Index Derivatives

For the week of March 11-16, 2012 the total trading volume on the derivatives market FORTS equaled RUB886.63 billion rubles representing 8.79 million contracts.

Last week's trading volume for the most liquid contract on FORTS, futures contracts on the RTS Index, amounted to RUB798.93 billion representing 7.89 million contracts.

RTS Index futures contract traded in backwardation last week. By the end of the week the RTS Index added 4.24%, while the June futures contracts grew by 4.84%.

On Friday, 16 March, the March RTS Index futures contracts were settled. The settlement price was determined on 15 March and amounted to 175,343 points.

The total investor's open interest measured in RTS Index futures decreased by 32.40%.

During the week, trading volume in futures contract on the MICEX Index on FORTS was RUB3.10 billion representing 19.28 thousand contracts. Open interest in the contract decreased by 87.08%.

Trading volume in options on RTS Index futures totaled RUB81.03 billion representing 844.32 thousand contracts. By the end of the week, open interest of RUB24.44 billion or 260.98 thousand contracts was fixed. Call options made up 45.87% of the total open interest for these contracts. 170,000 strike calls and 135,000 strike puts had the highest open interest.

Over the week, the total investor's open interest measured in options on the RTS index futures decreased by 75.39%.

RTS-MICEX Indices are the leading benchmarks of the Russian organized securities and derivatives markets. The equity indices are capitalization-weighted indices. They are calculated based on the total market capitalization of constituent stocks divided by the total market capitalization of these stocks at the initial date.

MICEX Index is a composite index of the 30 most liquid stocks of the largest and dynamically developing Russian companies from the major sectors of the Russian economy. The Index is calculated using ruble-denominated prices for the constituent stocks.

RTS Index is a broad-based index calculated on the basis of prices of 50 liquid shares of the most highly capitalized Russian companies. This allows it to reflect precisely the entire Russian cash equity market. The Index is computed from the US dollar-denominated prices.

Cap Indices are market-capitalization weighted indices comprised of the most liquid stocks of Russian issuers:

MICEX LC (MICEX Large Cap Index) contains the top companies as measured by market capitalization.
MICEX MC (MICEX Mid Cap Index) contains companies with market capitalization ranked lower than for the top companies.

MICEX SC (MICEX Start Cap Index) contains companies with small capitalization.

Sectoral Indices reflect the movements of prices in a given sector of the economy represented in the Russian stock market. They usually include 10 to 20 liquid shares of the most highly capitalized Russian issuers belonging to this sector.

MICEX O&G (RTSog) comprises stocks of oil & gas companies.

MICEX PWR (RTSeu) comprises stocks of power companies.

MICEX TLC (RTStl) comprises stocks of telecommunication companies.

MICEX M&M (RTSmm) comprises stocks of companies of metals and mining industry.

MICEX MNF (RTSin) comprises stocks of companies of mechanical engineering industry.

MICEX FNL (RTSfn) comprises stocks of banks and financial companies.

MICEX CGS (RTScr) comprises stocks of companies of consumer & retail sector.

MICEX CHM comprises stocks of companies of chemical and petrochemical industry.

Values of the sectoral indices are presented in rubles and in US dollars. Historical values of the MICEX sectoral indices are served as a history for ruble-denominated indices, whereas historical values of the RTS indices are used as a history for dollar-denominated indices.

Regional Indices are equity indices designed to include stocks admitted to trading in MICEX-RTS, selected on the basis of liquidity and capitalization with issuers operating primarily in the specific federal district of the Russian Federation. At the moment, the information on the RTS Siberia Index, with constituent stocks of companies from the Siberian Federal district, is available.

RTS Standard Index is an indicator that tracks performance of the so called blue chips. It is calculated from ruble-denominated prices and bids for 15 top liquid stocks of the Russian cash equity market.

MICEX Innovation Index is a capital-weighted price index comprised stocks of Russian companies traded on the Innovations and Investments Market.

The Russian Volatility Index is an aggregated indicator which reflects the average value of implied volatility of the options on RTS Index futures contract. To calculate values of the Index the Black-Scholes option pricing formula is applied.
