

July 2021

Investor presentation

History of MOEX: the path of ongoing progress

2

Investment and corporate highlights

Financial Resilience

- Counter-cyclical business model coupled with robust cost control
- Secular growth of fees and commissions (F&C) across 7 complimentary F&C business lines
- Business-driven margin and collateral requirements generate sustainable net interest income (NII)
- Operating income F&C/NII split of 70/30 evolving towards F&C
- One of the **highest EBITDA margins** among global peers
- Attractive dividend policy: min. payout of 60%; target payout of 100% FCFE; track record of distributing 55-89% of 2014-2020 profits

Strategic Stance

- Low penetration of financial services indicates secular growth potential
- The world's most diversified exchange with trading in 5 asset classes vs ~3 offered by "traditional" exchanges
- Complete vertical integration of a trading engine with a clearing house and a central securities depository makes up a unique platform
- **Cornerstone** of the Russian financial system: MOEX brings together the tiers of the banking system by managing ~3/4 of its total liquidity flow
- The world's only exchange focused on Russian financial assets in the market is open for competition (ex. the CSD). OTC is the main competitor
- B2B business model: investors trade via locally licensed brokers and banks. Foreign investors have SMA and ICM services at their disposal

Corporate Governance

- A 29-year history of successful and continuous implementation of infrastructural and regulatory reforms
- **No single controlling shareholder**: free float of 63% with substantial international participation; the largest shareholder owns <12%
- Most Supervisory Board members are independent directors (8 out of 12)
- Established track record for **efficient capital allocation**

Operational Excellence

- All-electronic since 1997
- Vast in-house IT expertise: ~1/3 of staff are IT developers, supporting a CAPEX-light business model
- Single-tier clearing system requires all participants to provide eligible collateral in cash or securities to trade any asset class
- **Pre-trade risk checks** forestall any "fat fingers"/"flash crash" problems
- Low-cost product scalability: a new order book launch requires the equivalent of circa USD 10 thousand

Robust and trusted **infrastructure**

Trading platform, NCC as the Central Counterparty (CCP) and NSD as the Central Securities Depository (CSD)

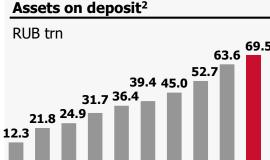

TRADING

- MOEX markets ADTV 3,8 RUB trin (2020)
- Pre-order validation (100+ risk check scenarios) ensures integrity of trades
- World class latency of 200-300 microseconds
- >500 trading members (all markets)

CLEARING

- NCC cleared ADTV 3,2 RUB trln (2020)
- NCC served as a CCP for 93% of trading volumes it cleared in 2020
- **BBB** local currency rating from Fitch
- The target NCC capital for 2021 is ~RUB 67 bln
- As of 01 July 2021, N1_{CCP} is 133.6%

Transparency and international recognition

- International index providers MSCI and MVIS include MOEX shares in their indices
- Voluntary disclosures and regular updates of investor materials, including monthly trading results
- Annual **MOEX Forums** in Moscow, New York, London and Shanghai have become well-known venues to maintain dialogue with international market participants
- Robust investor relations program:
 - √ ~300 investor meetings per annum in 2016-2020
 - ✓ IR activities in Russia, the UK, Europe, Asia and the US to maintain dialogue with overseas investors
 - ✓ IR awards in Russia in 2014-2017

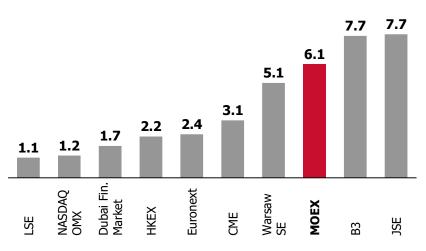

- 100% owned subsidiary of the Moscow Exchange
- 2 Free-float ranking of locally registered Russian companies included in the MOEX Index (as of 13.07.2021); Company data
- Trading volumes in the main trading mode (T0, T+2)
- 4 Calculated as annual trading volume divided by average market capitalization of the free-float
- 5 The ranking includes ordinary and preferred shares

The established dividend story continues

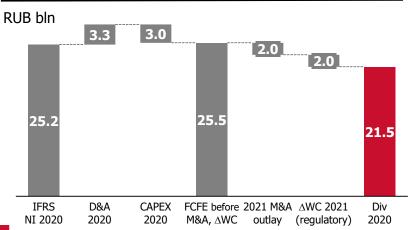

Dividend yields of MOEX and exchange peers, 2021E¹

%

2020 Dividend: explaining the new formula

Comments

- MOEX has been paying substantial dividends since the onset of its public history
- Dividend policy approved in October 2019 sets 60% of net profit as the minimum payout and the target payout of 100% FCFE
- In 2020 a DPS of RUB 7.93 for 2019, which amounts to 89% of the consolidated IFRS net profit for the year, was paid out
- In 2021 a DPS of RUB 9.45 for 2020, which amounts to 85% of the consolidated IFRS net profit for the year, was paid out

Overview of KPIs and incentives

Highlights of delivery across 2020 KPI areas

Financial performance

- > F&C income growth
- Positive operating jaws b/w F&C and OPEX excl. provisions
- ➤ OPEX excl. D&A and provisions to F&C income ratio down

Infrastructure quality

- > 99.99% MOEX systems' up-time
- > Cybersecurity improvements
- ➤ Further reduce operational risk, incl. IT and compliance upgrades

New products and services

- Evening trading session on Equities Market
- Preparations for morning trading session on FX and Derivatives

New Long Term Incentive Program (LTIP) launched in mid-2020

- Naturally aligns long-term interests of shareholders and the management team
- Based on existing shares, not options => predictable for both beneficiaries and investors, has no embedded leverage
- The value of incentive is determined by: (1) financial performance, (2) share price performance, (3) accrued dividends
- The program term is 5 years, in line with the strategy; vesting in years 3, 4, 5 in three equal tranches
- Every tranche is dependent on achieving KPIs, which are linked to F&C income growth and relevant regulation
- 70 key employees might earn up to 18 mln shares, which make up 0.8% of MOEX's Market Cap
- MICEX-Finance holds 18 mln treasury shares => no new issuance, no dilution required

NTPro acquisition profile

What is the structure of the deal?

- Phased acquisition of up to 100% of BierbaumPro AG, a parent company owning 100% of NTProgress;
- NTProgress is BierbaumPro's main asset;
- NTProgress runs and develops the proprietary OTC FX trading platform called NTPro;
- MOEX acquired a 25% stake. Further consolidation depends on NTPro's performance;
- The entire deal might take up to 3 years. The final price is also conditional.

Russian FX market SPOT volumes migrate to OTC

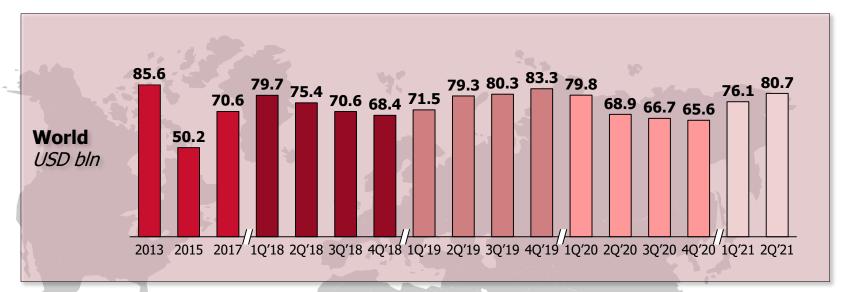

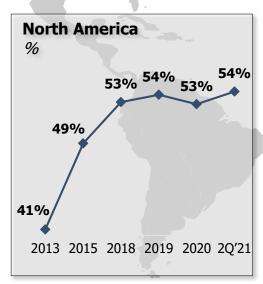

Deal rationale

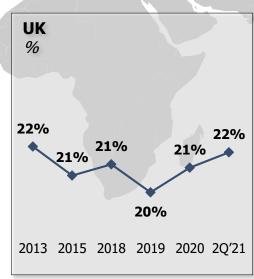

- Since its launch in 2016, NTProgress has become one of the leading platforms on the Russian electronic OTC FX market
- NTProgress has a client base of more than 30 banks, presence in Moscow & London, capability to service global clients
- The platform offers solutions for liquidity aggregation, matching and algo execution across multiple FX instruments
- NTPro's SPOT-only ADTV in 2019 reached USD 4.5bln, exceeding MOEX's USD 4.1bln
- The deal fits MOEX Group Strategy 2024, addresses new trends and challenges on global and Russian FX market
- Global exchange peers such as Deutsche Boerse, BATS, Euronext, etc made similar acquisitions
- NTPro has potential synergies with MOEX in post-trade and risk management

Local institutional investors: the potential of **pension funds**

Key highlights of the pension reform

- Bank of Russia became a regulator of the pension system in 2013
- Adopted changes in non-state pension fund regulation:
 - "One year non-loss" rule was abolished
 - Investment horizon of NPFs was extended to 5 years
 - Customers are now incentivized to stay with the fund for not less than 5 years
 - Guarantee fund mechanism (similar to the Deposit Insurance Agency in the banking system)
 - > New allocations to NPFs remained under moratorium, leaving room for organic growth only

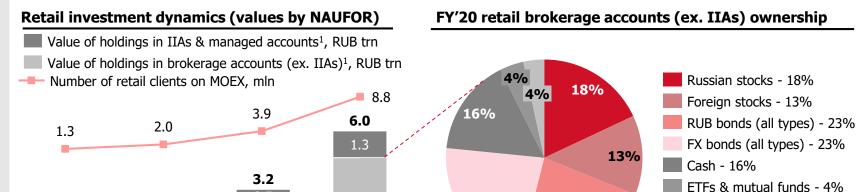

Local retail investors: ongoing growth

23%

Self-managed retail holdings in Russian stocks are RUB 0.94 trn as per NAUFOR data, or 1.8%² of the Russian equity MCap at FY'20.

23%

Other - 4%

Source: survey by NAUFOR

- Estimated² net inflow of self-managed retail investors' funds in Russian stocks in 2020 was RUB 207.5 bln or USD 2.8 bln (Δ value of holdings adjusted for cap. gains and dividends).
- The value of retail investors' holdings constitutes 18% of retail banking deposits as of end-2020.
- Top-3 asset classes held by retail brokerage accounts are: 46% bonds (all types), 32% stocks (local+foreign), 16% cash.
- Banking deposits added 12% YoY in 2020 despite accelerated growth of investments in securities, indicating further potential for conversion. 24
- Including: (1) brokerage IIAs, (2) AM IIAs, (3) AM managed accounts and (4) brokerage accounts

- As of the end of 2018, Russia 2020
- Russia 2021, Turkey 2018, Indonesia, Brazil 2021, China as of 2019 beginning
- Excluding real estate escrow accounts

The extension of trading hours: morning & evening sessions

Evening trading session on Equities Market

Record-high share of retail investors in trading volumes:

- 63% during after-hours vs 40% of the overall Equities Market ADTV
- Every 5th client uses the opportunity to trade during the afterhours on the Equities Market

Morning trading session on Derivatives and FX Markets

7:00 - 10:00 morning trading session (launched Mar 1, 2021) 10:00 - 19:00 main trading session 19:00 - 23:50 evening trading session

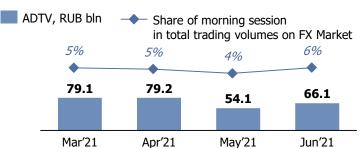

Morning trading session on Derivatives Market:

 Retail investors' share in trading volumes: 60% during the morning session vs 44% of the overall volumes on Derivatives Market

Morning trading session on FX Market:

 Retail investors' share in trading volumes: 13% during the morning session vs 5% of the overall volumes on FX Market

Retail clients: a growing segment of the Russian financial market

Number of active retail client accounts

Regulatory changes stimulating retail participation in financial market:

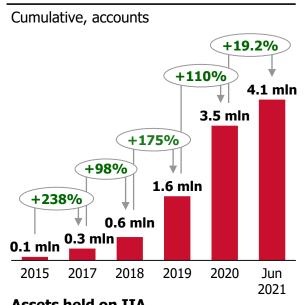

- Introduction of tax-advantaged individual investment accounts (IIAs) for private investors since 2015
- IIAs turned even more relevant in 2021, when bond coupons and interest on deposit (principal > RUB 1mln) became taxable
- **Tax exemption** on capital gains on securities held for 3+ years (up to RUB 9 mln for securities purchased after 1 Jan 2014)
- Retail investors can remotely open a brokerage account. It is particularly important in Russia's far-flung regions.

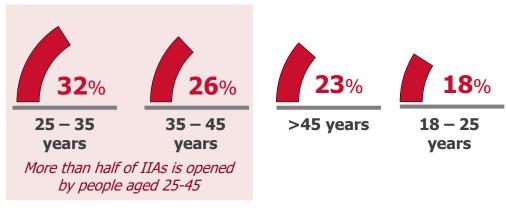

Individual Investment Accounts (IIA) in detail

Individual Investment Accounts (IIA)

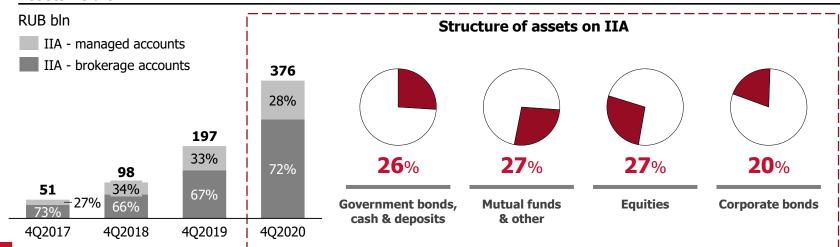

IIA owners by age

- Top regions by the number of IIA are Moscow (11%), Moscow region (6%) and St. Petersburg (5%)
- More than 75% of IIA are opened in other regions of Russia

Assets held on IIA

CAPEX and OPEX: 2020-2021

Capital expenditures

- 2020 CAPEX was RUB 3.24 bln, which is above the guided range of RUB 2.6-2.8 bln. The difference is fully explained by frontloading a part of the expenses on software and licenses.
- In 2021, the CAPEX guidance range is RUB 3.0-4.0 bln.
- The 2020 split between maintenance and development CAPEX was 60% maintenance / 40% development. High share of maintenance is largely explained by the transition to remote working.
- The top 5 projects account for 24% of CAPEX, with the Marketplace consuming RUB 0.5 bln.

Operating expenses (excluding provisions)

- The actual growth of OPEX in 2020 was 8.5% YoY, hitting the upper limit of the revised guidance range of 7.5-8.5%.
- The main driver of OPEX growth in 2020 was personnel expense, which increased 18.9% mainly driven by an increase in the number of employees.
- The 2021 OPEX growth guidance range is 11.0-14.0% YoY.
 The option to spend on Marketplace marketing adds up to 6% to the aforementioned range. The composition is:

5-6 p.p. YoY – business as usual

6-8 p.p. YoY – a family of development projects

0-6 p.p. YoY - Marketplace marketing option

RUB mln

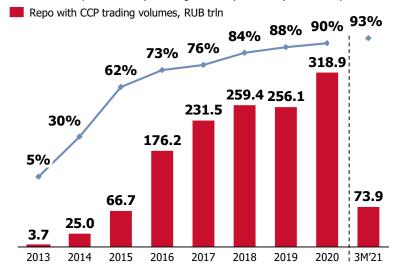

MOSCOW EXCHANGE

Trading volumes of repo with CCP

RUB trn, %

Comments

- F&C income increased by 38.7% YoY, while trading volumes decreased by 1.7% YoY.
- The discrepancy between the YoY dynamics of F&C income and volumes was due to: [1] an expansion of average repo terms, [2] higher shares of CCP and GCC repo in total volumes.
- GCC repo volumes increased by 36.0% YoY, supported by higher demand for this type of repo and the Federal Treasury deposits.
- The share of CCP repo in total² repo volumes stood at a high level of 93% for 3M'21.

Depository and Settlement Services

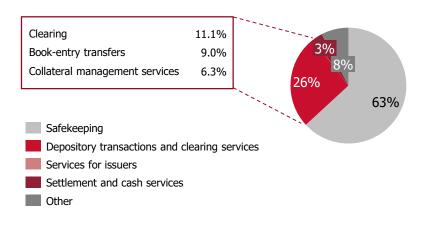

Fee & commission income

Fee & commission income breakdown

Comments

- F&C income added 37.9% YoY; average assets on deposit grew by 23.1% YoY.
- The YoY growth in assets on deposit was registered across all asset classes: federal government bonds were up 52.9% YoY, equities were up 20.6% YoY, corporate and regional bonds were up 6.1% YoY.
- F&C income growth compared to 1Q'20 was driven mainly by safekeeping, depository transactions and clearing services.
- The discrepancy between growth rates of F&C income and assets on deposit is the result of business lines beyond safekeeping, primarily clearing and collateral management services, which are a reflection of repo operations at the NSD.

Fee & commission income

Investments become popular among retail clients

Number of retail clients (end-of-period), millions

Comments

- Equity trading volumes and F&C income grew 14.2% YoY and 12.5% YoY, respectively.
- The average level of IMOEX index in 1Q'21 reached an all-time high, contributing to the growth in volumes and fee income.
- Insignificant discrepancy between F&C income and trading volume dynamics was due to the tariff structure that provides fee incentives for higher volume traded.
- 1Q'21 trading velocity remains historically elevated and nearly reached the 1Q'20 level of 56%.
- MOEX's market share vs LSE in trading of dual-listed stocks was at an all-time high of 81% for 3M'21 (up from 75% in 1Q'20).

MOSCOW EXCHANGE

Standardized OTC derivatives trading volumes

RUB bln

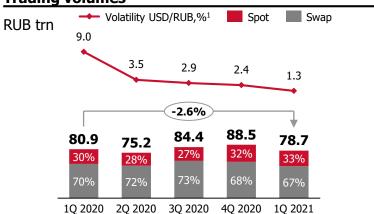

Comments

- F&C grew 11.7% YoY, trading volumes increased by 19.4% YoY.
- Trading volumes of FX derivatives gained 39.5% YoY.
- Index derivatives volumes added 14.6% YoY, while volumes of single stock derivatives improved by just 5.1% YoY.
- Trading volumes of commodity contracts declined by 5.9% YoY.
- The share of options in the trading volume mix decreased YoY to 3.7% (from 4.9% in 1Q'20) and stood unchanged QoQ.
- Open interest on the standardized OTC derivatives market surpassed the RUB 1 trn mark.
- The effective fee was down YoY due to: [1] a shift in the mix towards less profitable FX and index derivatives (76% in 1Q'21 vs 70% in 1Q'20), [2] lower share of options.

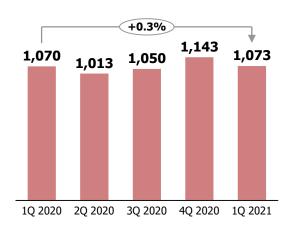

FX Market

IT Services, Listing and Other Fee Income (ITSLOFI)

ITSLOFI¹

RUB mln

- Other fee and commission income
- Listing and other fees related to Securities Market
- Information services
- Sale of software and technical services

Comments

- Listing and other fees related to the Securities Market increased 14.0% YoY.
- Sales of information services declined 5.9% YoY due to a high base effect stemming from information audit proceeds in 1Q'20, which was partially offset by a weaker RUB.
- Sales of software and technical services increased 17.0% YoY, explained by organic growth and additional proceeds from sales of the newly launched ASTS FIFO MFIX protocol.
- Other fee and commission income was down 10.4% YoY, driven by the high base effect of EUR balances.
- The additional fee for recording individual clearing collateral on EUR balances is 0.2% on top of the ECB rate, effective 1 January 2020.

Secondary market

Fee & commission income

RUB mln

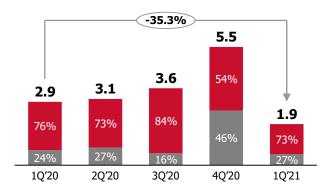

MOSCOW EXCHANGE

Primary market (excluding overnight bonds)

RUB trn

Corporate, municipal and other bonds (excluding ON bonds)

Comments

- Fee income was down 21.1% YoY with trading volumes (excl. overnight bonds) declining by 35.7% YoY.
- Primary market volumes (excl. overnight bonds) contracted by 35.3% YoY mainly due to the lower interest rate environment.
- Secondary trading volumes decreased 36.1% YoY. Secondary trading of OFZ&OBR was down 41.3% YoY, other bonds declined 21.6% YoY.
- The effective fee dynamics were supported by tariff adjustments across trading modes.
- Eurobonds of Russian companies are continuously added to the product range on the back of buoyant demand for such instruments.
