These Consolidated Interim Condensed Financial Statements of the Group have been prepared in accordance with the International Financial Reporting Standard IAS 34 “Interim Financial Statements”.

Basis of presentation

These Consolidated Financial Statements are presented in thousands of Russian rubles, unless otherwise indicated. These Consolidated Financial Statements have been prepared on the historical cost basis except for certain financial assets and liabilities that are measured at fair value.

3. Significant Accounting Policies

The accounting policies adopted by the Group in the preparation of these Consolidated Interim Condensed Financial Statements are consistent with those followed in the preparation of the Group's Consolidated Financial Statements for the year ended December 31, 2012 except for the adoption of new standards and interpretations effective as of 1 January 2013.

The Group applies, for the first time, IFRS 10 Consolidated Financial Statements, IFRS 13 Fair Value Measurement and amendments to IAS 1 Presentation of Financial Statements. As required by IAS 34, the nature and the effect of these changes are disclosed below. In addition, the application of IFRS 12 Disclosure of Interest in Other Entities would result in additional disclosures in the annual consolidated financial statements.

Several other new standards and amendments apply for the first time in 2013. However, they do not impact the annual consolidated financial statements of the Group or the interim condensed consolidated financial statements of the Group.

The nature and the impact of each new standard/amendment is described below:

IAS 1 Presentation of Items of Other Comprehensive Income – Amendments to IAS 1

The amendments to IAS 1 introduce a grouping of items presented in other comprehensive income. Items that could be reclassified (or recycled) to profit or loss at a future point in time now have to be presented separately from items that will never be reclassified. The amendment affected presentation only and had no impact on the Group's financial position or performance.

IFRS 10 Consolidated Financial Statements and IAS 27 Separate Financial Statements

IFRS 10 establishes a single control model that applies to all entities including special purpose entities. IFRS 10 replaces the parts of previously existing IAS 27 Consolidated and Separate Financial Statements that dealt with consolidated financial statements and SIC-12 Consolidation – Special Purpose Entities. IFRS 10 changes the definition of control such that an investor controls an investee when it is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. To meet the definition of control in IFRS 10, all three criteria must be met, including: (a) an investor has power over an investee; (b) the investor has exposure, or rights, to variable returns from its involvement with the investee; and (c) the investor has the ability to use its power over the investee to affect the amount of the investor's returns. IFRS 10 had no impact on the consolidation of investments held by the Group.

IFRS 13 Fair Value Measurement

IFRS 13 establishes a single source of guidance under IFRS for all fair value measurements. IFRS 13 does not change when an entity is required to use fair value, but rather provides guidance on how to measure fair value under IFRS when fair value is required or permitted. The application of IFRS 13 has not materially impacted the fair value measurements carried out by the Group.

IFRS 13 also requires specific disclosures on fair values, some of which replace existing disclosure requirements in other standards, including IFRS 7 Financial Instruments: Disclosures. Some of these disclosures are specifically required for financial instruments by IAS 34.16A(j), thereby affecting the interim condensed consolidated financial statements period. The Group provides these disclosures in Note 31.

4. Critical Accounting Judgements and Key Sources of Estimation Uncertainty

In the application of the Group's accounting policies the Management is required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

Critical judgements in applying accounting policies

The following are the critical judgements, apart from those involving estimations (see below), that the Management has made in the process of applying the Group's accounting policies and that have the most significant effect on the amounts recognised in the Consolidated Interim Condensed Financial Statements.

Written put option over own shares

Financial liabilities of the Group as at December 31, 2012 include a written put option on the Group's shares. The option was granted by the Group to certain former shareholders of RTS as a part of the merger with RTS. The option gave its holders the right to put the Group's shares back to the Group for cash:

- in July 2013 in the case if the Group has not conducted an IPO by June 30, 2013, and MICEX stock index and FTSE Mondo Visione Exchanges index have not fallen by 30% or more after the merger date;
- In October 2014, if the option has not been exercised in July 2013 and the Group has not conducted an IPO by September 30, 2014.

Because the put option required the Group to deliver cash in the event of occurrence or non-occurrence of uncertain future events that are beyond control of both the Group and the holders of the option, in accordance with IAS 32 *Financial Instruments: Presentation* the option was classified as a financial liability and is carried at the net present value of its strike price. For the purpose of calculation of the net present value, Management assumed that the option could be exercised in July 2013 and has used the discount rate of 7%. Unwinding of the discount is recorded as interest expense in a separate line of the Consolidated Income Statement.

The Group conducted an IPO on February 15, 2013. The put option over own shares lapsed and a financial liability in respect of the put option was derecognised.

Held-to-maturity financial assets

The Management has reviewed the Group's held-to-maturity financial assets in the light of its capital maintenance and liquidity requirements and have confirmed the Group's positive intention and ability to hold those assets to maturity. Details of these assets are set out in Note 18.

Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

4. Critical Accounting Judgements and Key Sources of Estimation Uncertainty (continued)

Impairment of receivables

The Group regularly reviews its receivables to assess for impairment. The Group's receivables impairment provisions are established to recognize incurred impairment losses in its portfolio of receivables. The Group considers accounting estimates related to allowance for impairment of receivables a key source of estimation uncertainty because (a) they are highly susceptible to change from period to period as the assumptions about future default rates and valuation of potential losses relating to impaired receivables are based on recent performance experience, and (b) any significant difference between the Group's estimated losses and actual losses would require the Group to record provisions which could have a material impact on its Consolidated Financial Statements in future periods.

The Group uses Management's judgment to estimate the amount of any impairment loss in cases where the debtor has financial difficulties and there are few available sources of historical data relating to similar debtors. Similarly, the Group estimates changes in future cash flows based on past performance, past counterparty behavior, observable data indicating an adverse change in the payment status, and national or local economic conditions that correlate with defaults on assets in the group. Management uses estimates based on historical loss experience for assets with credit risk characteristics and objective evidence of impairment similar to those in the group of receivables. The Group uses Management's judgment to adjust observable data for a group of receivables to reflect current circumstances not reflected in historical data.

The allowances for impairment of financial assets in the Consolidated Interim Condensed Financial Statements have been determined on the basis of existing economic and political conditions.

Valuation of financial instruments

For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques. Such techniques may include:

- Using recent arm's length market transactions
- Reference to the current fair value of another instrument that is substantially the same
- A discounted cash flow analysis or other valuation models.

Impairment of goodwill

Goodwill is tested for impairment annually (as at December 31) and when there is an indication that the carrying value may be impaired.

Impairment is determined by assessing the recoverable amount of each cash-generating unit (CGU) or group of CGUs to which the goodwill relates. When the recoverable amount of the CGU is less than its carrying amount, an impairment loss is recognised.

Share-based payments

The Group measures the cost of transactions with employees by reference to the fair value of the equity instruments at the date at which they are granted. Estimating fair value for share-based payment transactions requires determination of the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determination of the most appropriate inputs to the valuation model including the expected life of the share option and volatility and making assumptions about them. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in Note 11.

The Group grants equity-settled share options to senior management and some employees. A majority of the options vest when the employee continues to be employed by the Group at the vesting date. The maximum contractual term of the options is four years. The fair value of the options is measured at the grant date using a binomial model taking into account the terms and conditions upon which the instruments were granted.

The following table illustrates the number and weighted average exercise prices (WAEP) of, and movements in, share options during the six-month period ended June 30, 2013:

	Number	WAEP
Outstanding at 1 January	42 027 058	47.53
Lapsed during the period	(950 001)	46.90
Granted during the period	4 500 001	46.90
Outstanding at 30 June	45 577 058	47.48

The weighted average remaining contractual life for the share options outstanding as at June 30, 2013 was 1,04 years. The weighted average fair value of options granted during the six-month period was RUB 11,13. Exercise prices for options outstanding as at June 30, 2013 were RUB 46,9 – RUB 51.

The following table lists the inputs to the models used:

Assumption	Value
Expected volatility	25,5%
Risk-free interest rate	6,4%
Weighted average share price, RUB	54
Dividend yield	4,1%

The volatility assumption is based on implied volatilities of quoted options on shares of similar stock exchanges.

12. Income Tax

The Group provides for taxes based on the tax accounts maintained and prepared in accordance with the tax regulations of countries where the Group and its subsidiaries operate and which may differ from IFRS.

Deferred taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for tax purposes. Temporary differences relate mostly to different methods of income and expense recognition, as well as to recorded values of certain assets.

The tax rate used for the reconciliations between tax expense and accounting profit is the corporate tax rate of 20% payable by corporate entities in the Russian Federation on taxable profits under the tax law in that jurisdiction.

Temporary differences comprise:

24. Disposal Group Held for Sale

In 2012 SC RTS provided settlement services to trading participants. In the second half of 2012 this business was transferred to NSD. In March 2013 the Management Board decided to sell SC RTS and initiated a tender to locate a buyer. Management has the intention to find a buyer and sell SC RTS up to October 2013. The Group presented SC RTS as at 30 June 2013 as disposal group held for sale under IFRS 5 "Non-current assets held for sale and discontinued operations".

Risk-covering funds	2 541 567	1 874 063
Total balances of market participants	268 578 939	246 990 385

The guarantee fund comprises contributions deposited by market participants (initial or maintenance margin). The purpose of this fund is to support clearing settlements on the market and to cover risks arising from open positions of market participants, including operations of market participants, where the Group acts as a central counterparty. If an initial margin requirement exceeds the contribution made by a market participant in the guarantee fund, the participant is required to cover the deficit by depositing additional maintenance margin for the unsettled trades or to reduce the open position to an appropriate level. The guarantee fund amount is payable to a market participant when it closes its positions. The Group places guarantee fund amounts on current accounts and deposits with reputable banks or short-term repo receivables (Notes 13, 15).

Market participants also pledge traded securities to the guarantee fund as collateral for their obligations. These securities are blocked at the participants' custody accounts in NSD and DCC. These securities are not assets of the Group and are not recognised in the Consolidated Statement of the Financial Position.

24. Balances of Market Participants (continued)

The risk-covering funds comprise contributions deposited by market participants. The purpose of these funds is to provide additional insurance to the market participants in respect of the ability of the Group to guarantee proper settlements of open positions in case of a market participant default. The minimum contribution amount per one participant is determined by the Group management and it is approved by the Derivatives Market Committee or the Currency Market Committee. Risk-covering funds amounts are only used to cover the deficit if a contribution to a guarantee fund made by a trading participant is not sufficient to cover its losses. The Group places cash received from the market participants in the risk-covering funds with top-rated banks (Notes 13, 15).

31. Fair Value of Financial Assets and Liabilities

The Group performs a fair value assessment of its financial assets and liabilities, as required by IFRS 7 Financial Instruments: Disclosures. Fair value is defined as the amount at which the instrument could be exchanged in a current transaction between knowledgeable, willing parties in an arm's length transaction, other than in forced or liquidation sale.

Except as detailed below, Management of the Group considers that the fair value of financial assets and liabilities approximates their carrying value:

	June 30, 2013		December 31, 2012	
	Carrying value	Fair value	Carrying value	Fair value
Investments held-to-maturity	60 279	59 948	529 842	529 249
Written put option over own shares	-	-	23 318 767	646 055

The fair value of the put option is estimated using the Monte Carlo method. The model of stochastic processes for changes in Moscow Exchange shares prices, MICEX Index and FTSE Mondo Visione Exchanges Index is based on the following assumptions: the probability of IPO failure during the option life is 15% and the number of random simulation processes for prices and changes in the indices equals to 30 000 iterations.

31. Fair Value of Financial Assets and Liabilities (continued)

The Group measures fair values for financial assets recorded on the statement of financial position at fair value using the following fair value hierarchy that reflects the significance of the inputs used in making the measurements:

- Level 1: Quoted market prices in an active market (that are unadjusted) for identical assets or liabilities.
- Level 2: Valuation techniques (for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable).
- Level 3: Valuation techniques (for which the lowest level input that is significant to the fair value measurement is unobservable).

The table below analyses financial assets and liabilities measured at fair value at June 30, 2013, by the level in the fair value hierarchy into which the fair value measurement is categorised:

	June 30, 2013 (unaudited)			Total

Loss recognized in net loss on financial assets at fair value through profit or loss (unaudited)	(2 346)
Balance at June 30, 2013 (unaudited)	212 568

Valuation techniques

The foreign currency forward contracts are measured based on observable spot exchange rates and the yield curves of the respective currencies.

The fair value of the unquoted debt securities has been determined using a discounted cash flow model, by reference to quoted market prices for similar instruments.

The fair value of unquoted equity instruments has been determined based on market approach using price/net assets ratio for similar companies.
