Over the week of April 29 - May 3, 2013 the Moscow Exchange Indices reflected the positive trend on the Russian stock market. The MICEX Index was up 2.62% to 1,408.03 (1,372.04 as of April 26, 2013) and the dollar-denominated RTS Index grew by 3.45% to 1,429.86 (1,382.22 as of April 26, 2013).

The US dollar depreciated by 0.87% against the ruble last week.

The stock market volatility decreased last week with the Russian Volatility Index falling by 7.73% to 18.99 (20.58 as of April 26, 2013).

Last week most of the key economic sectors represented on the Russian stock market behaved positively. The largest upturn was reported by the electric utilities with the relevant sector index rising by 11.04%. A significant increase was also shown by the financials and the consumer goods and retail with the relevant sector indices being up 3.69% and 3.06% respectively.

The MICEX Innovation Index added 1.75% to 409.19 (402.16 as of April 26, 2013).

The RTS Standard Index, the blue chip index, increased by 2.24% to 9,498.95 (9,290.47 as of April 26, 2013).

Second-tier stocks indices experienced the positive trend. The ruble-denominated MICEX SC Index appreciated by 3.31% to 3,084.90 (2,985.96 as of April 26, 2013). The dollar-denominated RTS-2 Index gained 3.65% to 1,347.40 (1,299.94 as of April 26, 2013).

MICEX & RTS Indices, the main indices of the Moscow Exchange

*for the constituent stocks

Stocks prices impact on indices, %

Weekly impact on indices	Up	Down	Total influence. %
MICEX Index	+3.62%	-1.00%	+2.62%
RTS Index	+4.31%	-0.86%	+3.45%

Over the week of April 29 - May 3, 2013 the Moscow Exchange Indices reflected the positive trend on the Russian stock market. The MICEX Index was up 2.62% to 1,408.03 (1,372.04 as of April 26, 2013) and the dollar-denominated RTS Index grew by 3.45% to 1,429.86 (1,382.22 as of April 26, 2013).

At the end of the week the MICEX Index was 1.39% lower than a month ago (1,427.94 as of April 3, 2013) and 2.40% lower than a year ago (1,442.71 as of May 3, 2012). The RTS Index was 0.27% higher than a month ago (1,425.99 as of April 3, 2013) and 8.35% lower than a year ago (1,560.11 as of May 3, 2012).

Last week's increase of the RTS Index was accompanied by the decrease of volatility levels, when the Russian Volatility Index RTSVX was down 7.73%.

The most positive impact on the MICEX Index was mainly due to the rising prices for ordinary shares of Sberbank (+1.05%), GAZPROM (+0.70%) and LUKOIL (+0.44%).

Trading volume of securities included into the Moscow Exchange Indices' list of constituents amounted to RUB 101.50 billion, and the market capitalization of the Indices' constituents amounted to RUB 19,210.04 billion.

At the end of the week, 36 constituents of the MICEX Index list were pushing the Index up (+3.62%), while 14 securities behaved negatively (-1.00%).

On the sector level, the major positive impact was made by the finance (+1.32%) and the oil & gas (+0.90%).

The oil & gas sector accounted for 51.20% of the MICEX Index total capitalization. The other large-weight sectors were the finance (19.38%) and the metals & mining (7.98%).

Last week's trading volume for the most liquid contract on FORTS, futures contract on the RTS Index, amounted to RUB 314.00 billion or 3.71 million contracts.

The RTS Index futures contract traded in backwardation last week. By the end of the week the RTS Index gained 3.45%, while the June and the September futures contracts up 4.27% and 4.32% respectively.

The total investor's open interest measured in RTS Index futures increased by 2.31%.

During the week the trading volume in futures contract on the MICEX Index was RUB 2.19 billion or 16.08 thousand contracts. Open interest in the MICEX Index futures decreased by 12.11%.

Trading volume in options on RTS Index futures totaled RUB 55.72 billion or 668.82 thousand contracts last week. Open interest of RUB 124.64 billion or 1.48 million contracts was fixed. Put options made up 47.14% of the total open interest for these contracts. The 145.000 strike calls and 135.000 strike puts had the highest open interest.

The total investors' open interest measured in options on the RTS index futures increased by 10.06%.

RUSSIAN EQUITY AND BOND INDICES

(April 29 – May 3, 2013)

The Moscow Exchange Indices are key indicators of the Russian organized market of securities and derivatives. The Indices refer to the type of the capitalization-weighted equity indices. The Indices calculation formula is based on the ratio of the total market capitalization of stocks included into the Index to the same indicator as of the Index inception date.

The MICEX and the RTS Indices are Russian stock market composite indices that include 50 most liquid stocks of the largest and most dynamically developing Russian issuers. The MICEX Index is calculated based on the stock prices denominated in RUB. The RTS Index is calculated based on the stock prices denominated in USD.

Sectoral Indices reflect the movements of prices in a given sector of the economy represented in the Russian stock market. They usually include 10 to 20 liquid shares of the most highly capitalized Russian issuers belonging to this sector.

MICEX O&G (RTSog) comprises stocks of oil & gas companies.
MICEX PWR (RTSeu) comprises stocks of power companies.
MICEX TLC (RTStl) comprises stocks of telecommunication companies.
MICEX M&M (RTSmm) comprises stocks of companies of metals and mining industry.
MICEX MNF (RTSfn) comprises stocks of companies of mechanical engineering industry.
MICEX FNL (RTSfn) comprises stocks of banks and financial companies.
MICEX CGS (RTScr) comprises stocks of companies of consumer & retail sector.
MICEX CHM comprises stocks of companies of chemical and petrochemical industry.

Values of the sectoral indices are presented in rubles and in US dollars. Historical values of the MICEX sectoral indices are served as a history for ruble-denominated indices, whereas historical values of the RTS indices are used as a history for dollar-denominated indices.

The Blue Chips Index (RTS Standard Index) is an indicator that tracks performance of the blue chips. It is calculated from ruble-denominated prices and bids for 15 top liquid stocks of the Russian cash equity market.

The Blue Chips Index MICEX10 is a price non-weighted index calculated as the average of price fluctuations of 10 most liquid stocks admitted to trading on the Exchange. The Index tracks the increase in the value of portfolio comprising 10 stocks with the same initial weights.

The Second-Tier Index (RTS-2) is an indicator that tracks the performance of stocks issued by small cap and mid cap companies. The Index constituent list includes 50 securities ranked below the stocks with the largest capitalization (taking into account free-float) included into the MICEX Index and the RTS Index unified list of constituents. The Index is calculated based on the dollar-denominated stock prices.

The MICEX Innovation Index is a capital-weighted price index comprised stocks of Russian companies traded on the Innovations and Investments Market.

Regional Indices are equity indices designed to include stocks admitted to trading in Moscow Exchange, selected on the basis of liquidity and capitalization with issuers operating primarily in the specific federal district of the Russian Federation. At the moment, the information on the RTS Siberia Index, with constituent stocks of companies from the Siberian Federal district, is available.

The Russian Volatility Index is an aggregated indicator which reflects the average value of implied volatility of the options on RTS Index futures contract. To calculate values of the Index the Black-Scholes option pricing formula is applied.

The Bond Indices are the family of MICEX Bond Indices consists of the Russian Government Bond Index (RGBI), MICEX Corporate Bond Index (MICEX CBI) and MICEX Municipal Bond Index (MICEX MBI). The Indices were designed to measure the performance of the various segments of the Russian bond market. The Bond Indices are calculated by three methods concurrently: "total return", "clean price" and "gross price" method. In addition, duration and yield to maturity are calculated based on the Indices constituent lists.

The repo rate indicators are calculated to evaluate Russian organized repo market condition. The Indicators are computed separately for the stock repo market and bond repo market. Trades in shares included in the MICEX Index constituent list and trades in bonds included in the Bank of Russia's Lombard list are used to calculate the Indicators. There are overnight, one-week and two-week repo rate indicators that are determined based on settlement periods of relevant repo transactions.
