exemption on capital gains on securities held for 3+ years (up to RUB 9 mln for securities purchased after 1 Jan 2014)
- Retail investors can **remotely open a brokerage account**. It is particularly important in Russia's far-flung regions.

### **Individual Investment Accounts (IIA)** in detail

# **CAPEX and OPEX: 2020-2021**

**Capital expenditures** 

#### RUB bln Capex % of operating income 8.2% 6.7% 5.4% 5.1% 5.0% 5.0% 2.6% +42% +47% -46% +219% +9% +4% 3.6 3.2 2.5 2.2 1.9 2.0 0.8 2014 2015 2016 2017 2018 2019 2020

**Operating expenses (excluding provisions)** 

- 2020 CAPEX was RUB 3.24 bln, which is above the guided range of RUB 2.6-2.8 bln. The difference is fully explained by frontloading a part of the expenses on software and licenses.
- In 2021, the CAPEX guidance range is RUB 3.0-4.0 bln.
- The 2020 split between maintenance and development CAPEX was 60% maintenance / 40% development. High share of maintenance is largely explained by the transition to remote working.
- The top 5 projects account for 24% of CAPEX, with the Marketplace consuming RUB 0.5 bln.

- The actual growth of OPEX in 2020 was 8.5% YoY, hitting the upper limit of the revised guidance range of 7.5-8.5%.
- The main driver of OPEX growth in 2020 was personnel expense, which increased 18.9% mainly driven by an increase in the number of employees.
- The 2021 OPEX growth guidance range is 11.0-14.0% YoY. The option to spend on Marketplace marketing adds up to 6% to the aforementioned range. The composition is:

5-6 p.p. YoY – business as usual

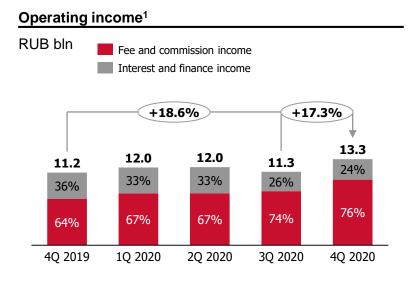

6-8 p.p. YoY – a family of development projects

0-6 p.p. YoY - Marketplace marketing option

Repo with CCP trading volumes, RUB trln

#### Comments

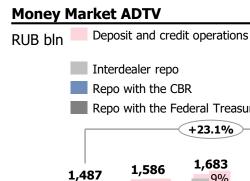

- F&C income grew 45.9% YoY. Trading volumes increased 23.1% YoY.
- The discrepancy between the YoY dynamics of F&C income and volumes was due to: [1] an expansion of average repo terms, [2] higher shares of CCP and GCC repo in total volumes.
- GCC repo volumes increased by 91.6% YoY, supported by higher demand for this type of repo and the Federal Treasury deposits' open interest and term.
- The share of CCP repo in total² repo volumes stood at 90% in 2020.

4Q 2020

#### Fee & commission income breakdown

4Q 2020

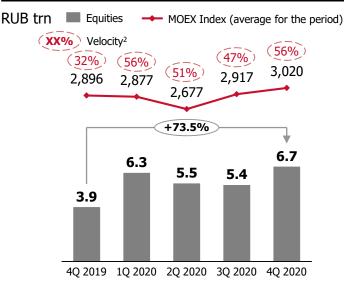

- F&C income added 41.9% YoY; average assets on deposit grew by 16.3% YoY.
- The YoY growth in assets on deposit was registered across all asset classes: federal government bonds were up 50.8% YoY, corporate and regional bonds were up 10.3% YoY, equities were up 2.6% YoY.
- F&C income growth compared to 4Q'19 was driven mainly by safekeeping, depository transactions and clearing services.
- The discrepancy between growth rates of F&C income and assets on deposit is the result of business lines beyond safekeeping, primarily clearing and collateral management services, which are a reflection of repo operations at the NSD.

### **Increasing popularity of Individual Investment Accounts**

Individual Investment Accounts, thousands, end-of-period

#### Comments

- Equity trading volumes and F&C income grew 73.5% YoY and 67.4% YoY, respectively.
- The average level of IMOEX index in 4Q'20 reached an all-time high, contributing to the growth in volumes and fee income.
- Insignificant discrepancy between F&C income and trading volume dynamics was due to the tariff structure that provides fee incentives for higher volume traded.
- 4Q'20 trading velocity surged to reach the 1Q'20 level of 56%.
- 19 ETFs were admitted to after-hours (a.k.a. evening) trading session. Evening trading now amounts to approx. 9% of ADTV.
- MOEX's market share vs LSE in trading of dual-listed stocks was at an all-time high of 79% in 2020 (up from 69% in 2019).

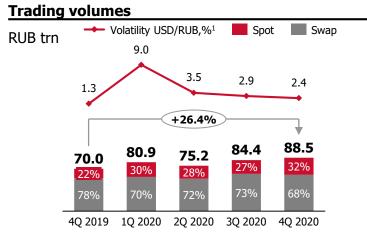

Source: Moscow Exchange, WFE 1

## **FX Market**

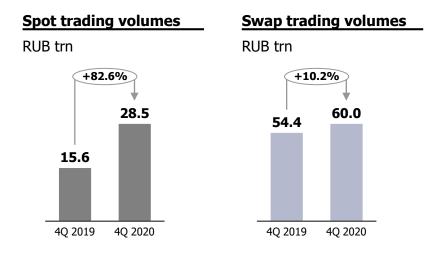

4Q 2020

### Fee & commission income

RUB mln

#### **Comments**

- Fee income increased by 33.2% YoY on the back of trading volume growth of 26.4% YoY.
- Spot volumes were up 82.6% YoY, driving the favorable change in volume mix. Swap and forward volumes improved by 10.2% YoY.
- The share of retail in the spot market volumes reached nearly 13% in 4Q'20 (8% in 4Q'19) as the number of active retail clients was up nearly 5x to 730,000².
- ADTV of corporates increased ~50% YoY in 4Q'20.
- USD/RUB spot trading volumes doubled YoY, being the largest contributor to spot market growth among FX pairs.
- MOEX's 4Q'20 market share vs onshore OTC approached 46% vs 43% in 4Q'19.
- In FY'20, large trades (a.k.a. speed bump) mode volumes were up 5x times. Combined trading volumes in OTCT and OTCF modes (a.k.a. links to foreign liquidity providers) increased 2x times.

4Q 2020

11%

#### **Open interest**

- F&C grew 40.6% YoY, trading volumes increased by 82.5% YoY.
- Trading volumes of FX derivatives almost tripled YoY, largely driving volume growth.
- Index derivatives volumes added 66.8% YoY, while volumes of equity derivatives were virtually flat, adding only 2.6% YoY.
- Trading volumes of commodity contracts declined by 3.6% YoY.
- The share of options in the trading volume mix decreased YoY to 3.7% (from 6.3% in 4Q'19) and stood unchanged QoQ.
- The effective fee was down YoY due to: [1] a shift in the mix towards less profitable FX and index derivatives (80% in 4Q'20 vs 63% in 4Q'19), [2] lower share of options.

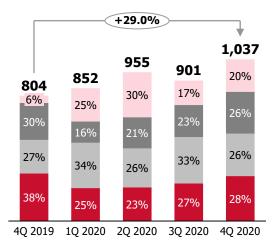

# IT Services, Listing and Other Fee Income (ITSLOFI)

#### ITSLOFI1

4Q 2020

#### RUB mln

- Other fee and commission income
- Listing and other fees related to Securities Market
  - Information services
  - Sale of software and technical services

- Listing and other fees related to the Securities Market increased by 13.5% YoY.
- Sales of information services rose by 27.0% YoY, mainly due to a weaker RUB and expansion of the client base.
- Sales of software and technical services decreased by 5.7% YoY.
- Other fee and commission income was up more than 4x YoY explained by the introduction of the additional fee on EUR balances.
- The additional fee for recording individual clearing collateral on EUR balances is 0.2% on top of the ECB rate, effective 1 January 2020.

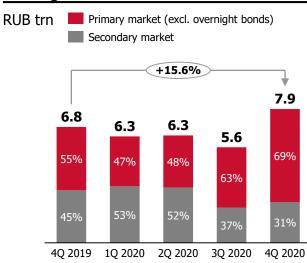

## **Fixed Income Market**

#### Trading volumes¹

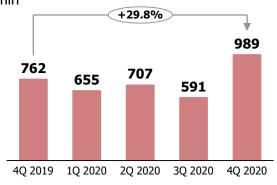

10%

4Q 2020

### Fee & commission income

RUB mln

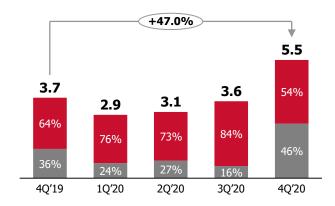

### Primary market (excluding overnight bonds)

RUB trn

Government and CBR bonds (OFZ, OBR)

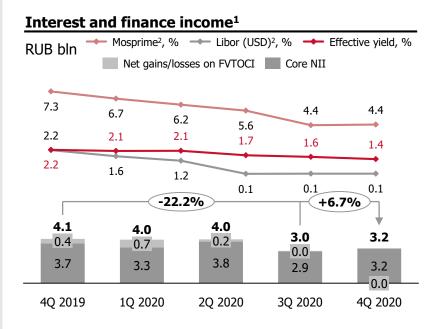

Corporate, municipal and other bonds (excluding ON bonds)

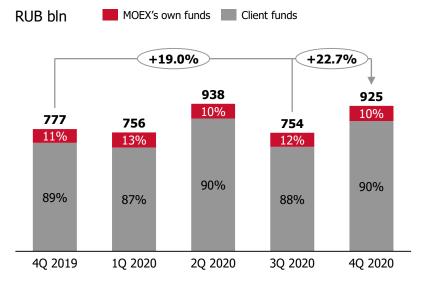

- Fee income expanded 29.8% YoY with trading volumes (excl. overnight bonds) increasing by 15.6% YoY.
- Primary market volumes (excluding overnight bonds) improved 47.0% YoY. Bond placements on MOEX hit a new high in 4Q'20. Corporate placements nearly doubled YoY due to the accommodating interest rate environment.
- Secondary trading volumes decreased 22.2% YoY as buy-andhold approach prevailed, particularly in OFZs. Secondary trading of OFZ was down 24.7% YoY, other bonds declined 18.0% YoY.
- The effective fee dynamics was supported by a higher fraction of corporate placements and OFZs and a lower fraction of short-term OBRs in the primary market.

Headcount, number of employees EOP

RUB mln	4Q 2019	4Q 2020	Change YoY
Personnel expenses	1784.4	2389.2	<i>33.9%</i>
D&A and IT maintenance	1302.7	1347.8	3.5%
Remaining administrative expenses ¹	961.7	973.8	1.3%
Total OPEX	4048.8	4710.8	<i>16.4%</i>
Cost / Income Ratio	36.2%	35.5%	-0.7 p.p

#### Comments

- OPEX for 4Q'20 added 16.4% YoY, largely explained by the growth in personnel expenses.
- Personnel expenses growth of 33.9% YoY decomposes into: [1] 10.4 p.p. headcount growth, [2] 8.8 p.p. extra bonus accruals resulting from outperformance on KPIs, [3] 7.4 p.p. net LTIP effect, [4] 7.2 p.p. other factors, incl. general wage increases.
- Half of OPEX growth is explained by the extra bonus provision triggered by the strong financial performance and the new LTIP effect that kicked in from July 2020 onwards.
- D&A and IT maintenance added 3.5% YoY, driven by a 29.3% YoY increase in equipment & intangible assets maintenance.
- CAPEX for 4Q'20 was RUB 1.02 bln and RUB 3.24 bln for 12M'20.
