

**MOSCOW
EXCHANGE**

June 2021

Investor presentation

History of MOEX: the path of ongoing progress

Investment and corporate highlights

Financial Resilience

- **Counter-cyclical business model** coupled with robust cost control
- **Secular growth of fees and commissions** (F&C) across 7 complimentary F&C business lines
- Business-driven margin and collateral requirements generate **sustainable net interest income** (NII)
- Operating income F&C/NII split of 70/30 **evolving towards F&C**
- One of the **highest EBITDA margins** among global peers
- **Attractive dividend policy:** min. payout of 60%; target payout of 100% FCFE; track record of distributing 55-89% of 2014-2020 profits

Corporate Governance

- A **29-year history** of successful and continuous implementation of infrastructural and regulatory reforms
- **No single controlling shareholder:** free float of 63% with substantial international participation; the largest shareholder owns <12%
- Most Supervisory Board members are **independent directors** (8 out of 12)
- Established track record for **efficient capital allocation**

Strategic Stance

- Low penetration of financial services indicates **secular growth potential**
- The world's **most diversified exchange** with trading in **5 asset classes** vs ~3 offered by "traditional" exchanges
- **Complete vertical integration** of a trading engine with a clearing house and a central securities depository makes up a **unique platform**
- **Cornerstone** of the Russian financial system: MOEX brings together the tiers of the banking system by managing ~3/4 of its total liquidity flow
- The world's **only exchange** focused on Russian financial assets in the market is open for competition (ex. the CSD). OTC is the main competitor
- B2B business model: investors trade via **locally licensed** brokers and banks. Foreign investors have **SMA and ICM services** at their disposal

Operational Excellence

- **All-electronic** since 1997
- Vast **in-house IT expertise:** ~1/3 of staff are IT developers, supporting a **CAPEX-light business model**
- Single-tier clearing system requires all participants to provide **eligible collateral** in cash or securities to trade any asset class
- **Pre-trade risk checks** forestall any "fat fingers"/"flash crash" problems
- **Low-cost product scalability:** a new order book launch requires the equivalent of circa USD 10 thousand

...and one of the highest free-floats in Russia²

Growing liquidity of MOEX shares³

Transparency and international recognition

- **International index providers** MSCI and MVIS include MOEX shares in their indices
- **Voluntary disclosures** and regular updates of investor materials, including monthly trading results
- Annual **MOEX Forums** in Moscow, New York, London and Shanghai have become well-known venues to maintain dialogue with international market participants
- **Robust investor relations program:**
 - ✓ ~300 investor meetings per annum in 2016-2020
 - ✓ IR activities in Russia, the UK, Europe, Asia and the US to maintain dialogue with overseas investors
 - ✓ IR awards in Russia in 2014-2017

2020 Dividend: explaining the new formula

RUB bln

Comments

- MOEX has been paying substantial dividends since the onset of its public history
- Dividend policy approved in October 2019 sets 60% of net profit as the minimum payout and **the target payout of 100% FCFE**
- In 2020 a DPS of RUB 7.93 for 2019, which amounts to 89% of the consolidated IFRS net profit for the year, was paid out
- In 2021 a DPS of RUB 9.45 for 2020, which amounts to 85% of the consolidated IFRS net profit for the year, was paid out

MOSCOW EXCHANGE

Sources: Bloomberg, Moscow Exchange
¹ Bloomberg data as of 01 June 2021

Overview of KPIs and incentives

Highlights of delivery across 2020 KPI areas

Financial performance

- F&C income growth
- Positive operating jaws b/w F&C and OPEX excl. provisions
- OPEX excl. D&A and provisions to F&C income ratio down

Infrastructure quality

- 99.99% MOEX systems' up-time
- Cybersecurity improvements
- Further reduce operational risk, incl. IT and compliance upgrades

New products and services

- Evening trading session on Equities Market
- Preparations for morning trading session on FX and Derivatives

New Long Term Incentive Program (LTIP) launched in mid-2020

Naturally aligns long-term interests of shareholders and the management team

Based on existing shares, not options => predictable for both beneficiaries and investors, has no embedded leverage

The value of incentive is determined by: (1) financial performance, (2) share price performance, (3) accrued dividends

The program term is 5 years, in line with the strategy; vesting in years 3, 4, 5 in three equal tranches

Every tranche is dependent on achieving KPIs, which are linked to F&C income growth and relevant regulation

70 key employees might earn up to 18 mln shares, which make up 0.8% of MOEX's Market Cap

MICEX-Finance holds 18 mln treasury shares => no new issuance, no dilution required

NTPro acquisition profile

What is the structure of the deal?

- Phased acquisition of up to 100% of BierbaumPro AG, a parent company owning 100% of NTPProgress;
- NTPProgress is BierbaumPro's main asset;
- NTPProgress runs and develops the proprietary OTC FX trading platform called NTPro;
- MOEX acquired a 25% stake. Further consolidation depends on NTPro's performance;
- The entire deal might take up to 3 years. The final price is also conditional.

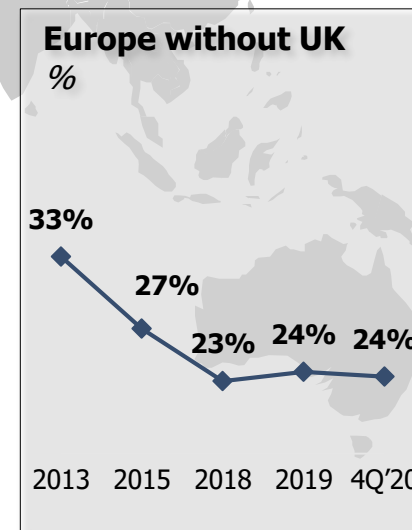

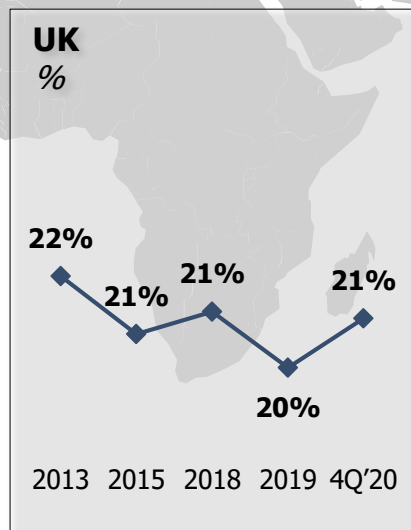

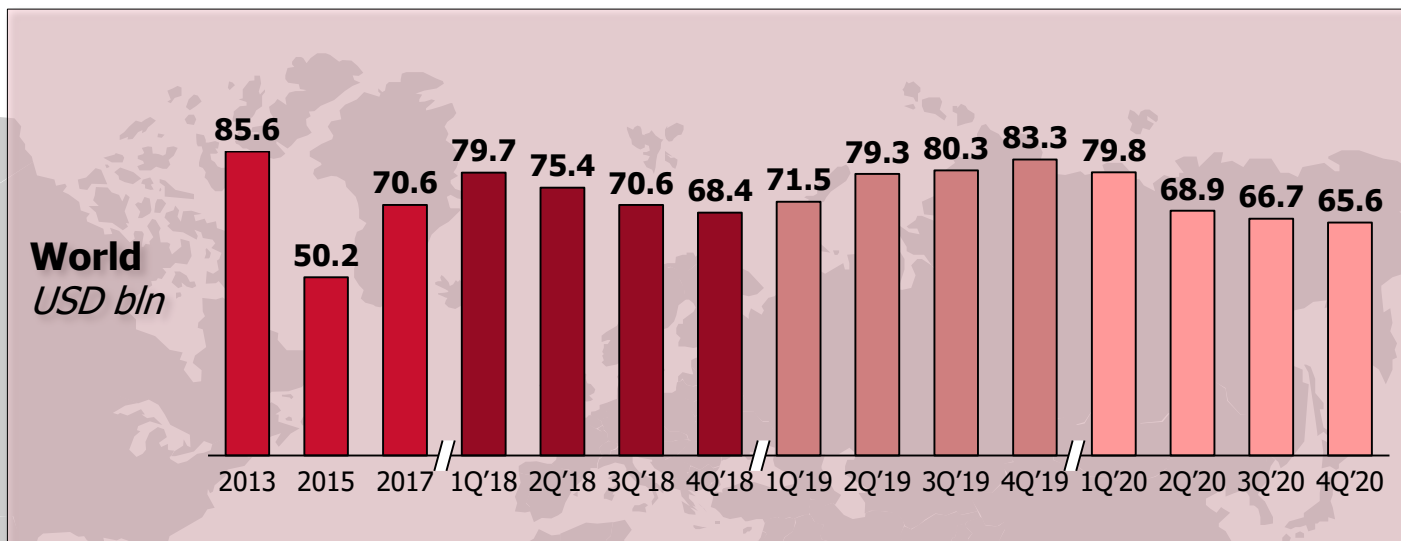

Deal rationale

- Since its launch in 2016, NTPProgress has become one of the leading platforms on the Russian electronic OTC FX market
- NTPProgress has a client base of more than 30 banks, presence in Moscow & London, capability to service global clients
- The platform offers solutions for liquidity aggregation, matching and algo execution across multiple FX instruments
- NTPro's SPOT-only ADTV in 2019 reached USD 4.5bln, exceeding MOEX's USD 4.1bln
- The deal fits MOEX Group Strategy 2024, addresses new trends and challenges on global and Russian FX market
- Global exchange peers such as Deutsche Boerse, BATS, Euronext, etc made similar acquisitions
- NTPro has potential synergies with MOEX in post-trade and risk management

Local institutional investors: the potential of pension funds

Pension assets in Russia

RUB trn

Non-state pension funds asset allocation dynamics¹

Key highlights of the pension reform

- Bank of Russia became a regulator of the pension system in 2013
- Adopted changes in non-state pension fund regulation:
 - “One year non-loss” rule was abolished
 - Investment horizon of NPFs was extended to 5 years
 - Customers are now incentivized to stay with the fund for not less than 5 years
 - Guarantee fund mechanism (similar to the Deposit Insurance Agency in the banking system)
 - New allocations to NPFs remained under moratorium, leaving room for organic growth only

Local retail investors: ongoing growth

Retail investment dynamics (values by NAUFOR)

Bank deposits of retail investors

- FX
- RUB
- Securities/deposits

Source: CBR, NAUFOR, Moscow Exchange calculations

Comments

- Self-managed retail holdings in Russian stocks are RUB 0.94 trn as per NAUFOR data, or 1.8%² of the Russian equity MCap at FY'20.
- Estimated² net inflow of self-managed retail investors' funds in Russian stocks in 2020 was RUB 207.5 bln or USD 2.8 bln (Δ value of holdings adjusted for cap. gains and dividends).
- The value of retail investors' holdings constitutes 18% of retail banking deposits as of end-2020.
- Top-3 asset classes held by retail brokerage accounts are: 46% bonds (all types), 32% stocks (local+foreign), 16% cash.
- Banking deposits added 12% YoY in 2020 despite accelerated growth of investments in securities, indicating further potential for conversion.

Regulatory changes stimulating retail participation in financial market:

- Introduction of tax-advantaged **individual investment accounts (IIAs)** for private investors since 2015
- **IIAs turned even more relevant** in 2021, when bond coupons and interest on deposit (principal > RUB 1mln) became taxable
- **Tax exemption** on capital gains on securities held for 3+ years (up to RUB 9 mln for securities purchased after 1 Jan 2014)
- Retail investors can **remotely open a brokerage account**. It is particularly important in Russia's far-flung regions.

Individual Investment Accounts (IIA) in detail

MOEX business model continues to deliver

Operating income¹

Key highlights

Unique business model allows MOEX to increase operating income regardless of the stage of the economic cycle:

- **Business lines** are diversified, while markets have limited growth correlation
- **Growth drivers differ** across markets and products

Fee & commission income evolution¹

CAPEX and OPEX: 2020-2021

Capital expenditures

- 2020 CAPEX was RUB 3.24 bln, which is above the guided range of RUB 2.6-2.8 bln. The difference is fully explained by frontloading a part of the expenses on software and licenses.
- In 2021, the CAPEX guidance range is RUB 3.0-4.0 bln.
- The 2020 split between maintenance and development CAPEX was 60% maintenance / 40% development. High share of maintenance is largely explained by the transition to remote working.
- The top 5 projects account for 24% of CAPEX, with the Marketplace consuming RUB 0.5 bln.

Operating expenses (excluding provisions)

- The actual growth of OPEX in 2020 was 8.5% YoY, hitting the upper limit of the revised guidance range of 7.5-8.5%.
- The main driver of OPEX growth in 2020 was personnel expense, which increased 18.9% mainly driven by an increase in the number of employees.
- The 2021 OPEX growth guidance range is 11.0-14.0% YoY. The option to spend on Marketplace marketing adds up to 6% to the aforementioned range. The composition is:
 5-6 p.p. YoY – business as usual
 6-8 p.p. YoY – a family of development projects
 0-6 p.p. YoY – Marketplace marketing option

Money Market

Trading volumes

Fee & commission income

Trading volumes of repo with CCP

Comments

- F&C income increased by 38.7% YoY, while trading volumes decreased by 1.7% YoY.
- The discrepancy between the YoY dynamics of F&C income and volumes was due to: [1] an expansion of average repo terms, [2] higher shares of CCP and GCC repo in total volumes.
- GCC repo volumes increased by 36.0% YoY, supported by higher demand for this type of repo and the Federal Treasury deposits.
- The share of CCP repo in total² repo volumes stood at a high level of 93% for 3M'21.

Fee & commission income

Fee & commission income breakdown

1Q 2021

Comments

- F&C income added 37.9% YoY; average assets on deposit grew by 23.1% YoY.
- The YoY growth in assets on deposit was registered across all asset classes: federal government bonds were up 52.9% YoY, equities were up 20.6% YoY, corporate and regional bonds were up 6.1% YoY.
- F&C income growth compared to 1Q'20 was driven mainly by safekeeping, depository transactions and clearing services.
- The discrepancy between growth rates of F&C income and assets on deposit is the result of business lines beyond safekeeping, primarily clearing and collateral management services, which are a reflection of repo operations at the NSD.

RUB mln

Investments become popular among retail clients

Number of retail clients (end-of-period), millions

Comments

- Equity trading volumes and F&C income grew 14.2% YoY and 12.5% YoY, respectively.
- The average level of IMOEX index in 1Q'21 reached an all-time high, contributing to the growth in volumes and fee income.
- Insignificant discrepancy between F&C income and trading volume dynamics was due to the tariff structure that provides fee incentives for higher volume traded.
- 1Q'21 trading velocity remains historically elevated and nearly reached the 1Q'20 level of 56%.
- MOEX's market share vs LSE in trading of dual-listed stocks was at an all-time high of 81% for 3M'21 (up from 75% in 1Q'20).

Trading volumes

Fee & commission income

Standardized OTC derivatives trading volumes

Comments

- F&C grew 11.7% YoY, trading volumes increased by 19.4% YoY.
- Trading volumes of FX derivatives gained 39.5% YoY.
- Index derivatives volumes added 14.6% YoY, while volumes of single stock derivatives improved by just 5.1% YoY.
- Trading volumes of commodity contracts declined by 5.9% YoY.
- The share of options in the trading volume mix decreased YoY to 3.7% (from 4.9% in 1Q'20) and stood unchanged QoQ.
- Open interest on the standardized OTC derivatives market surpassed the RUB 1 trn mark.
- The effective fee was down YoY due to: [1] a shift in the mix towards less profitable FX and index derivatives (76% in 1Q'21 vs 70% in 1Q'20), [2] lower share of options.

Comments

- Fee income stood virtually flat, adding only 0.3% YoY on the back of the slight decline in trading volumes of 2.6% YoY.
- Spot volumes were up 5.6% YoY, driving the favorable change in volume mix. Swap and forward volumes decreased by 6.2% YoY.
- The share of retail in the spot market volumes reached nearly 14% in 1Q'21 (10% in 1Q'20) as the number of active retail clients was up nearly 4x to 904,000².
- ADTV of corporates increased ~135% YoY in 1Q'21.
- USD/RUB spot trading volume grew 11% YoY, being the largest contributor to spot market growth among FX pairs.
- MOEX's 1Q'21 market share vs onshore OTC was 46.8% vs 46.5% in 1Q'20.
- 250+ banks and brokers as well as 150,000+ retail clients traded during the morning trading session.

IT Services, Listing and Other Fee Income (ITSLOFI)

ITSLOFI¹

RUB mln

- Other fee and commission income
- Listing and other fees related to Securities Market
- Information services
- Sale of software and technical services

Comments

- Listing and other fees related to the Securities Market increased 14.0% YoY.
- Sales of information services declined 5.9% YoY due to a high base effect stemming from information audit proceeds in 1Q'20, which was partially offset by a weaker RUB.
- Sales of software and technical services increased 17.0% YoY, explained by organic growth and additional proceeds from sales of the newly launched ASTS FIFO MFIX protocol.
- Other fee and commission income was down 10.4% YoY, driven by the high base effect of EUR balances.
- The additional fee for recording individual clearing collateral on EUR balances is 0.2% on top of the ECB rate, effective 1 January 2020.

RUB trn

- Government and CBR bonds (OFZ, OBR)
- Corporate, municipal and other bonds (excluding ON bonds)

Fee & commission income

RUB mln

Comments

- Fee income was down 21.1% YoY with trading volumes (excl. overnight bonds) declining by 35.7% YoY.
- Primary market volumes (excl. overnight bonds) contracted by 35.3% YoY mainly due to the lower interest rate environment.
- Secondary trading volumes decreased 36.1% YoY. Secondary trading of OFZ&OBR was down 41.3% YoY, other bonds declined 21.6% YoY.
- The effective fee dynamics were supported by tariff adjustments across trading modes.
- Eurobonds of Russian companies are continuously added to the product range on the back of buoyant demand for such instruments.

- Personnel expenses

Headcount, number of employees EOP

Major expense items

RUB mln	1Q 2020	1Q 2021	Change YoY
Personnel expenses	1794.7	2394.0	33.4%
D&A and IT maintenance	1169.1	1315.0	12.5%
Remaining administrative expenses ¹	714.4	815.0	14.1%
Total OPEX	3678.2	4524.0	23.0%
Cost / Income Ratio	30.7%	35.2%	+4.5 p.p.

Comments

- OPEX for 1Q'21 added 23.0% YoY, with personnel expenses' growth accounting for 71% of the increase.
- Personnel expenses growth of 33.4% YoY decomposes into: [1] 11.6 p.p. headcount growth, [2] 9.8 p.p. net effect of bonus provisions, [3] 6.9 p.p. general wage increases, [4] 5.0 p.p. LTIP.
- ~40% of personnel expenses growth associated with the increase in headcount are explained by Marketplace hiring.
- D&A and IT maintenance added 12.5% YoY. 66% of this growth comes from D&A increase on the back of a higher CAPEX last year.
- Remaining administrative expenses grew 14.1% YoY. Variable costs linked to business expansion explain 84% of this increase.
- CAPEX for 1Q'21 was RUB 0.52 bln.
